48 miles of track has been re-laid with steel rail, and 34.16 miles of track with new iron rail.

The company have laid in all

$12{,}002\frac{1379}{2240}$ tons of steel rails.

$348\frac{497}{2240}$ tons of steel capped rails.

Equal to 134 miles of track.

The strength, durability, and safety of steel rails, and the economy arising from their use, as compared with iron rails, has been so thoroughly demonstrated by practical tests on all the leading railways of the country that any further argument in favor of their more general use seems wholly unnecessary.

The company owned at date of last report 197 locomotives; to which have been added by construction in the company's shops 18—making a total of 215. The company have also 11 sleeping coaches, 67 day coaches, 5 railway post office, 23 baggage mail and express, 1 paymaster's 2,408 box freight, 622 stock freight, 979 platform and coal, 77 caboose and drovers', 1 pile driving, 1 wrecking, and 40 gravel cars.

The number of miles run by locomotives on passenger trains was 1,035,818; on freight trains, 3,315,334; on wood, construction and gravel trains, 334,859—total 4,686,006. Cost per mile run for repairs, oil, waste, fuel and wages of engineers, firemen and wipers, 20.01 cents.

BALANCE SHEET, April 1, 1874.

Capital stock account		$24,999,700 00

President.—JOHN F. TRACY.

Vice Pres't and Gen'l Sup't.—HUGH RIDDLE.

Directors.—David Dows, Francis H. Towa, A. G. Dulman, Charles R. Marvin, H. Kennedy, New York; Rob't A. Forsyth, Newburg, N. Y.; Milton Courtright, Wm. L. Scott, Erie, Pa.; John F. Tracy, Hugh Riddle, Henry H. Porter, Chicago, Ill.; Geo. L. Davenport, Davenport, Ia; B. F. Allen, Des Moines, Iowa.

Secretary and Treasurer.—FRANCIS H. TOWS.

Auditor.—F. D. SHERMAN.

Ass't Gen'l Superintendent.—A. KIMBALL.

Railroad Abandonment Reconsidered.

Mr. H. A. Taylor, president of the Wells road, has applied to the Mankato City Council for an extension of 60 days time for the completion of that portion of the road from Mankato to Good Thunder, which the original resolution required to be completed by August 1. The Mankato (Minn.) *Review* says:

The road was virtually abandoned with Mr. Man's famous dispatch about unfriendly legislation, but Mr. Taylor, protesting against this decision, determined to make still one further effort to succeed, and for this purpose he enlisted Messrs. Drake, Wilder, Thompson and others of the St. Paul and Sioux City road in the enterprise. This reassured a portion of the New York parties, who, with the St. Paul parties, have formed a combination for completing the road. One express condition of this combination is that Mankato and Lyra shall extend the time for reaching Good Thunder sixty days to the first of October.

☞ The Grafton Railroad, comprising a narrow gauge track three miles in length, from Grafton Centre to Grafton Station, on the Boston and Albany Railroad, has been completed.

The National Currency Act.

An act to fix the amount of United States notes, providing for distribution of the national bank currency, and for other purposes.

SECTION 1. Be it enacted &c., That the act entitled "An act to provide a national currency secured by a pledge of United States bonds and to provide for the circulation and redemption thereof," approved June 3, 1864, shall be hereafter known as the "National Bank act."

SEC. 2. That section 31 of "the National Bank act" be so amended that the several associations therein provided for shall not hereafter be required to keep on hand any amount of money whatever by reason of the amount of their respective circulation; but the moneys required by said section to be kept at all times on hand shall be determined by the amount of deposits in all respects, as provided for in the said section.

SEC. 3. That every association organized, or to be organized, under the provisions of the said act, and of the several acts amendatory thereof, shall at all times keep and have on deposit in the Treasury of the United States, in lawful money of the United States, a sum equal to 5 per cent of its circulation, to be held and used for the redemption of such circulation; which sum shall be counted as a part of its lawful reserve, as provided in section 2 of this act; and when the circulating notes of any such associations, assorted, or unassorted, shall be presented for redemption in sums of $1,000 or any multiple thereof to the Treasurer of the United States, the same shall be redeemed in United States notes. All notes so redeemed shall be charged by the Treasurer of the United States to the respective associations issuing the same, and he shall notify them severally on the first day of each month, or oftener, at his discretion, of the amount of such redemptions; and whenever such redemptions for any association shall amount to the sum of $500, such association so notified shall forthwith deposit with the Treasurer of the United States a sum in United States notes equal to the amount of its circulating notes so redeemed. And all notes of national banks, worn, defaced, mutilated, or otherwise unfit for circulation shall, when received by any asisstant treasurer or at any designated depository of the United States, be forwarded to the Treasurer of the United States for redemption as provided herein. And when such redemptions have been so reimbursed, the circulating notes so redeemed shall be forwarded to the respective associations by which they were issued; but if any such notes are worn, mutilated, defaced, or rendered otherwise unfit for use they shall be forwarded to the Comptroller of the Currency and destroyed, and replaced as now provided by law; Provided, That each of said associations shall reimburse to the Treasury the charges for transportation and the costs for assorting such notes; and the associations hereafter organized shall also severally reimburse to the Treasury the cost of engraving such plates as shall be ordered by such association respectively; and the amount assessed upon each association shall be in proportion to the circulation redeemed, and be charged to the fund on deposit with the Treasurer; and provided further, That so much of section 32 of said National Bank act requiring or permitting the redemption of its circulating notes elsewhere than at its own counter, except as provided for in this section, is hereby repealed.

SEC. 4. That any association organized under this act, or any of the acts of which this is an amendment, desiring to withdraw its circulating notes, in whole or in part, may, upon the deposit of lawful money with the Treasurer of the United States in sums of not less than $9,000 take up the bonds which said association has on deposit with the Treasurer for the security of such circulating notes, which bonds shall be assigned to the bank in the manner specified in the nineteenth section of the National Bank act; and the outstanding notes of said association, to an amount equal to the legal-tender notes deposited, shall be redeemed at the Treasury of the United States, and destroyed as now provided by law: Provided, That the amount of the bonds on deposit for circulation shall not be reduced below $50,000.

SEC. 5. That the Comptroller of the Currency shall, under such rules and regulations as the Secretary of the Treasury may prescribe, cause the charter numbers of the association to be printed upon all national bank notes which may be hereafter issued by him.

SEC. 6. That the amount of United States notes outstanding and to be used as a part of the circulating medium shall not exceed the sum of $382,000,000 which said sum shall appear in each monthly statement of the public debt, and no part thereof shall be held or used as a reserve.

SEC. 7. That so much of the act entitled "An act to provide for the redemption of the 8 per cent. temporary-loan certificates, and for an increase of national-bank notes," as provides that no circulation shall be withdrawn, under the provisions of section 6 of said act, until after the fifty four millions granted in section 1 of said act shall have been taken up, is hereby repealed; and it shall be the duty of the Comptroller of the Currency, under the direction of the Secretary of the Treasury, to proceed forthwith, and he is hereby authorized and required, from time to time, as application shall be duly made therefor, and until the full amount of $55,000,000 shall be withdrawn, to make requisitions upon each of the national banks described in said section, and in the manner therein provided, organized in States having an excess of circulation, to withdraw and return so much of their circulation as by said act may be apportioned to be withdrawn from them, or, in lieu thereof to deposit in the Treasury of the United States lawful money sufficient to redeem such circulation, and upon the return of the circulation required, or the deposit of lawful money, as herein provided, a proportionate amount of the bonds held to secure the circulation of such association as shall make such return or deposit shall be surrendered to it.

SEC. 8. That upon the failure of the national banks upon which requisitions for circulation shall be made, or of any of them, to return the amount required, or to deposit in the Treasury lawful money to redeem the circulation required, within thirty days, the Comptroller of the Currency shall at once sell, as provided in section 49 of the National Currency act, approved June 3, 1864, bonds held to secure the redemption of the circulation of the association or associations which shall so fail, to an amount sufficient to redeem the circulation required of such association or associations, and with the proceeds, which shall be deposited in the Treasury of the United States, so much of the circulation of such association or associations shall be redeemed as will equal the amount required and not returned; and if there be an excess of proceeds over the amount required for such redemption, it shall be returned to the association or associations whose bonds shall have been sold. And it shall be the duty of the Treasurer, assistant treasurers, designated depositaries, and national bank depositaries of the United States, who shall be kept informed by the Comptroller of the Currency of such associations as shall fail to return circulation as required, to assort and return to the Treasury for redemption the notes of such associations as shall come into their hands until the amount required shall be redeemed, and in like manner to assort and return to the Treasury, for redemption, the notes of such national banks as have failed, or gone into voluntary liquidation for the purpose of winding up their affairs, and of such as shall hereafter so fail or go into liquidation.

SEC. 9. That from and after the passage of this act it shall be lawful for the Comptroller of the Currency, and he is hereby required, to issue circulating notes, without delay, as applications therefor are made, not to exceed the sum of $55,000,000, to associations organized, or to be organized, in those States and Territorties having less than their proportion of circulation, under an apportionment made on the basis of population and of wealth, as shown by the returns of the census of 1870; and every association hereafter organized shall be subject to, and be governed by the rules, restrictions, and limitations, and possess the rights, privileges, and franchises, now or hereafter to be prescribed by law as to national banking associations, with the same power to amend, alter, and repeal provided by "the National Bank act:" Provided, That the whole amount of circulation withdrawn and redeemed from banks transacting business shall not exceed $55,000,000, and that such circulation shall be withdrawn and redeemed as shall be necessary to supply the circulation previously issued to the banks in those States having less than their apportionment: And provided further, That not more than $30,000,000 shall be withdrawn and redeemed as contemplated during the fiscal year ending June 30, 1875.

Views of a Railway Manager.

At a recent dinner in New York, George R. Blanchard, Vice President of the Erie railway, made some particularly sound remarks on the railroad question. He admitted that there had been much fraud and corruption; that many stocks had been diluted; that many managers had fattened on the fortunes or misfortunes of lines; that many bonds had possessed no firm basis of reality; that many roads had been built which should not have been built, and many towns and cities had assumed debts upon shadowy securities. The railways, he said, should be as sound and well managed as the banks, for they were alike custodians of public and private interests, and the conservators of public repute and credit at home and abroad. Such concessions to public sentiment and welfare were well demanded, but he submitted to the mercantile judgment of his hearers the questionable results of erratic prohibitive railway tariff legislation, of which he said:

It had failed in all countries which had tried it. It dealt in values, but could not justly establish them for transportation; it attacked their usefulness and credit; it disturbed and diverted capital; it created fictitious issues; it denied investors the rights secured to them in all other forms of venture; it retarded national prosperity and increase; it encouraged bribery and fraud, jobbery and consolidation; it stimulated the disastrous contests of labor with capital; it removed the elements of fixed calculation and substituted the uncertainties of public caprice; it impaired the obligations of contracts; it tended to unwise expenditures of public moneys; it placed states and nations in hostility to the great enterprises that developed them; it involved public and private interests in antagonisms which undermined confidence and bred long lines of disasters to both; and lastly, it unwisely attempted to repeal the inflexible and immutable laws of trade and competition. Between the extremes, it seemed to him, lay the fair road to material prosperity. He apprehended disastrous results from the enactment of unwise laws in respect to railways, and urged that the relations of railways with their Exchange and with every interest of this great city were intimate and continual.

Turkish Railways.

The works on the short extension line of the Roumelian railways from Sophia to Radomir are about to be commenced forthwith. The section is of 73 kilometres (46 miles), and the chief engineer in charge has had his working sheds built and gathered on the spot the greater part of the material he requires. The laying of the rails on the new railway from Moudania to Broussa, of which the earth works have been completed has been suspended, in consequence of the recent suicide, at Haidar Pasha, of the German contractor who had undertaken that branch of the construction of the line. We are assured that the Minister of Public Works is examining as quickly as possible the accounts of Mr. Pressel's staff of engi-

neers, engaged on the surveys of the projected Asiatic lines, whose services have been dispensed with, and that the greater number have been already paid what is due to them. Mr. Pressel himself, the ex-director-in chief of these Asiatic lines, the execution of which is for the present abandoned, will leave Constantinople shortly on his return to Germany.—*Levant Herald.*

French Railways.

The statistical department of the French "Bureau des ponts et chaussees" has just published an Abstract of the French railway statistics for 1873, as compared with 1872, from which we extract the following particulars:

At the end of 1872 the total length of railway at work in France was 17,840 kils. During 1873, some 725 kils. additional were opened; so that at the end of last year the total length of all the French railways was 18,565 kils. Out of the 725 kils. of new line opened in 1873, the Old Systems of the 6 great Companies contributed 64 kils. only; while the New Systems provided 315 kils.: total, 379 kils. The other French railway Companies, those that in France are termed the "small" Companies in contra-distinction to the 6 "great" ones, opened up 346 kils. between them, or almost as much as the "great" Companies. But whereas the "great" Companies were working at the beginning of 1873 some 17,016 kils. of line, while the "small" Companies only had at work some 824 kils., this result does not say much for the activity of the "great" Companies, while it speaks volumes for that of the "small" ones, who added just upon 42 per cent. to their mileage.

Taking the population of France at 36,000,000, and omitting merely local lines, there would be one kilometre of railway to every 1,940 inhabitants; and taking its area at 528,000 square kilometres, there would be one kilometre of railway to every 28¼ square kilometres.

The 9,247 kils. of the Old Systems of the six "great" Companies yielded in 1873 an average gross receipt of 67,549 frs. per year per kil. The New Systems yielded 21,029 frs. per year per kil. The 1,170 kils,, belonging to the "small" Companies, yielded 11,298 frs. per year per kil., in spite of several lines being, as yet, unproductive. The average gross receipt per year per kil. for all the French lines, was 44,000 frs. The like average for the Belgian State Lines is 46,800 frs.

The Milwaukee and Superior Railroad Case.

Judge Woodruff, of the Circuit Court of the United States, has filed his decision in the case of Jerome R. Brigham, Receiver of the Milwaukee and Superior Railroad Company, against Charles H. Ludington, H. H. Barling, and Abner K. Davis. In this case the complainant filed a bill as the Receiver of the debts, property, equitable interests, and things in action of the company, which was a corporation created by the laws of Wisconsin. In August, 1869, one William B. Smith recovered judgment against the company for $3,029 50 in the U. S. District Court of Wisconsin. The execution issued thereon was returned unsatisfied. Smith then filed his bill in equity as a judgment creditor to discover his rights as such, and to compel the application of the company's assets to the payment of the judgment. The bill was taken *pro confesso* against the company. By subsequent acts of Congress the suit was transferred to the Circuit Court of that district. The plaintiff was, by this court, appointed Receiver in 1870. The nature and object of the present suit is as follows: In 1857 the railroad company hypothecated with the Boston Locomotive Works certain notes and mortgages upon real estate in Wisconsin as collateral securities for the company's notes, amounting to $18,000, given to the locomotive works for engines. Subsequently judgment was recovered on these notes. The judgment was returned unsatisfied, and a bill in equity was filed against the company and against Ludington and others, to enforce payment out of some of the company's property, which was alleged to have come into their hands. A final decree was given against these defendents for $19,110, with interest, bringing it up to $33,398 55. By subsequent assignment this judgment and the original claim of the Boston Locomotive Works came to the defendants in the present suit, Barling and Davis. They subsequently sold the debt, with all the securities, except the mortgages, which they still hold to secure them against responsibility to the railroad company. The complainant in this suit seeks to compel the collection of this judgment, or its application, without actual collection, toward the satisfaction of the debt of $33,398 55, which now amounts to $36,182 84, at the same time offering to pay the deficiency and all other just charges, and prays that thereupon the mortgages be delivered to him for collection for the payment of Smith's judgment, upon whose bill, as judgment creditor, the complainant was appointed Receiver. It was objected that the bill was defective for want of parties—that the presence of the railroad company was indispensable. The court held that the objection was well founded, and dismissed the bill.

Watered Railroad Stock.

A special telegram from Bloomington, Ills., to the St. Louis *Democrat*, dated June 24, says:

A case was decided in the Rock Island Circuit Court, a day or two since, which is of the utmost importance to the people of this State, and which appears to have a bearing on the Lafayette, Bloomington and Muncie Railroad case in the McLean Circuit Court, in which McLean and neighboring counties are so largely interested, and which is now in litigation. The case was one which was brought to declare void $2,000,000 of stock in the Rockford, Rock Island and St. Louis road issued to the contractors, and by them paid over to the defendants on a division of the profits of the construction contract. A decree was entered canceling stock to the amount of $1,785,000, and the stock has been surrendered and canceled. Enough more to make it $2,000,000 is embraced by the decree, but has not yet been surrendered.

This, it is said, is the first case where a suit has resulted in setting aside stock which was, in fact, never paid for, and the value of which never entered the road, but which nominally swelled the construction account.

Postal Cars.

We see it stated that the president of the Philadelphia, Wilmington and Baltimore Railroad Co. has notified the Postmaster General that after July 1 that road will not haul the United States post-office cars over his road, but will carry the mails as formerly like other freight, charging full fare for every employe of the Post-office Department who goes over the road. The Postmaster General, it is reported, will then begin a suit in the United States courts to compel the road to take the postal cars. The company holds that the United States cannot require the road to carry the mails in a given way, so long as the company is not consulted as to the price to be paid. The management of the road have offered to submit the question of compensation to a jury or to arbitrators, but as the Postmaster General, it is said, refuses to do this, the company will take the course indicated in order to make a test case. It is hoped the litigation will not interfere with the regular transmission of the mail.—*Phila. Ledger, June 27.*

☞ It is now believed that the Lafayette, Lasalle and Clinton railroad, to extend from Sheldon, Indiana, to a point on the Prophetstown road, in Illinois, will be constructed this year. The estimated cost of construction and equipment is $2,188,000.

☞ The Boston Journal says that some misapprehension appears to prevail with regard to the conditional subscription of the State to the loan to the New York and New England Railroad, and it adds: "We do not understand that the act limits the time within which the State will take its proportion of the whole amount, but simply provides that $500,000 shall be taken up by bona fide subscribers before its own promise shall be payable. It would seem as if there ought not to be any delay in this matter, and that interested outside parties should not hesitate, as the State has subscribed double its proportion."

☞ The net earnings of the Chicago, Burlington and Quincy Railroad, and Burlington and Missouri River Railroad, in Iowa, leased to the former road, show a handsome gain this year over the last, being for 1874 $2,017,103 against $1,358,758, for 1873. Increase in net earnings for the first five months of the year, $658,350. The net earnings of the Burlington and Missouri River Railroad, in Nebraska, for five months in 1873 were $13,455; same time in 1874, $174,908; increase this year, $161,448.

☞ The Montgomery (Ala.) *Journal* learns that the New England company of capitalists who purchased the Alabama and Chattanooga railroad have bought the Mobile and Grand Trunk railroad, and have placed large gangs of workmen on the line to continue it to its intersection with the Alabama and Chattanooga railroad, a distance of sixty miles.

☞ At a meeting of the stockholders of the Michigan Central Railroad Company held at Detroit on the 22d ult., the following Directors were elected: J. F. Joy, of Detroit; J. W. Brooks, Nathaniel Thayer, H. H. Hunewell, Sidney Bartlett, of Boston, John Jacob Astor, George F. Tallman, Moses Taylor, of New York, and Erastus Corning, of Albany.

☞ Articles of association have been filed for the Indianapolis and Western railroad. The road is designed to run from Indianapolis, Ind., to Montezuma, to connect with the Indiana and Illinois Central to Decatur, Illinois. A full board of directors was elected, with W. H. Durham President.

☞ The track has been laid on the Rhinebeck and Connecticut Railroad to Gallatinville, New York, about 29 miles northeast of Rhinebeck and some four miles beyond Mount Ross, the point reached last fall. A large force is at work on the line, and work is being pushed forward.

☞ The new iron bridge over the Schuylkill river, at Girard avenue, Philadelphia, has been completed by the contractors, Messrs. Clark, Reeves & Co., and will be formally accepted from the contractors by the city authorities on the morning of the Fourth of July. The total cost of the bridge has been $1,404,445.

☞ W. B. Isbell, George J. Seny and A. B. Bayless have been elected directors of the Toledo, Wabash and Western Railway Co., vice J. R. Cecil, J. T. Casement and Kenyon Cox, resigned.

☞ The western division of the Northern Pacific Railroad has been completed to Columbia river, a distance of one hundred and twelve miles,

RAILROAD EARNINGS—MONTHLY.

Charles Francis Adams on the Railroad Question.

An open letter has been addressed to Senator Windom, by Charles Francis Adams, Jr., in regard to the propositions for railroad legislation which have been brought before Congress during the present session, and in particular with reference to the McCrary bill, and Senator Windom's suggestion for a Bureau of Commerce. Mr. Adams expresses the belief, undoubtedly justified by fact, that it has been his fortune to have more actual experience as a railroad Commissioner than any other man in America, and that therefore his views on the question before Congress may have more value than they would be otherwise entitled to. His experience, however, does not lead him to be satisfied either with the McCrary bill or with Senato Windom's proposal for a Bureau of Commerce. The first measure, he thinks, goes a great deal too far, and the second not far enough. He then proceeds to explain in what respect the McCrary bills goes too far, and says:

The general body of railroad tariffs in this country is now made up by the freight and ticket agents of the several lines, being some 1,500 or 2,000 in number, under responsibility to their several Boards of Directors. The tariffs thus framed are found by a portion of the public to be unsatisfactory. The McCrary bill proposes to remedy the evil by creating a species of Board for the revision of the tariffs, composed of nine public officials, from whose decision an appeal lines, not to the owners of the property, but to the petit juries of the country. The investigations I have made, no less than such experience as I have had, all go to convince me that the remedy will not cure the evil. I do not believe it is possible for any nine men, no matter how honest or experienced they may be, to properly revise all the running railroad tariffs in the United States. Even if they could, I do not believe—indeed, I know perfectly well—that they would not be able to reach the root of the present difficulty. That difficulty is the natural outgrowth of your whole theory and system of railroad construction, and you cannot eradicate it in this way, unless you are prepared to go all lengths, and upset that system. It may well be that the system is not the best possible; such as it is, however, it is there; and many of the evils complained of, every man at all familiar with it knows are vital to it. It is the system of private ownership regulated by competition, and the effort through the McCrary bill is to secure to the public all the benefit of competition, without any of its burdens. It cannot be. The Commissioners appointed under that bill, if it becomes a law, will find themselves placed in an impossible position. They will be forced in their decisions to be either arbitrary or absurd. They can be guided neither by principles nor by precedent. They must, unless they doggedly content themselves with some barbarous "rule of thumb," like the Wisconsin law, settle each case on its individual merits; and the consequence would be that they would soon accumulate about themselves a cloud of apparent, inconsistencies, in which their enemies would revel, while the public wandered more hopelessly befogged than ever.

It will be observed that Adams refers to the Wisconsin law as a barbarous rule of thumb; and in another part of his letter he very frankly states that there was a time when he himself believed what was wanted was more legal force in dealing with railroads, and he says:

I have since changed my mind. In the light of a fuller experience I think that the Massachusetts legislative wisdom had the right of it, and that in the instinctive inclination to have recourse to increasing force, I then was wrong, as the States of Wisconsin and Illinois are now.

He is of opinion that the best plan yet devised is that on which the Massachusetts Railroad Commission is based. The Commission possesses, in regard to tariffs, no executory powers whatever, its functions being simply advisory. The Commissioners are authorized to do nothing but listen, investigate and recommend. Whoever has, or thinks he has, a cause of grievance against any of the railroads, can bring it to the notice of the Board, whose duty it is to examine into the complaint, hear the parties in dispute, and then arrive at a formal decision, either dismissing the complaint, or making it a distinct recommendation to the corporation complained of. Such an arrangement will at first sight very possibly appear inefficient to bring about any practical reformation of abuses, and this was the idea which Mr. Adams entertained when he first entered upon his duties as Chairman of the Board. He found that he and his colleagues could not enforce any of their decisions, but were only authorized to report them, together with the subsequent action of the corporations upon them, to the Legislature. As he says:

Their recommendation thus simply went for what they were worth in themselves; they carried on weight except what was due to their reasoning, their justice, and the force of public opinion behind them.

But experience has convinced him that the practical operation of the Massachusetts Commission is that of a medium for the concentration of an otherwise scattered and ineffective public opinion, and that its results have been far more satisfactory than any kind of coercive legislation is ever likely to be. He observes:

The great difficulty has been in the want of a medium through which to bring public opinion to a focus. In the absence of such a medium it has been dissipated in every conceivable form of cant, sophistry and passion; setting back much needed reforms, instead of advancing them. It is doing this very thing now. The whole result of my experience has been to convince me that we make the greatest possible mistake in underestimating this force of public opinion in the management of the railroads. We are frantically running round in search of a Constable, when a properly directed remonstrance would produce the desired result. Reason, backed by public opinion, is a great deal stronger than any United States Marshal. Judging by the tone of the press and of debate, I should infer that neither reason nor public opinion had any weight whatever with railroad managers in America; my own experience leads me to the opposite conclusion, that there is no railroad corporation in the United States which to-day would dare to persist in any flagrant abuse of its privileges in face of a calm, intelligent, and well reasoned remonstrance from any authorized public tribunal.

As the opinions of a man whose experience in railroad management and railroad legislation is second to none, and who cannot be accused, even by the most reckless demagogues, of being unduly biased in behalf of the corporations, these views of Charles Francis Adams are entitled to careful consideration. It is a fact which it may be worth while to call attention to here moreover, that gradually everybody whose opinion is of the least value on cognate subjects, is ranging himself on the side which we have occupied in this controversy—the side, namely, of reason and justice. It is scarcely possible to-day to find a man of the least reputation who is willing to indorse those "barbarous rules of thumb," known as the Wisconsin and Illinois railroad laws. On the one hand the highest authorities demonstrate their unconstitutionality. On the other hand the highest authorities prove their inexpediency and impracticability. They are not lawful, in the first place; and in the second place they would not be advisable even if they were lawful. In a word, what is being realized is that the solution of the railroad problem will be vainly sought in this direction. As Adams says "the great problem is working itself out in its own way, to a foregone conclusion," and the wisest as well as the only feasible course is that which enables it to work itself out with the least possible friction.—*Sacramento Record.*

Atlantic and Great Western Railway.

A meeting of the stockholders of the Atlantic and Gt. Western Railway was held in this city on the 25th ult., for the purpose of voting on the proposed lease of the road to the Erie Railway Company. More than two-thirds of the stock was represented, and the vote in favor of the ratification of the lease was unanimous. The lease is for the term of ninety-nine years, dating from the 1st of May, 1874. The Erie company is given full control over all franchises of the Atlantic and Great Western road, with power to change the gauge of the latter line. The Erie is bound to maintain the rolling stock and equipments of the leased road in as good condition as they are at present. By its terms Erie pays the Atlantic and Gt. Western 28 per cent. of the net earnings the first year, 29 per cent. the second year, and 30 per cent. the third year. If, at the end of five years, it is found that the proportion has exceeded that figure, Erie is to divide the excess with the Atlantic and Great Western equally. The stock of the latter road amounts to about $50,000,000, of which about $46,000,000 has been issued, and the aggregated stock of the two companies will reach about $130,000,000. Erie is also to pay $800,000 for supplies and pay of employees now past due.

☞ The Hanover Branch (Mass.) Railroad has earned $94,192 95 the past year, an increase of $9,279 37 over the receipts of last year. The running expenses during the same time have been reduced $9,896, 67, but owing to the purchase of a new engine and car, the net profits are somewhat less than last year.

☞ Ground has been broken on the extension of the Southwest Pennsylvania Railway, on the west side of the Youghiogheny river. One hundred men are now at work.

ENVELOPES.

SAMUEL RAYNOR & CO.
115 & 117 William Street, N Y.

Manufacture every style of Envelope, from the smallest drug size to the largest Official Size, and of any pattern, shape, or quality, including White or Blue Cloth Lined, Parchment and Manilla paper. Railroads, Express Companies, Banks, Insurance Companies, Brokers, Merchants and others supplied with every style that may be wanted. Samples given when requested.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern

PERKINS, LIVINGSTON, POST & Co.,
59 Liberty Street,
NEW YORK.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, July 4, 1874.

Stock Exchange and Money Market.

Money has been in more demand, since our last, chiefly for speculative use at the Stock Exchange, where quite a brisk and buoyant movement has been reported, in nearly all the favorites of the Railway and miscellaneous share list, especially thus far in the current week. Call loans have been quoted at from 3@5, generally toward the close at 3@4 per cent to the leading borrowers. The best discounts have been rated at from 4½@6½ per cent per annum. Choice mercantile credits have been in favor with lenders. The City banks have been large gainers in the deposit and legal tender lines, while losing on their specie average, moderately, and enlarging their loan and discount aggregate quite liberally. The U. S. Sub Treasury added handsomely to its currency reserve, while largely reducing its specie board. On May 31, the balance on hand in the vaults of the Sub Treasury was $96,575,946 89. The receipts during the month of June were $45,481,329 20, making an aggregate of $142,057,276,09. Of the receipts there were on account of customs, $8,268,695 06; gold notes, $1,588,900; internal revenue, $183,222 98; transfers, $10,850,277; miscellaneous, $9,564,173; disbursing accounts, $8,189,381. The payments in June were $40,473,787 73, of which $28,482,066 were Treasury drafts, and $641,536,17 Post Office drafts. The balance at the close of business on Wednesday was $101,583,488 36, apportioned to the various accounts as follows: To credit of United States Treasurer, $90,036,530 30; to disbursing accounts, $7,254,906 22; to Assay Office, $4,254,906 22; in coin, $20,625. The increase in the receipts of Customs dues for the month of June, 1874, over June, 1873, is $353,682 62. The City banks, last week, while adding $1,084,600 to their reserve of legal tender notes, and $5,309,700 to their deposit item reported a reduction of $219,900 in their specie average, and an expansion of $2,724,000 in the loans and discounts, with a decrease of $141,000 in the circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $53,859,179 against $51,114,249 the preceding week; and a coin board of $46,195,929, against $50,250,042 on the previous return. The City bank exchanges, during the week, were $428,251,302, or a daily average of $71,375,250. The customs revenue of the port, during the week, was $1,536,416, of which $1,440,416 were in coin certificates. The City banks reported their average of gold last week at $19,714,300, and their greenback average at $62,923,200. Their deposits stood at $232,929,200. The loan item was about $281,719,500. The circulation was $26,511,300.

The cash balances of the Treasury Department on Monday were: Currency, $13,780,000; special deposits of legal tender for redemption of certificates of deposit, $60,320,000; coin, $80,715,000; including coin certificates, $29,800,000.

The outstanding amount of legal tender notes is now definitely established by law at 382 millions. The National bank circulation is under 350 millions.

Government received $102,865,577 from internal revenue, during the fiscal year, ending with June 30, 1874, which amount is in excess of the later Treasury estimates.

Gold has been moderately active, but easier in price, under a less confident speculative demand. Government will sell in July $5,000,000 gold; namely, $1,000,000 on each of the five Thursdays, beginning with Thursday of this week. The customs drain has been light, and the export movement, moderate. The extremes of the price have been 110½@111½, closing at 110¾, as against 111⅜ on Wednesday of the preceding week. The specie outflow, last week, was $1,020,311. The imports of specie at this port since Jan. 1, have been $2,384,826, against $1,814,187 same time last year. The customs demand for Gold last week averaged $280,167 a day. Foreign Exchange has been in fair demand at somewhat steadier prices. Bankers' sixty day bills on London closed on Wednesday at $4 87¾@$4 88½; sight bills on London at $4 90@$4 91 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $7,191,644.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,646,571, against $8,447,831 same week last year.

The interest and dividend disbursement at this

centre, on all accounts, public and corporate, as announced thus far, for July 1, will reach about 55 million dollars.

Government securities have been in good request at generally very well supported prices, considering the decline in Gold.

U. S. sixes of 1881 closed on Wednesday of this week at 117⅝@118; U. S. Five-Twenties of 1862, 113¾@114¼; U. S. Five-Twenties of 1864 at 116½@117; U. S. Five-Twenties of 1865, 117⅛@117¾; U. S. Five-Twenties of 1865 consolidated, 117⅛@117¼; U. S. Five-Twenties of 1867, 117⅛@117¼; U. S. Five-Twenties of 1868, 116¾@117¼; U. S. Ten-forties at 113⅝@114; U. S. Fives of 1881, (Funding Loan) 113¾@114; Six per cent. currency Sixes from 115¾@116.

The outstanding U. S. circulation of all kinds is $428,517,913.

State and Railway bonds have been in fair demand and generally quoted firmer. Railway and miscellaneous share property has been much more active, and prices have been quoted decidedly higher, though variable. The dealings make the most liberal aggregate of any week in several months.

General business has been comparatively brisk in the leading kinds of domestic produce, but at lower figures Breadstuffs, Provisions, Cotton and Petroleum closing in favor of buyers. Foreign merchandise has been also more active, with values showing steadiness in most instances. Metals have been exceptionally dull. Eglinton Pig Iron quoted at $34@$35. Glengarnock, $36 Coltness, $39; No. 1 American Pig at $31@$32. No. 2 do. at $29@$30; Forge, $26@$28; English Rails at $55 gold; American Rails at works, $56@$60; Old Rails, $36@$40 Wrought Scrap, $38@40. Ocean Freights have been fairly active, and at the close, generally firm as to rates; demand mostly from grain shippers.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The rails of the extension of the Cohasset and Duxbury Railroad, which is itself a continuation of that branch of the Old Colony Railroad known as the South Shore Railroad, were laid on the 20th ult., and a circle of railroad communication from Boston, via Hingham, Cohasset, Scituate, Duxbury, and Plymouth, via the Old Colony Railroad through Plymouth County, is now complete, and regular trains commenced running on the 22d.

Frankfort and Kokomo Railroad.

We have been favored with a visit from Cox Adams, Esq., President of this road, from whom we learn that the contractors finished laying the track from Frankfort, Ind., where it connects with the Logansport, Crawfordsville and Southwestern railroad, to Kokomo, Ind., where it intersects and crosses the Indianapolis, Peru and Chicago and Pittsburg, Cincinnati and St. Louis Railroads, at Kokomo Junction, on the 27th of May, a distance of 25½ miles. Since then over one-third of the distance has been ballasted, and it is expected that the whole road will be fully ballasted in the next thirty days. Construction, freight, and occasional excursion trains have been running daily, leaving Frankfort at 6 o'clock a. m., and Kokomo at 6.15 p. m., on arrival of trains from Indianapolis. Passenger trains will be put on in a few days in connection with the U. S. Express Co., which will run over this route. Large quantities of freight are waiting to be moved. The counties through which the road is built is the best timbered of any in the country, and the grain and hog products among the best in the state. The capital stock is $600,000; bonded debt $400,000, or $16,000 per mile of road. The bonds have twenty years to run from January 1, 1874, bear 7 per cent interest in gold, payable January and July. All of the bonds belong to the contractors. There is no floating debt on the road. The contractors are Messrs. Adams & Wells.

☞ The directors of the Burlington, Cedar Rapids and Minnesota Railroad company, recently elected, are: Henry Clews, Geo. Greene, Dr. John F. Ely, Gen'l Fitz Henry Warren, Wm. Greene, T. W. Barhydt, W. W. Walker, S. L. Down, D. W. C. Rowley, A. S. Belt, J. W. Traer, Jas. L. Bever, J. W. Barnes. The officers are: Hon. George Greene, President; William Greene Vice President; Dr. John F. Ely, Treasurer; H. B. Stibbs, Assistant Treasurer; D. W. C. Rowley, Secretary; William Greene, General Manager; W. W. Walker, General Superintendent; A. S. Belt, General Solicitor; J. W. Traer, General Agent.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending June 20, at 432,989 tons, and for the coal year 8,309,484 tons against 8,472,746 tons to corresponding time last year, being a decrease of 163,662 tons. The bituminous tonnage for the week is 75,892 tons, and for the year 1,410,886 tons, against 1,367,248 tons to same time last year, giving a total of all kinds for the week of 508,881 tons, and for the year of 9,719,970 tons, against 9,839,989 tons to same time last year, being a decrease of 120,019 tons.

☞ It is announced that the Pittsburg and Connellsville Railroad Company continues, as heretofore, unable to meet the interest falling due on their bonds. The coupons of the first mortgage, due July 1, will, however, be purchased by the Baltimore and Ohio Railroad Company on presentation at the Merchants' National Bank, Baltimore, as formerly.

☞ In the New York Central Railroad tax suits vs. the United States, Judge Wallace has directed that a verdict be rendered for the company on the ground that interest certificates are not taxable.

Pennsylvania Railroad.

A special meeting of the directors of this company was held in Philadelphia on the 29th ult., for the purpose of continuing the work of reorganizing the road. At a former meeting, held shortly after the death of J. Edgar Thomson, Col. Thomas A. Scott was elected president and George B. Roberts as first vice-president. At the above meeting the following elections took place:

Edmund Smith, Esq., to be second vice-president.

A. J. Cassatt, Esq., late general manager, to be third vice-president.

Frank Thomson, Esq., to be general manager, in place of Mr. Cassatt, promoted to the third vice-presidency.

John P. Green, Esq., to be assistant to the president, thus giving the chief executive of the company two assistants, instead of one as formerly. The other assistant is Strickland Kneas, Esq., for many years Chief Engineer and Surveyor of the city.

☞ The New York and Canada Railroad will reach Ticonderoga on the 1st of July, (distance twenty-five miles from Whitehall), and Rouse's Point next year. In November, 1875, through trains will run from Troy to Montreal twice a day. The road will run along the edge of Lake Champlain, connecting with all the villages along the route. The completion of the road, so that through trains can run from Troy to Montreal in eight hours, will double the business of the company and add largely to the trade and commerce of Troy.

☞ Three surveys of the Joliet and Northwestern railway have been made. The projectors of the road are now busy in negotiating for right of way between Aurora and Joliet. Considerable hope is entertained of being able to build on the middle route, which line runs directly to Plainfield from Aurora. The citizens of Plainfield promise to subscribe liberally in the event of the road passing through their town.

☞ The Richmond and Danville Railroad Company have commenced connecting with the Lynchburg and Danville railroad at Danville. Tickets are now sold passengers from Atlanta, Ga., to Baltimore via Danville, Lynchburg and Gordonsville. It is said double daily passenger trains will be put on the Lynchburg and Danville road immediately.

☞ The directors of the Columbus and Mineral Valley railroad have ordered that John Graham be employed to locate the proposed road from the Baltimore and Ohio railroad to Alum Creek.

☞ The Worcester and Nashua Railroad Company have completed the laying of their second track from Sterling Junction to Clinton, thus completing the double track from Worcestor to Clinton.

☞ Seven miles of the Peach Bottom Narrow Gauge Railroad was opened to passenger travel on the 30th ult., from York, Pa., to near Dallastown. The road is to run from York to Oxford, Pa., 60 miles, 50 of which are graded.

☞ The Northern Central Railroad Company has declared a dividend of 3½ per cent., payable July 31, free of tax. The transfer books will close on the 20th of July and open on the 31st, both days inclusive.

☞ The Directors of the Maine Central Railroad Company have ordered a dividend of 3 per cent. for six months ending July 1, 1874, on Maine Central scrip and on stock of the Portland and Kennebec Railroad Company, payable July 15th.

☞ The Illinois Central Railroad Company has declared a dividend of 4 per cent., payable August 1, to the holders of full paid shares registered prior to July 18th.

☞ The Atlantic and George's Creek Consolidated Coal Company has declared a dividend of 15 cents per share, payable on and after 20th inst.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

The Wisconsin Railway Law.

DECISION OF THE UNITED STATES CIRCUIT COURT.

In the United States Circuit Court, sitting at Madison, Wis., on the 4th instant—present Judges Davis, Drummond and Hopkins—the motion for an injunction to restrain the enforcement of the Wisconsin Railway Law was overruled for the following reasons given by Judge Drummond:

THE OPINION.

We have not had time to prepare any opinion in the case, but, as it was thought desirable that there should be a decision upon the motion for an injunction, I am instructed by the Court to present the following as its conclusions upon the points made for a preliminary injunction:

1. On the assumption that the act of the 11th of March, 1874, "relating to railroads, express, and telegraph companies in the State of Wisconsin" is invalid, we think the Court has jurisdiction of the case. The bill is filed on behalf of citizens of Europe and of other States, to enforce equitable rights, and to prevent action by the Railroad Commissioners which may result, as alleged, in serious injury to those rights. It was not necessary to wait until the Commissioners had put the law in full operation, and its effects upon the railroad company had become complete, before the application against them was made to a court of equity. A very important function of that court is to prevent threatened wrong to the rights of property.

We are of opinion that the act of 11th of March mentioned above was not repealed by the act of the 12th of March, 1874, the second section of which declares "all existing corporations within this State shall have and possess all the powers and privileges contained * * * in their respective charters;" and the act of the 12th of March, 1874, the ninth section of which imposes a penalty for extortionate charges. There are apparent inconsistencies between these last two named acts and that of the 11th of March; but it becomes a question of intendment on the part of the Legislature. On the same day a joint resolution was passed (March 12) directing the Secretary of State not to publish the act of the 11th of March until the 28th of April. In this State no general law is in force until after publication. We may consider the joint resolution in order to determine whether the Legislature intended that the two acts passed on the same day should repeal the act of the 11th of March, and from that it is manifest such was not the intention of the Legislature.

3. The charters of the railroad corporations under the Constitution of Wisconsin "may be altered or repealed by the Legislature at any time after their passage." In legal effect, therefore, there was incorporated in all the numerous grants under which the Northwestern Railway Company now claims its rights of franchise and property in this State, the foregoing condition contained in the Constitution. It became a part, by operation of law of every contract or mortgage made by the company, or by any of its numerous predecessors, under which it claims. The share and bondholders took their stock or their securities subject to this paramount condition, and of which they, in law, had notice. If the corporation, by making a contract or deed of trust on its property, could clothe its creditors with an absolute, unchangeable right, it would enable the corporation, by its own act, to abrogate one of the provisions of the fundamental law of the State.

4. This principle is not changed by authority from the Legislature of the State to a corporation to consolidate with a corporation in another State. The corporation of this State is still subject to the Constitution of Wisconsin, and there is no power anywhere to remove it beyond the reach of its authority.

5. As to the rates for the transit of persons and property exclusively within the limitation of this State, the Legislature had the right to alter the terms of the charter of the Northwestern Railway Company, and the fact that such alteration might affect the value of its property or franchises cannot touch the question of power in the Legislature. The repeal of its franchises would have well-nigh destroyed the value of its tangible property; and while the latter, as such, could not be taken, still its essential value for use on the railroad would be gone.

6. The fact that grants of land were made by Congress to the State cannot change the rights of the corporations or of the creditors. If the State has not performed the trust it must answer to the United States.

7. The act of the 11th of March, 1874, while not interfering with the rates of freight on property transported entirely through the State to and from other States, including within its terms property and persons transported on railroads from other States into Wisconsin, and from Wisconsin into other States. This act either establishes or authorizes the Railroad Commissioners to establish fixed rates of freight and fare on such persons and property. The case of "The State Freight Tax," reported in 15th Wallace, p. 232, decides that this last described traffic constitutes "commerce between the several States," and that the regulation thereof belongs exclusively to Congress. It becomes therefore, a very grave question whether it is competent for the State arbitrarily to fix certain rates for the transportation of persons and property of this inter-State commerce, as the right to lower rates implies also the right to raise them. There may be serious doubts whether this can be done. This point was not fully argued by the counsel, and scarcely at all by the counsel of the defendants; and, under the circumstances, we do not at present feel warranted, on this ground alone, to order the issue of an injunction. If desired by the plaintiffs, it may be further considered at a future time, either on demurrer to the bill, or in

such other form as may fairly present the question for our consideration.

The motion for an injunction is overruled.

The colloquy between the judges and counsel which immediately followed the delivery of the opinion of the Court, and in which Judge Davis bore the leading part, is said to have been the most interesting portion of the proceedings. Speaking as a friendly adviser of the parties, and not in his judicial capacity, he counseled them to forbear vexatious proceedings, and promptly do whatever is necessary to hasten the transfer of the case to the United States Supreme Court, where alone a binding decision can be had. Pending that appeal it is believed that no harrising action will be adopted towards the roads—the suggestions made by Judge Drummond, in which Judge Davis concurred, being construed by Attorney General Sloan as "giving the complainants all the moral effect of an injunction."

Cincinnati, Hamilton and Dayton Railroad.

The income of this company for the fiscal year ending March 31, 1874, was as follows:

From passengers	$299,412 33
" freight	574,847 03
" mails and express	24,793 64
" rents from other companies	190,600 00
" rents from real estate	6,450 28
" mileage of cars	47,484 66
" interest	26,586 78
" miscellaneous	1,873 54
	$1,171,998 26

Interest on bonds	$154,430 00	
Taxes	56,439 70	
		210,869 70
Leaving a balance of		$248,333 46
Add balance from previous year		669,650 65
Gain in operating Dayton and Michigan Railroad		43,298 69
Total, as in Balance Sheet		$961,282 80

The operating expenses have been 60.81 per cent of gross earnings. Number of passengers carried, 652,098. Number of tons of freight moved, 616,830. Number of miles run by trains earning revenue, 651,829. Earnings per mile of do., $1 79; expenses, $1 09. Income per mile of road, $19,533 80; expenses, $11,879 91. The President in his report says:

Notwithstanding the financial panic which occurred in September, 1873, by which the business of the country became stagnated, the company has earned in connection with the lines of road controlled by it, eight and three quarters per cent on its capital stock, which would have been distributed to the stockholders in the shape of half yearly dividends of four per cent each, in October, 1873, and April, 1874, had it not been for the purchase made by this company, of the Cincinnati and Indianapolis Junction Railroad in November, 1872, which has been re-organized and is now known as the Cincinnati, Hamilton and Indianapolis Railroad Company, the control of which we assumed on the first day of December, 1872, and since that date the expenditures incurred, for equipment, real estate, renewals, construction, and current expenses have exceeded the income, and estimated money value of the bonded debt some three hundred thousand dollars, and still the road requires considerable additional expenditures to raise it to a first class standard.

The principal items of expenditures during the year have been: at Brighton Station a new freight shed 40 by 175 feet, widening embankment at Stock Yards, depositing on same 7,200 yards of gravel, laying 3,682 feet of side tracks of both gauges, rebuilding of the wing walls of culvert at north end of the Stock Yards, laying 8,500 feet of new siding at Hamilton, of which 1,870 feet is of both gauges, this includes the grain transfer tracks which are so arranged that 23 cars of grain can be transferred at the same time from narrow to broad gauge cars without any movement of the cars, 1,542 tons of re-rolled iron and 199 tons of steel rails, and 20,660 cross ties have been laid on the C., H. and D. R. R.

New side tracks have been laid on the Cincinnati, Hamilton and Indianapolis Road, as follows: 396 feet at Hamilton, 673 feet at Woods, 370 feet at Ogleton, 1,585 feet at Cottage Grove, 1,028 feet at Connersville, 975 feet at Morristown, 1,166 feet at Griffins, 680 feet at Juliette, 920 feet at Irvington and 5,273 feet at Indianapolis. There were 874 tons of iron rail and 79,132 cross-ties placed on the Cincinnati, Hamilton and Indianapolis Railroad, besides 56 miles of track graveled and surfaced between Hamilton and Indianapolis; the bridges, water and station houses have been kept in repair, and new bridges have been erected; at Hamilton 686 feet long, deck bridge; at Collin's Run near Oxford, 135 feet; two spans of new bridge near Connersville, framed and ready to raise, besides a large amount of trestle work renewed between Hamilton and Indianapolis.

On the Cincinnati, Richmond and Chicago Railroad 100 tons of iron rail and 16,484 cross-ties have been laid.

On the Dayton and Michigan Railroad, 1,272 tons of iron rail and 54,448 cross-ties have been laid.

During the year there have been built at Lima shops, 29 platform cars at a cost of $16,159 09, one hundred box cars at a cost of $73,093 47 and six caboose cars at a cost of $5,776 67, for the Cincinnati, Hamilton and Indianapolis Railroad; a considerable number of cars have been repaired and rebuilt at the same shops for the several companies, to keep up the depreciation of stock which has been charged to the working expenses.

In the report for last year I called your attention to the useless expenditure of money in the continuance of the use of iron rails where such a large amount of traffic is being moved, and at such very low rates. I now urgently entreat you to adopt some financial basis which will in the future enable the managers of your property to use nothing but the best quality of steel rails.

During the year the trains have been run with their usual regularity and freedom from accident, with the two exceptions here mentioned: an accident on the Cincinnati, Hamilton and Dayton R. R., at Spring Grove Station on evening of January 1st, 1874, by which three persons were seriously, but not permanently hurt, and several slightly bruised; the claims in this case, were amicably arranged, and settled without litigation; an accident caused by a broken wheel near Brownsville on the Cincinnati, Hamilton and Indianapolis R. R., by which three persons were killed and quite a number badly injured; most of the claims in this case have been settled; there are several claims, however, arising from this accident that have not as yet been settled, and may have to be litigated.

The income from operations of the Dayton and Michigan Railroad during the year was $1,098,957 78; and the operating expenses were $685,952 74, taxes $86,615 74, interest on bonds $191,552 85, dividend on preferred stock $101,944, and dividend on common stock 34,593 76; trustees of bonds, $5,000—making a total of $1,055,659 09, and leaving for net earnings the sum of $43,298 69.

The income from operations of the Cincinnati, Richmond and Chicago Railroad was $218,176 32; and the operating expenses $151,292 59, taxes $2,827 22, interest on bonds $43,279 50, and trustees of bonds, $1,000—total $198,357 31, leaving the sum of $14,819 01 to credit of Cincinnati, Richmond and Chicago Railroad.

The gross income from operations of all the roads was $2,484,132 36; the operating expenses $1,550,040 48, taxes $95,882 66, interest on bonds $389,220 85, dividends D. & M. R. R., as above, $136,537 76, trustees of bonds, $6,000—total $2,177,681 20—leaving a balance of $306,451 16. The amount to credit surplus earnings Cincinnati, Hamilton and Dayton Railroad is $281,632 15.

The amount advanced to date on account of purchase of Cincinnati, Hamilton and Indianapolis Railroad, new equipment, construction, renewals, etc., has been $866,942 68.

CONDENSED BALANCE SHEET, March 31.

	1873.	1874.

President.—FREDERICK H. SHORT.

Vice President.—CHARLES W. WEST.

Directors.—F. H. Short, Charles W. West, L. B. Harrison, Oliver Perin, Sam'l Fosdick, Geo. T. Stedman, Henry D. Huntington, Henry Lewis, Joseph H. Rogers.

Secretary and Treasurer.—C. B. MARSH.

General Superintendent.—LEWIS WILLIAMS.

☞ The Mississippi Central and New Orleans and Jackson Railroads have been consolidated under the name of the New Orleans, St. Louis and Chicago Railroad Company. The issue of the consolidated stock is to be one for three of the Mississippi Central, and two for three of the New Orleans and Jackson. Col. H. S. McComb has been elected president of the consolidated company.

Proposals for the United States Five per Cent Loan.

The following is a copy of the circular issued on the 3d inst. by the Secretary of the Treasury inviting proposals for the balance of the new five per cent bonds, amounting to $179,000,000.

TREASURY DEPARTMENT,
WASHINGTON, D. C., July 2, 1874.

Sealed proposals will be received at the Treasury Department until 12 o'clock noon on the 23d instant, and opened immediately thereafter, for the whole balance of $179,000,000, or any part thereof, of the funded loan, bearing interest, payable quarter-yearly at the rate of five per cent per annum, principal and interest payable in coin and exempt from taxation, as authorized by the act of July 14, 1870, and the act amending the same approved January 20, 1871.

Each proposal must be accompanied by a deposit of United States bonds, matured coin coupons, coin, or United States gold certificates of the Assistant Treasurer at New York to the amount of two per cent. of each bid.

Deposits accompanying rejected bids will be returned to the bidders.

Deposits accompanying the bids that are accepted will be applied in payment of the bonds pro rata, as settlement shall be made in money or bonds. Parties whose bids are accepted will be allowed three months from date of subscription to make partial or final payments. Provided that any bonds delivered to them prior to said final payment shall be secured by collateral, either in coin, five-twenty bonds or matured coupons sufficient to cover principal with all interest accrued and which shall accrue on bonds so delivered to the expiration of the three months. Payment can be made in six per cent five twenty bonds, to be called in on the date of the acceptance of bids, which mature three months thereafter, or in coin or matured United States coin coupons.

The Department reserves the right to reject any of said proposals that are not deemed for the interest of the Government to accept.

The proposals should be marked "Sealed Proposals for Loan," and addressed to the Secretary of the Treasury, Washington, D. C.

B. H. BRISTOW,
Secretary of the Treasury.

The total loan under this issue approximates $500,000,000, of which the following bonds are already placed: registered, $178,472,450; coupon, $137,328,300; total, $315,800,750, leaving the $179,000,000 above offered.

The New York Central Railroad Tax.

DECISION IN FAVOR OF THE COMPANY.

The New York Central Railroad tax case, recently tried at the term of the United States Circuit Court held at Canandaigua, Judge Wallace presiding, has terminated in a verdict for the company to the amount of $594,002 89. The facts of the case are these: Dec. 19, 1868, the Directors of the New York Central Railroad Company passed a resolution authorizing the issue to the stockholders of certain interest certificates to the amount of eighty per cent. of the capital stock of the company—that being the percentage of former earnings expended in the construction and equipping of the road—these certificates being payable only out of the future earnings of the company. Collector Lathrop, of Albany, on the 3d of March, 1870, four months after the New York Central Railroad Company had been consolidated with the Hudson River Railroad Company, made an assessment against the New York Central Railroad Company of $1,151,800 on account of these certificates, and $1,000 in addition as a penalty for not making return. An appeal was taken to Gen. Pleasonton, then Commissioner of Internal Revenue, and he having obtained the opinion of the Solicitor of the department, decided that the tax must be paid. Subsequently, however, he appointed a commission to investigate the case, and by this a unanimous report was made that "the distribution of these certificates did not create a liability to tax, and therefore that the company is not liable to the assessment from which it has appealed." This report was made to Hon. J. W. Douglass, then the Commissioner of Internal Revenue, and he, too, disregarded the reports of the Solicitor and the commission, and insisted that the tax must be paid, but reduced the amount to $450,720, instead of $1,152,800 before demanded. The company refused to pay, and the Collector seized its rolling stock in West Albany, when the tax was paid under protest. The object of the suit just decided was to recover back the moneys so extorted from the company, and Judge Wallace directed the verdict for the plaintiff in the whole amount claimed, on the ground that the issuing of the certificates was not a dividend taxable under the law, because the certificates were not payable out of anything on hand capable of division, but out of future earnings which might never be realized, and out of those earnings only at the pleasure of the company, and because it was not possible to deduct the tax from them, and because they were not payable at any fixed time so that the 10th day of the month following that in which they became due could be ascertained, as well as for other reasons, the issuing of the certificates was not a dividend taxable under the section of the internal revenue law above referred to, and that the assessment made March 3, 1870, was illegal, and directed a verdict for the plaintiff for the amount claimed.

Wisconsin Stockholders' Rights.

[By E. WALKER, of Chicago.]

On the 26th day of May, 1874, the Attorney General of Wisconsin, at the request of the Governor, submitted an opinion upon the constitutionality of the Act of March 11, 1874, which he concludes as follows: "The conclusion reached, is, that said Chapter 273 is not obnoxious to any of the objections urged against it, and as such is entitled to obedience." In his argument, he assumes that the act in question is an attempt upon the part of the Legislature to amend the charter of all the railways of the State, and he directs attention to Sec. 1. Art. 11, of the Constitution of 1848, which reserves in the Legislature the power to alter or repeal all charters to corporations thereafter granted.

I am not aware that the corporations organized under the special or general laws, since the adoption of the present Constitution, have denied the power of the Legislature to modify or revoke the franchises heretofore granted, but fail to understand how the act is brought within the limitation of powers. The act referred to is entitled, "An act relating to railroads, express and telegraph companies in the State of Wisconsin." It does not attempt to alter or repeal any special charter or general law authorizing the organization of corporations; but assumes the power and the right under the Constitution to limit the charges of any such corporation, in the regular and lawful prosecution of its business, without regard to the time or method of its organization—whether organized under special charter or the general law, or whether since the adoption of the present Constitution, with its limitation of corporate grants, or incorporated by the act of the Territorial Legislature, in perpetuity, without reservation or qualification. Whether we look to the title or the body of the act, or both, we fail to find any evidence of intention on the part of the Legislature to "alter or amend" the special or general laws under which the corporations embraced in the act are organized; but must conclude that the law-making power of the State preferred to declare all railways within the State public highways—the corporate property, public property, and as such, that the people, through their representatives, had the right to fix and limit the charges for its public use. This theory, however, the Attorney General does not attempt to defend, but is compelled to consider the act of March 11, 1874, a limitation or qualification of the corporate franchises granted by the several acts of incorporation. He assumes this to be the correct interpretation of the act, and that the Legislature has the power to qualify or revoke all corporate privileges heretofore granted; but he does not attempt to define the extent or character of the privileges granted.

It has probably never occurred to him that there is a marked distinction between the right of enjoyment of corporate franchises or privileges, and of corporate property, that the former is not a right, but a mere privilege derived from the State, while the latter is held by a more secure tenure of title, beyond and above the control of State Assemblies, except in the exercise of the powers of police and taxation, and of its appropriation for public use (in which case compensation must be made) with the additional qualification that every citizen must so use and enjoy his own property as to do no unlawful injury to his neighbor. The authorities cited prove this, and nothing more—that it is competent and within the power of the Legislature to alter or repeal all general laws or special acts, authorizing the organization of corporations of a date subsequent to the adoption of the Constitution of 1848. It is scarcely necessary to deny this proposition, or that the Legislature has the power to revoke all privileges at pleasure, if within the above reservation. The Attorney General says that those who oppose the law of 1874, admit that while this power is reserved, it is "still subject to certain latent limitations, which it is the duty of the courts to recognize and protect. That among the latent limitations, one is to be found or created which prevents the Legislature from reducing the charges for transporting passengers or freight below a reasonable compensation." I do not know what position others have assumed, nor do I know that any one opposing the law has, by implication, admitted the power of the State, by legislative enactment, to fix the charges of transportation even should the rates so fixed be reasonable. I do not understand that this is one of the reserved powers, but, on the contrary, it is an usurpation of power, repugnant to the State as well the Federal Constitution.

It must be apparent that the State should not, and cannot, recall any more rights or privileges than it has granted. Whatever other rights the corporation has acquired are as inviolate as those of the natural citizen. The privileges granted by the acts of incorporation are not complicated, and are readily defined by the courts. They may be briefly stated as follows: Many individuals desire to associate together in a work requiring a large amount of capital, and they prefer to act and conduct such business in an artificial name—to purchase and hold property by that name—to issue certificates of stock to the owners of such property, according to the amount of capital each individual has invested in the enterprise. The sole object of those who invest their capital in such business is private gain or emolument.

The State grants this privilege, and this is the franchise of the corporation. It is simply a grant of authority from the State to its citizens, to conduct certain specified business by an artificial or corporate name. The State parts with none of its property, neither does it acquire any interest in the corporate property. By a general law the State grants to all its citizens the privilege of associating themselves together for the purpose of prosecuting any and every variety of business, with perhaps one or two exceptions, it may be for

agricultural, manufacturing, scientific and religious purposes, or for building and operating railroads. They are all private corporations, and the capital invested is private capital. The business of each is prosecuted for private gains and emolument, or in the interest of science or religion, and the Legislature has no more power to limit the amount of gains in one case than the other. Would the publishers of a newspaper owned and controlled by a joint stock company, submit to law fixing the price of its paper, or the amount of the company's income? Would the farmer whose land was an undivided part of the lands owned by an incorporated agricultural company quietly submit to a law that attempted to limit the price for such company's wheat to 50 cents per bushel, while another similar company could charge $1 per bushel? And would he, accepting the advice of his Governor and Attorney General acknowledge the validity of the law, and patiently wait until some future Legislature, uninfluenced by passion or prejudice, and with proper respect for the rights of property in the citizen, should repeal the law? Should he do so, he might avoid the imputed odium of resisting the so called law of the State, but bankruptcy and ruin would be the result of passive submission. By Sec. 1, Art. 11 of the Constitution, the State reserves the right to alter or repeal the privileges granted to any or all incorporations; but while it may recall the corporate franchises, the corporate property is private, and subject only to such laws as affect other classes of private property. It is vested not in the artificial corporation, but in the members thereof, and if the State denies them the privilege of longer prosecuting their business by corporate name, they are still the owners of the property as tenants in common, and may prosecute their business by some other than a corporate agency. The distinction between corporate powers and corporate property is not new to the courts or the profession. The former are derived from the State, and may be recalled—the latter is acquired by purchase, and the right to its enjoyment is a vested right. It is said that the State has imparted to railway incorporations some of its sovereignty—that it has invested them with the right of exercise of the power of eminent domain.

It is true the Constitution holds inviolate the right to possess and enjoy private property, reserving, however, the right to appropriate it, when the public interests would be promoted by so doing, and then full compensation must be made. Without a dissenting voice it is held that this power may be properly exercised in the construction of railways, not in the interest of the railway company, but of the public; theconsideration for this grant of power is the public benefit received, the consideration to the owner of the land taken is the compensation, which is its full value; the title then becomes vested in the company, and is thereafter its private and not public property. The State may resume its sovereignty in this respect—recall this delegated power—but can it interfere with the use of this property, lawfully acquired? Much less can it appropriate it or its proper income to public use, without compensation? The right of exercise of the power of eminent domain may be conferred upon an individual as well as a corporation. It has been done in England and in many of the States—as in Pennsylvania—to enable the owners of mineral lands to reach them across the lands of another. By the exercise of this power A appropriates the land of B, and is thereby enabled to bring his coals to market, and derives an income from his otherwise dormant capital; but does this grant to A give the State the right to fix the price of the product? To one living at a distance, and not personally acquainted with the "blighting and crushing influence" of these "giant corporations" upon the material interests of Wisconsin, it would seem that the State has already been paid a thousandfold for its generous and unselfish policy, in securing the investment within its borders of millions of capital, upon the just condition of requiring full payment of every property or other interest acquired, without seeking to appropriate (or, what is the same in effect, its legitimate and lawful income) to its own use.

I do not understand that a charter from the State is necessary in the construction of a railroad. An individual or a company may construct a railroad across the State from the Mississippi to Lake Michigan, and operate such a railroad as common carriers. Such property would be private property, and the State would have no more authority to fix the charge for such transportation than it has to regulate the charges of an omnibus company in Milwaukee. In case of Bank *vs.* Edgerton, 30 Ver. Rep., 182, the court held that "there is indeed nothing in the right of constructing and operating a railroad and taking charges for use which is necessarily of a corporate character, or which might not with perfect propriety belong to or be exercised by natural persons."

It does not appear that all the roads of Wisconsin have in their construction received assistance from the exercise of the power of eminent domain; if not, what have such companies received from the State, save the mere privilege of adopting an artificial name, and this certainly would give the State no control over the property of the company. I am personally acquainted with one incorporated company in this State that has acquired its entire right of way, 150 miles, by purchase, and the private capital of three men, with the proceeds of the bonds sold, has built and equipped the railroad—it is their joint property. Would the Attorney General hold that this property was of such a public character as to give the State the right to especially control its use and limit its income? If the title to a part of the real estate has been acquired under the law of eminent domain, full compensation has been made for the property so taken, and the title then vests in the stockholders, the same as if acquired by purchase. In Whiting *vs.* Sheboygan, etc., R. R, 25 Wis., p. 182, the court, speaking of railroads as private corporations, says: "The railroad with all its rolling stock, fixtures, and other property pertaining to it, is private property, owned, used and operated by the company for the exclusive benefit and advantage of the stockholders. This constitutes a private corporation in the fullest sense." * * * It is also so held in the following cases: Donnaher *vs.* State of Mississippi, 8 Smeads and M., 661; Trustees, etc., *vs.* Auburn and R. R. R., 3 Hill, 570; Ohio, etc., R. R. *vs.* Ridge, 5 Black., 78; Angell and Ames on Corporations, Chap. 1.

If then the property of all railroads is private property, it follows that the state cannot appropriate any part of it to public use without just compensation. The right of use and enjoyment of such property is also protected by the Constitution as fully as the possession and ownership. The right to earnings and profits of property is, when acquired, a vested right of estate and inherent in the ownership. These are vested rights, because they form part of the estate in property; and as to railroads, they were incident to and inhered in the property when purchased; constructed and operated under this provision of the law, precisely in the same manner as the farmer has the right to cultivate his fields for his own profit and gain. Such right of private property to use, and to make profit and gain, whether in railroad property or land, is the elementary root and principal value of all property; without it, it is the mere semblance of property, but a naked possession with the burden of taxation. To hold that private property is inviolate, and at the same time hold that depriving the owner of its rents and emoluments is no violation of the estate of the owner, is too inconsistent to require further comment. If this power to invade exists, it also exists to destroy; and the millions of private railroad property in Wisconsin are beyond the pale of constitutional protection, and may be invaded and directly confiscated at the discretion of a majority of the General Assembly.

The stockholders of the C., M. and St. P. R. R. Co. own, within the state, about $28,000,000 of property. Every dollar of this has been purchased or lawfully acquired with private capital, and their title to it is just as valid as the title of the farmer to his land—none of it has been derived from the State, and under your Constitution no part of this property, nor the gains or profits derived from its use, can be taken, except by due process of law. It is a monstrous proposition that this State can, by statutory enactment, appropriate to its own use this entire property, or any part of it, without making compensation to its owners.

Under the laws of Massachusetts, since 1831, all acts of incorporation are "at all times subject to amendment, alteration or repeal, at the pleasure of the Legislature;" yet the courts have uniformly held that this power has some limits. In Commonwealth *vs.* Essex Co., 13 Gray, p. 253, Chief Justice Shaw says: "It seems to us this power should have some limit, though it is difficult to define it. Perhaps the true rule is this: 'that where under power in a charter rights have been acquired and become vested, no amendment or alteration of the charter can take away the property or rights which have become vested under the legitimate exercise of the powers granted.'" In Commissioners, etc., *vs.* Holyoke, etc., 104 Mass., p. 451, it is held that the law does not reserve to the Legislature authority to so alter or amend a charter as to defeat or substantially impair the object of the grant, or any rights which have vested under it.

The same principle is recognized in Kentucky: "A reservation in a legislative charter of the power to alter, amend or repeal, does not imply the power to alter the vested rights, acquired by the corporators under the charter." Sage *vs.* Dillon, Ky. Court of Appeals, 15 B. Munroe, 340; Allen *vs.* McKun, 1 Sum., 277. In Miller *vs.* State, 15 Wall., 478, the same question was presented.

The case arose in the State of New York, and after judgment in the Supreme Court, went to the Federal Court on error, upon a question involving the constitutionality of an act of the Legislature. In New York there were the same constitutional reservations relative to incorporations as in Wisconsin. One of the Judges of the State Court, in defining the extent of such reserved powers, uses the following language: "The Legislature which creates the artificial body, must necessarily have power to prescribe the organs through which it shall act. But this is a different thing from arbitrarily taking possession of the corporation itself, and through it the property of the parties for whose benefit the corporation was created. They cannot be presumed to have anticipated that a charter giving them the privilege of managing their property for their own benefit in a certain way, could be transferred by this reserved power of amendment into a vehicle which should transfer from them to the State or its appointees, all control over property which they have invested in the corporate enterprise. To hold such a doctrine would be to place all property invested in corporate enterprises beyond the pale of the Federal Constitution. Such an act would approach nearer to one of confiscation than of legislation." Has the Legislature of Wisconsin attempted less than this? On page 498 Mr. Justice Clifford says: "Power to legislate, founded on such reservation in a charter to a private corporation, is certainly not without limit, and it may well be admitted that it cannot be exercised to take away or destroy rights acquired by virtue of such a charter, and which, by a legitimate use of the powers granted, have become vested in the corporation."

I have been able to find but one case holding that the State could, under such reserved power, repeal the charter, and use and enjoy the property and its income without compensation. It is so held in Erie & N. E. R. R. Co. *vs.* Casey, 26 Pennsylvania State Rep., 308. But the court only reaches this conclusion, after first holding that the railroad was a public highway, that the title of the property was vested in the State, and that the corporation could only hold possession and enjoy its income at the pleasure of the State. When such a franchise was revoked, the State

would resume possession. This decision was made in 1856, since when the Supreme Court of Pennsylvania has many times held that railways were private corporations, and the corporate property private and not public property. On page 308 the court says: "If the railroad itself was the private property of the stockholders, then it remains theirs, and they may use it without char ter, as other people use their own—run it on their own account—charge what tolls they please, without legislative hinderance." In 1856 this case affirmed the legality of a law similar to the act of March 1st, 1874, but if, considered in connection with the more recent and uniform authorities defining the character of corporate property, it is a strong and terse argument against the law.

And I apprehend, that before the courts of Wisconsin can sustain the law in question, they must, as the Supreme Court of Pennsylvania held a quarter of a century ago, hold, as the Legislature has enacted, that railways are public highways, their corporate property public instead of the private property of the stockholders, and that the State can reclaim her own at the pleasure of the people expressed by their Legislature. When such a decision has been reached, and this law sustained by the judiciary, the Legislature may then advance one step further and assume the control of all other property interests in the State, fix rates, tolls and charges, limit incomes, and by general law regulate and control the private interests of the citizens. We are constantly being told that the State may grant to an incorporated company an exclusive privilege of collecting tolls from a turnpike or ferry, and that the Legislature may at any time fix the rate or amount of tolls, and alter or repeal the charter at pleasure. In such cases the State has granted to the company or individual the use of public property; the highway and the river are the property of the State, and she has the undoubted right to control its use. The State has created a mere tenancy at will, and she can at any time fix or alter the terms of the tenancy, or recall the privilege altogether. But would any court hold that upon such revocation the State could take possession of anything more than her own? Would not the title of the boat and other property of the individual or corporation to whom such grant has been extended still vest in its owners as the private property of such owners? And what is to prevent the parties from still using such property for hire and receiving tolls for its use? They certainly cannot be denied this right by legislative enactment, though they may not as before enjoy an exclusive privilege.

But there is another objection to the act of 1874, in my opinion, equally fatal to its validity. It has not even the merit of uniformity. It imposes burdens upon one class of corporations not placed upon another of the same class. It grants to one privileges denied to another of the same class. It enacts that the Wis. Cen. R. R. Co. may so use and enjoy its property as to derive an income, while this right is denied the C., M. & St. P. R. R. Co. It is class legislation in all its naked ness and deformity, without even a shadow or color of equity. "A statute would not be constitutional which should proscribe a class or party for opinion's sake, or which should select particular individuals from a class or locality, and subject them to peculiar rules, or impose upon them special obligations or burdens, from which others in the same locality or class are exempt." Cooley's Constitutional Limitations, page 380. Page 392: "Mr. Locke has said of those who make the laws 'they are to govern by promulgated, established laws, not to be varied in particular cases; and this may be justly said to have become a maxim by which may be tested the authority and binding force of legislative enactments. * * * * But if the Legislature should undertake to provide that persons following some specified lawful trade or employment should not have capacity to make contracts, or to receive conveyances, or to build such houses as others were allowed to erect, or in any other way to make such use of their property as was permissible to others, it can scarcely be doubted that the act would transcend the due bounds of legislative power, even if it did not come in conflict with express constitutional provisions. The man or the class forbidden the acquisition or enjoyment of property in the manner permitted to the community at large would be deprived of liberty in particulars of primary importance to his or their 'pursuit of happiness.'"

In Walley's Heirs vs. Kenneydy, 2 Yerg., 554, it is said: "The rights of every individual must stand or fall by the same rule of law that governs every other member of the body politic, or land, under similar circumstances; and every partial or private law which directly proposes to destroy or affect individual rights, or does the same thing by affording remedies leading to similar consequences, is unconstitutional and void." Also Durham vs. Lewiston, 4 Greenl., 140; Holden vs. James, 11 Mass., 396; Piquet, Appellant, 5 Pick., 64; Budd vs. State, 3 Humph., 483.

From the foregoing and other authorities, it is apparent to me that we must necessarily reach the following conclusions:

That in all charters granted to railroad companies by the Territorial Legislature there are no reserved powers of repeal or amendment, and therefore the franchises cannot be revoked where property or other rights have become vested in the corporation.

That the power to alter or repeal all special or general laws of incorporation is reserved in the Legislature, by the Constitution of 1848, and applies to all such laws of a subsequent date, but that the exercise of such power is limited to the franchises or privileges granted by the State.

That the property of railroad companies, of every kind and description is private and not public, and that the right to own, use and enjoy it is not derived by special grant, or privilege from the State, but is an inherent right that follows the ownership of all property.

That the Legislature may recall the right to act as a corporation, but it can neither confiscate the property nor its value, its gains or income.

That railways, and railway property may be controlled and operated as such by the owners or stockholders, without possessing any special grants, privileges or franchises from the State; that such property being private, and the right to its use for profit and gain vested in the stockholders, the Legislature has not the power, under the Constitution, to either destroy or impair such rights.

The property itself may be taken by the State for public purposes, upon making compensation, but this power does not extend to the profits resulting from its use.

The law is also repugnant to the letter and spirit of the Constitution, inasmuch as it is not uniform in its application to persons or classes.

And finally that the act of 1874, does not in any manner affect the title of stockholders in railroad property, and so far as it attempts to limit or control its income, or prescribe arbitrary tariffs for its use, it is unconstitutional and void.

E. WALKER.

CHICAGO, June 8, 1874.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending June 27, at 397,799 tons, and for the coal year 8,710,884 tons against 8,949,344 tons to corresponding time last year, being a decrease of 238,460 tons. The bituminous tonnage for the week is 80,624 tons, and for the year 1,438,401 tons, against 1,444,399 tons to same time last year, giving a total of all kinds for the week of 478,423 tons, and for the year of 10,194,291 tons, against 10,393,743 tons to same time last year, being a decrease of 199,452 tons.

☞ The contractors for constructing the Corpus Christi and Rio Grand Railroad from Corpus Christi to Laredo arrived at the former place on the 6th inst., and the work will be commenced immediately.

Canadian Railways.

The Toronto Board of Trade is moving to secure the completion, as early as possible, of railroad communications between the present system of lines running from Lake Ontario northward and that branch of the Pacific Road which is to traverse the valley of the Ottawa and connect the eastern terminus of the main line with the Georgian Bay, probably at or near the mouth of the French River. Commenting upon this the Toronto *Globe* says:

While it was perfectly right and proper that every encouragement should be afforded to the Quebec companies to establish connection with Montreal, the merchants of Toronto and other ports on Lake Ontario owe it to themselves to leave no stone unturned to secure their share of the trade between Old Canada and the Northwest. This is perfectly legitimate rivalry—beneficial to the whole, and not merely to any one section of the country. The Government propose to grant a subsidy not exceeding $10,000 a mile to the lines that will fill up the gap between their present termini and the new road above referred to. The construction of a railway to be common to all the present existing or projected lines coming under the terms of the act would probably meet the wants of the country, and achieve the result desired at the least possible cost. There should be no difficulty in effecting a combination of the several companies for this purpose, the Government, before granting the subsidy, taking the necessary guarantees for securing reasonable rates, and the necessary public faculties for traffic. We hope the boards of trade representing the interests most directly affected will co-operate in furthering this national project by all means in their power.

☞ At a special meeting of the stockholders of the Nashua, Acton and Boston Railroad held at Graniteville on the 7th inst., it was voted to accept the recent acts of the Massachusetts and New Hampshire Legislatures authorizing the corporation to issue bonds to an amount not exceeding $500,000, and to mortgage the road to that amount. Peter B. Brigham of Boston, Charles H. Sargent of Graniteville and Joseph B. Clark of Manchester were appointed Trustees. The passage of this act and its acceptance by the stockholders gives confidence in the road to the public, and it is believed, will lead to its ultimate success.

☞ It has been decided to postpone the withdrawal of the postal cars from the Philadelphia, Wilmington and Baltimore Railroad until the 1st of August. In the meantime efforts are to be made to adjust the compensation on a basis satisfactory to the company, so that no further trouble will ensue. Other railways are complaining of the inadequate pay given for this service, and the dispute with this company is therefore one of extended interest, as this line is bearing the brunt of the railway controversy with the Postoffice Department.

☞ The Harrisburg Car Manufacturing Company has closed a contract with the New York Central Railroad Company for the manufacture of four hundred cars. A force of three hundred and fifty or four hundred men will be employed to do the work, and four or five cars will be turned out daily.

☞ It is stated that the iron for the Grand Junction Railway from Belleville (Ca.) to Campbellford has been purchased, and that work is being pushed forward on the section under contract.

RAILROAD EARNINGS—MONTHLY.

Whalebone, lbs	125,852	49,585
Petroleum, galls	61,848,131	61,585,641

☞ The engineers are now engaged in locating a railroad at Stranstown, Berks county, along the Northkill creek to Bernville, and then along the Tulpohocken to Reading, passing several miles north of Sinking Spring. One-third of the road has already been subscribed for.

☞ Operations on the new "Glendale Railroad," as it is called in accordance with the terms of the charter passed by the New York Legislature, have already been commenced. The survey is being prosecuted by Mr. Charles Fowler, under whose management the enterprise has been placed. The contemplated route is almost a straight line from the foot of North Thirteenth street, Williamsburg, to Glendale, the second station beyond Bushwick on the South Side Railroad, and avoids the inconvenient detour made by the latter road through the streets of the city to the foot of South Eighth street, thus saving nearly a mile in distance, besides securing a clear run by locomotive to the water's edge. It is proposed to run first class ferryboats to New York in direct connecting with the road.

Statement of the Public Debt of the United States July 1, 1874.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858	$260,000 00	$6,500 09

Western Pacific bonds, 1862-4	1,970,560 00	59,116 80
Sioux City and Pacific bonds, 1862-64	1,628,320 00	48,849 60
Totals	$64,623,512 00	$1,938,7 5 36

Interest paid by United States, $22,386,691 02; interest repaid by transportation of mails, &c., $5,252,036 38; balance of interest paid by United States, $17,134,655 24.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 30, 1874.

B. H. BRISTOW,
Secretary of the Treasury.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide-water from the commencement of navigation to the 30th June inclusive, during the years 1873 and 1874, was as follows:

	Flour, bbls.	Wheat, bushels.	Corn, bushels.	Barley. bushels.
1873	52,100	3,556,700	3,618,100	22,200
1874	17,900	8,618,000	4,190,000	74,100
	Dec. 34,200	In. 5,061,300	In. 671,900	In. 51,900

By reducing the wheat to flour the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase equal to 978,060 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of June, in the years indicated:

	1872.	1873.	1874.
Canal opened—	May 13.	May 15.	May 5.
Flour, bbls.	32,200	52,100	17,900
Wheat, bush.	1,682,800	3,556,700	8,618,000
Corn, bush.	1,516,600	3,618,700	4,190,000
Barley, bush	401,500	22,500	74,100
Rye, bush	203,100	293,100	174,400
Oats, bush.	1,561,200	810,400	996,200
Malt, bush.	254,700	222,200	214,900
Feed, lbs.	2,160,700	2,080,600	58,000

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, July 11, 1874.

Stock Exchange and Money Market

The Wall street markets have been more or less disturbed during the week by the recurrence of the national holiday; the circular of the Secretary of the Treasury, relative to the five per cent funding loan; the Wisconsin decision as against the Railways, and favorable—at least temporarily—to the adverse granger movement; and by other less important influences. Yet, Money has been quite easy throughout at from 2@4, generally 2½@3 per cent on call, and 4½@6½ per cent per annum in the discount form. The offerings of capital have been largely in excess of the wants of borrowers which have been less urgent, especially on speculative account. The City banks, last week, added largely to their deposit, and specie averages, and also augmented their loan and discount line. They increased their reserve of legal tender moderately, while reducing their item of circulation materially. The U. S. Sub Treasury also added handsomely to the currency reserve, while cutting down the specie balance, through the coin interest disbursements. The City banks, last week, while adding $737,000 to their reserve of legal tender notes, and $8,516,300 to their deposit item, reported a reduction of $2,220,000 in their specie average, and an expansion of $5,630,700 in the loans and discounts, with a decrease of $647,400 in the circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $54,952,139 against $53,359,179 the preceding week; and a coin board of $50,270,004, against $46,195,929 on the previous return. The City bank exchanges, during the week, were $426,-905,576, or a daily average of $85,381,115. The customs revenue of the port, during the week, was $1,517,386, of which $1,426,386 were in coin certificates. The City banks reported their average of gold last week at $21,934,300, and their greenback average at $63,660,500. Their deposits stood at $241,445,500. The loan item was about $287,422,200. The circulation was $25,863,900.

The cash balances of the Treasury Department on Wednesday were: Currency, $12,890,126; special deposits of legal tender for redemption of certificates of deposit, $59,370,000; coin, $71,-732,224; including coin certificates, $30,864,000.

The outstanding amount of legal tender notes is now definitely established by law at 382 millions. The National bank circulation is under 350 millions.

Gold has been unusually depressed during the week, in good part by the free coin interest disbursements, which have been marketed with promptness. The speculation has been mainly of a bearish temper. The customs and export drains have been moderate. The extremes of the price have been 109⅝@110¾ closing at 109⅞, as against 110¾ on Wednesday of the preceding week. The specie outflow, last week, was $534,-186. The imports of specie at this port since Jan. 1, have been $2,565,819, against $1,962,011 same time last year. The customs demand for Gold last week averaged $314,000 a day. Foreign Exchange has been in better supply and less demand at easier prices. Bankers' sixty day bills on London closed on Wednesday at $4 87⅛; sight bills on London at $4 89½@$4 90 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $7,387,186.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $5,107,430, against $4,112,009 same week last year.

Government securities have declined, in sympathy with the fall in Gold, on a moderately active business, mostly on investment account. The last public debt exhibit indicated a further liquidation of $2,180,197.

U. S. sixes of 1881 closed on Wednesday of this week at 116⅛@116¾; U. S. Five-Twenties of 1862, 112⅞@113¼; U. S. Five-Twenties of 1864 at 116@116½; U. S. Five-Twenties of 1865, 116⅛@117; U. S. Five-Twenties of 1865 consolidated, 115⅛@115¾; U. S. Five Twenties of 1867, 116⅜@116⅛; U. S. Five-Twenties of 1868, 116@116¼; U. S. Ten-forties at 112¾@113¼; U. S. Fives of 1881, (Funding Loan) 113@113¼; Six per cent. currency Sixes from 115⅛@115¾.

State and Railway bonds have been in less demand and less firm in price. Railway and miscellaneous share property has been less confidently

dealt in, and values have been depressed and irregular toward the close.

General business has been moderately active in the line of domestic produce, but quoted lower in most instances. Foreign merchandise has been held with a fair show of firmness, on a moderate inquiry for the leading articles. Metals have been rather more freely dealt in, but in the main, at easier rates. Eglinton Pig Iron quoted at $33@$34. Glengarnock, $35, Sumerlee, $36; No. 1 American Pig at $31@$32. No. 2 do. at $29@$30; Forge, $26@$28; English Rails at $50@$52. gold; American Rails at works, $56@$60; Old Rails, $36@$40 Wrought Scrap, $38@40. Ocean Freights have been less active, and at the close, generally weaker as to rates; demand mostly from grain shippers.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Injunction Suit in Wisconsin.

We give elsewhere the decision of the U. S. Circuit Court delivered by Judge Drummond at Madison, Wis., on the 4th inst., denying a motion for an injuction to restrain the enforcement of an act passed by the last Legislature of Wisconsin reducing the tariff of charges on freight and passengers. The suit was originally instituted by William Frederick Pick, Henry R. Pierson, Moses Taylor, and the Farmers' Loan and Trust Company, Bond and Stockholders of the Chicago and Northwestern Railway Company, against the Chicago and Northwestern Railway Company, the Wisconsin Railway Commissioners, George H. Paul, Joseph H. Osborn, and John W. Hoyt, and Attorney General Sloan, for an injunction to restrain the railway company from complying with the Potter act and State authorities from enforcing it. In their prayer to the court the petitioners set forth:

1. That the company, under authority of law, had fixed rates of toll for persons and property deemed just, which rates were made in good faith, and that since May, 1867, a reduction of such rates of toll has been made of twenty per cent on passenger rates and thirty-one per cent on freight rates.

2. That the revenues of the company from all sources, under the rates of toll fixed by it, have never been sufficient to pay the necessary expense of maintaining the road and its equipment in a proper state of repair and efficiency, and to pay interest upon bonds given for money actually invested in construction, and pay a dividend upon money actually invested in the capital stock.

3. That the average amount of dividends paid by said company since June, 1864, either in money or stock, was the rate of 6.67 per cent on preferred stock, which stock amounts to $21,484,113, and 3.75 per cent on common stock, amounting to $14,998,060. That no dividend at all, either in money or stock, has been made upon its common stock since December, 1872, when the dividend was 3½ per cent, and no dividend on the preferred stock has been made since June, 1873, when the dividend was 3½ per cent.

4. That the total cost of the railroads of the company is $65,090,805. The total earnings for 1873 were $13,816,464. Of these earnings at least 70 per cent are required to pay the operating expenses of railways, leaving $4,144,938 applicable to other purposes. The total debt is $29,641,500. The cost of road over and above amount of debt is $35,449,300. The total cost of the whole system of railroads owned by the Chicago and Northwestern Company is stated at $81,356,833. The total earnings of all the roads operated by the Northwestern for 1873 were $14,955,033. Deducting seventy per cent for operating expenses, leaves

$4,486,510 applicable to payments of rents upon leased roads, interest, and dividends. The interest paid during 1873 upon bonds of the company was $3,004,782, of which $1,335,635 was in gold. The sum left for dividends to stockholders, and repairing the road and completing equipment, and paying rents, was $1,481,728. The amount paid for rents in 1873 was $928,423, leaving but $553,305 applicable to dividends.

In the argument before the court the counsel for the petitioners urged that the rates fixed by the Legislature of Wisconsin by the act of March, 1874, will reduce the revenues twenty-five per cent, which would be taken from the net earnings of the company. The result produced might be thus stated:

Gross earnings, 1873	$14,955,033
Reduction, twenty-five per cent	3,738,758
Gross earnings under the law	$11,216,275
Deduct operating expenses	10,468,523
Net earnings under the law	$747,752

The debt of the company is $44,303,500, and the annual interest thereon is $3,004,783. The law of Wisconsin would leave only $747,752 of the earnings of the company with which to pay that interest, and nothing for dividends.

☞ The credit of the District of Columbia is very much improved under the recent legislation of Congress. In the quotations of its funded debt there has been an appreciation of 10 to 15 per cent. on all classes within the past three weeks. The payment of the July interest on the bonded debt, though the money was advanced temporarily by a New York bank, put the price of the four million loan held in Germany back from 77, to which it had dropped on the Frankfort Bourse, under the influence of the investigation, to par in gold. Fortunately, by one circumstance or other, the District of Columbia has never yet defaulted on the payment of interest on the debt. The new funding bonds are to be placed on the regular list of securities in the New York Stock Exchange.

☞ In the United States District Court at Madison, Wisconsin, on the 8th inst., in the case of the bondholders of the Chicago and Northwestern Railroad against the Railroad Commissioners, by agreement of counsel, the bill, on which an injunction was applied for and denied, was demurred to by the counsel for the defendants. The demurrer was sustained and the bill dismissed. Thereupon complainants appealed to the Supreme Court of the United States where the whole question will be argued.

Messrs. Sloan and Dixon, attorneys for the State, have applied to the Supreme Court of Wisconsin for an injunction to restrain the Chicago, Milwaukee and St. Paul and the Chicago and Northwestern Railroads from disobeying the Railroad law. They gave notice that they would apply for a hearing on the 14th inst.

☞ The Schuylkill Navigation Company announces a dividend of sixty cents per share on the preferred stock and thirty cents per share on the common stock of the company, payable in scrip, on the 27th inst. The said scrip will be convertible into the six per cent mortgage loans of the company of 1872-1897 on the 3d day of September, 1874, in sums of one hundred dollars and upwards.

Illinois Central Railroad.

The statement of this Company for the month of June, 1874, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	1,122.70	for	$9,201 36
Acres Interest Fund Lands Sold	.....	for	.....
Acres Free Lands Sold	120.00	for	1,480 00
Total sales during the m'th of June, 1874	1 242.70	for	$10,681 36
To which add Town Lot Sales	.....	for	....
Total of all	1,242.70	for	$10,681 36
Cash collected in June, 1874			$35,011 87

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$361,802 00	$77,389 00	$439,191 00
Passengers	102,508 10	41,234 00	143 742 10
Mails	9,072 08	3,059 33	12,131 41
Other sources	81,427 92	2,235 67	83,663 59
Tot'l June '74.	$554,810 10	$123,918 00	$678,728 10
Total actual earn'gs, June, 1873	$607,498 27	$135,101 31	$742,599 58

☞ The Philadelphia *Ledger* of the 8th inst., says: "We learn by a letter from one of our largest iron workers, received here by an officer connected with one of our principal railway companies, that more orders had been received for iron within the last ten days than in all the six weeks previously. We have heard of similar revivals in various directions, and from these manifestations marked encouragement is felt of an early revival and an active fall business, especially in iron, a d if in iron necessarily in coal, and if in both coal and iron, then, as a consequence, in transportation, for which the railway companies are anxiously waiting."

☞ The earnings of the Central Pacific Railroad Company for the month of June, 1874, were $1,380,000 against $1,301,200 for the corresponding period in 1873, and $1,138,272 in 1872. The earnings for the first six months in 1874 were $6,407,026; in 1873, $6,325,408, and in 1872, $5,508,616.

☞ The earnings of the Erie Railway for the week ending June 23, 1874, were $414,712, against $466,198, for the corresponding week in 1873, a decrease of $51,486. From January 1, to June 23, 1874, the earnings were $8,548,670, against $9,127,209 for the corresponding time in 1873, a decrease of $575,589.

☞ The Alabama and Chattanooga Railroad was offered for sale by the Commissioners at Mobile, on the 6th inst. The only bid was $3,000,000. That being less than the minimum price fixed by the Court, the sale was adjourned till the first Monday in October.

☞ Colonel W. R. Authur has been appointed General Superintendent of the St. Louis, Kansas City and Northern Railroad, vice W. C. Vanhorne, resigned.

☞ The George's Creek Coal and Iron Co., Baltimore, has declared a dividend of $6 per share, payable on and after the 14th inst., free of all taxes.

☞ The exports from Philadelphia during the past year amounted to $33,098,905, of which $23,247,687, were in foreign vessels, and $9,851,268 in American vessels. The exports include 87,951,454 gallons of petroleum; nearly 6,000,000 bushels of grain, cheese 1,390,622 pounds; oil cake 20,000,000 pounds. Clearances of vessels 1,222, including 481 American.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties; and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Robt Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, July 18, 1874.

The Journal and its Investing Readers.

Within the past six or eight months, covering the period of paralysis of our trade and manufactures consequent upon the financial revulsion of 1873, we have received several letters from subscribers and others, many of them asking for information in regard to this or that railroad undertaking; others asking advice in regard to their disposition of various railroad securities; and still others offering advice and even censure for not warning our readers against one or the other unfortunate speculation. To the first class we have cheerfully replied with such authenticated information as could be had by diligent enquiry. It is proper, however, to say that the JOURNAL aims to state, and we think very fully does, the condition of nearly all the railroad and transportation enterprises as fully and as freshly as its pages will allow. Especial care is taken to keep our tables of financial condition, revenues, expenses, equipment, etc., as full and accurate as can be. We do not, however, choose to insert every stock-jobbing canard or street rumor in regard to transportation or financial companies, many of which are made to appear first in the daily newspapers for selfish purposes. Indeed that is one of the chief labors of the JOURNAL office, to discriminate and sift the facts from the mass of floating falsehoods and guesswork. Our readers will bear witness to the fidelity with which we reprint the essential parts of official reports of all the leading railroad corporations from the best sources; the proprietor being specially guarded against taking facts or figures at second-hand, or from irresponsible printed sources.

To the second class, who seek our opinions on matters of investment, or of disposition of their property, we may say that where we have any conscientious expressions of dissent or distrust to make, we prefer they should be made personally, or at least in the privacy of direct correspondence. We shall be glad to furnish our readers such facts in regard to the standing or resources of borrowing corporations as we can obtain, together with such impressions as reasonable scrutiny may warrant. These, however, we cannot in all cases consent to print in the JOURNAL, for reasons herein stated.

To those gentlemen, and especially those residing in Great Britain and on the Continent, whose letters imply, rather than distinctly state, that they have been led to make investments on the negative ground that they saw no warning in our pages against their particular speculation, we may remark that the role they would ask us to play is one very difficult to fill; one which has its grave perils and penalties to be encountered; and one for which (if it were otherwise possible) we should be but poorly rewarded. For example, one excellent Reverend gentleman in Ireland says: "I hold it to be your duty as an honest journalist, rather to warn your subscribers against such swindling schemes." * * * "I have, like many others, been a subscriber for a long time, and have a right to expect you would give correct information so as to keep me from being robbed by unprincipled speculators." With every sympathy for this correspondent's apparent losses, (which, by the way, are not irretrievable) we submit if he will but try to put himself, in imagination, in our place, he will see how unreasonable, as well as futile, are his complaints. To discover and trace all the visionary, dishonest or ill-timed schemes of borrowers in the United States, (and this country is only for the moment a conspicuous example) would require more energy than the combined newspaper, legal and judiciary departments of the country possess; besides calling for a perspicuity and knowledge of inner motives belonging only to Omniscience. If it were within human ability, however, it is not allowable to say what we may think or suspect in regard to our neighbor's purposes, or to decry his property. There is a statute of this State, (and being founded on common sense and equity, we presume it belongs to the legislation of most older communities also) forbidding one from depreciating the property of another; and there is another statute against impinging his motives. Like the courts and the law officers, we cannot take things for granted, but must sometimes wait for the overt act, or the examination judicial or otherwise.

While we are thus limited, on the one hand, we are nevertheless left at liberty to exercise a wide discretion in the publication of facts and rumors which have currency. We think a reader of the JOURNAL who kept his mind open to what was *not* said, as well as to what was said in the past, would have no difficulty in steering clear of some of the worst of our unfortunate ventures. It so happens that the very statements cited by this correspondent are facts which his own testimony bears out, viz: that "bonds of the A— and B— Railroad are selling fast, it is reported only such an amount is left, etc." These were simple facts of the time in our financial history which properly belonged to our readers. If the panic had not occurred, or if the enterprise had been better managed, our friend might now have been rejoicing at his good luck in his selection of investments —but would he then have written his acknowledgements to us? As before said, even in the greatest rush of our prosperity, and in the fiercest competition among our industrial interests for capital, this JOURNAL was always conservative in its praises of promoters and their undertakings.

In conclusion, we may say to our foreign correspondents that they should make allowance for the difference in times between then and now. A year ago many enterprises which now look hapless and bottomless enough, appeared to be compara-

tively sound then. The movement of money was so much more rapid then; there was such loose rein given to credit by individuals, and by the more conservative corporations, that it all looks wonderful now, while it seemed natural enough then. The JOURNAL is expected to be wiser than its generation. Some of the securities which are now depressed, because they have been created and thrown on the market faster than the spare earnings of the people could absorb them, will gradually be taken up at higher prices. When the industry of the country produces the wealth to carry these new made securities, we shall repeat the reaction of 1837, and stocks which seem valueless now will yet be among the best the world affords. Instead, therefore, of being the occasion for withdrawing European capital out of American investments, we may say, in general terms, that it would be far wiser to take more and more of the best of our temporarily crippled undertakings while they may be had at such low rates. Selection is the all important requirement.

Sale of the Vermont and Canada Railroad to the Central Vermont R. R. Co.

The stockholders of the Vermont and Canada Railroad company held a meeting at Bellows Falls, Vt., on the 8th inst., and voted, after a lengthy discussion—68 to 11—to sell their road to the Central Vermont Railroad company for $3,000,000, payable in bonds having thirty years to run, with interest at the rate of six per cent per annum. The following is a copy of the agreement:

Memorandum of contract, by and between the Vermont and Canada Railroad of the first part, and the Central Vermont Railroad Company of the second part, witnesseth:—

The party of the second part hereby agree to purchase of the party of the first part the Vermont and Canada Railroad, with all its privileges and appurtenances, together with the assets, rights of action and property of every description of the party of the first part, including the assignment of their demand for rent in arrear under their lease and supplemental contract to the Vermont Central Railroad Company, but not including the lease itself and all overdue rents, for the sum of three million dollars, payable in the bonds of the Central Vermont Railroad Company, with coupons attached, having thirty years to run from the first day of June, A. D. 1874; interest to commence on the first day of September, A. D. 1874, at the rate of six per cent., payable semi-annually, secured by mortgage with the usual covenant, (to Bradley Barlow, Lemuel Shaw and Samuel Wells, as Trustees,) of the Vermont and Canada Railroad and its appurtenances as now constructed and operated, and limited in the remedies thereon to a foreclosure of said railroad, with its appurtenances. Said bonds to be redeemable in cash at any time, at the option of the Central Vermont Railroad Company, at par and accrued interest; and in addition to said bonds to pay the Vermont and Canada Railroad Company their proper incidental expenses agreeably to the provisions of their lease, to an amount not exceeding twenty thousand dollars; and in event that the Central Vermont Railroad Company shall avail themselves of their option to redeem said bonds as aforesaid, and shall give ninety days' notice thereof in not less than two public papers in Boston and Vermont and New York city, the interest shall, from and after the expiration of said ninety days, cease.

And it is further agreed, that the party of the second part shall indemnify the party of the first part against their liability on the Ogdensburg lease, and their guaranty upon one million of bonds, known as the Vermont Central guaranteed bonds, and all other presently existing liabilities of the party of the first part.

In case there shall at any time be default in payment of the interest coupons as they mature, and the same shall remain in default and unpaid for the space of six months, then and in that event the whole principal of said mortgage shall, after the expiration of said six months, become and shall be considered due and payable.

The party of the first part hereby assent to the sale of their railroad, assets, rights of action, and property of every description, including the assignment of their demand for overdue rents as aforesaid, on the terms aforesaid, and agree to execute a good and sufficient deed of said property to the party of the second party.

And it is further agreed that the reasonable expenses of said trustees in signing said bonds shall be paid by the party of the second part, not exceeding three hundred dollars.

Deed and mortgage and other papers to be drawn by and be mutually satisfactory to the counsel of the respective companies.

And it is further agreed that the stock of the said Vermont and Canada Railroad Company, so far as exchanged by the said Vermont and Canada Railroad Company for the bonds of the Central Vermont Railroad Company, shall be surrendered to the said Vermont and Canada Railroad Company, to be by them placed in trust for the Central Vermont Railroad Company. And the said Vermont and Canada Railroad Company shall execute to the said Central Vermont Railroad Company a full and ample power of attorney, irrevocable, to use the name of the said Vermont and Canada Railroad Company in any manner which may be necessary to enforce the said claim for back rents, or for any other purpose which the said Central Vermont Railroad Company may deem necessary, not detrimental to the interests of the said Vermont and Canada Railroad Company, or the said bonds here provided for. And when the present outstanding securities of the Vermont Central Railroad Company, and of the trustees and managers, shall be retired or consolidated or otherwise arranged with, so as to become merged into a corporation under the charter of the Central Vermont Railroad Company, then the lease of the Vermont and Canada Railroad Company shall be cancelled and determined, and the said stock of the Vermont and Canada Railroad Company shall be cancelled.

It, however, it shall appear to the Vermont and Canada Railroad Company, or its legal advisers, that the title under the mortgage from the Central Vermont Railroad Company would be liable to be defeated by reason of the old lease remaining outstanding, then the said Vermont and Canada Railroad Company shall not be bound to convey its railroad, or to receive back said mortgage until said outstanding lease shall have been first cancelled; but the said Central Vermont Railroad Company shall hold possession of the Vermont and Canada Railroad as lessees thereof, at the rate of six per cent. per annum upon its capital stock, payable at the same times and in the same amounts as the coupons herein above described, until the title can be perfected, when they shall have the right to purchase on the terms above described.

In testimony whereof, the respective parties to this instrument have signed the same by their respective presidents, thereunto duly authorized at Boston, in the State of Massachusetts, this 5th day of June, A. D. 1874.

Vermont and Canada Railroad Company, by
F. A. BROOKS, President.
Central Vermont Railroad Company, by
J. GREGORY SMITH, President.
Witness—GEORGE T. CHILDS.

At a meeting of the stockholders of the Central Vermont Railroad company, held at the same time and place, the agreement was ratified on the part of that corporation without a dissenting voice.

North Eastern (S. C.) Railroad.

The earnings of this road for the years ending February 28, 1873 and 1874, were as follows:

	1873.	1874.
From passengers	$121,684 73	$116,624 01
" freight	255,348 01	270,616 39
" express	5,480 32	2,997 11
" mails	12,999 96	13,718 66
	$395,463 02	$403,851 17
Expenses, viz:		
Maintenance of road	$54,277 52	$107,316 35
Motive power	85,876 84	53,611 08
Repairs of cars	30,578 70	22,208 01
Transportation	52,514 79	62,203 06
Salaries & general exp.	12,447 81	13,296 90
	$235,695 16	$258,635 40
Net earnings	$159,767 86	$145,215 77

Compared with the previous year, the gross earnings of 1874 show an increase of $8,388 15, with an increase in expenses of $22,940 24, making a decrease in net earnings of $14,552 09. The following extraordinary expenses have also been incurred:

State and city taxes, 1868 to 1872, inclusive	$75 408 10
Rebuilding office and freight depot	14,166 68
Ten new freight cars	7,630 49
Claim during the war settled	1,350 00
Legal expenses	2,658 70
Total	$101,213 97

From tabular statements which accompany the report we learn that there were transported over the road during the past season 56,976 bales of cotton, 108,718 barrels naval stores, and 5,457,000 feet of lumber, as against 39,349 bales of cotton, 112,445 barrels of naval stores, and 4,692,000 feet of lumber the previous season. The diminution of passenger earnings is attributed to the general financial disturbance of last autumn; while the increase in freight earnings is due to the close connections established between this and adjoining roads, by which it has been enabled to compete, successfully, with other routes, for the business of Charlotte, N. C., and its vicinity, in one direction, and that of Cincinnati and the northwest in another.

During the year 555 tons of new 56 lb. rails, with fish plate fastenings, 40,492 crossties, and 1,034,000 feet of timber have been used, against 275 tons rails, 27,896 crossties and 540,000 feet of timber the previous year. The superintendent calls attention to the fact that at least 500 tons of new rails will be required to meet the current repair of the track.

The statement of the treasurer shows that the amount at credit of profit and loss February 28, 1873, was $53,378.91; and since added, $13.47; which, together with the net proceeds of transportation, as above, $145,215.77, gives the total amount at credit of profit and loss at the close of the year, $198,608.15. Against which are charged: interest on bonds and other obligations of the company, $96,833.01; current interest, $11,135.20; extraordinary expenses $101,213.97—making a total of $209,182.18, and leaving a balance at debit of profit and loss February 28, 1874, of $10,574.03.

The indebtedness of the company, as given in the annexed statement of the treasurer, amounts to $2,276,276.56; to meet which the company have the road, 102 miles long, with its sidings,

equipments, etc., at a cost of $2,148,130.65, and assets amounting to $117,571.88—making a total of $2,265,702.53, leaving the balance of $10,574.03, as stated above, at debit of profit and loss. The president in his report says:

The entire issue of our new first and second mortgage bonds are, respectively, for $840,000 and $322,000. There are still outstanding and awaiting redemption, $8,500 of the old second mortgage bonds—to redeem which, when presented, we have on hand, a corresponding amount in new bonds. Having placed the former among our obligations, the latter are necessarily included among our assets. With reference to the preferred stock, it is proper to repeat to you, that, when issued, it was resolved to secure it, by a corresponding amount of second mortgage bonds, to be lodged in the hands of trustees; hence, it is not a distinct liability, but rather a substitute for, or representative of an equal amount of second mortgage bonds. As both bear the same rate of interest, the conversion of one into the other, has been consented to, at the option of their respective holders—some parties desiring the preferred stock, because of its being registered, and transferable only on the company's books; while others prefer the bonds, for the greater convenience which they afford in the collection of interest, facilities of transfer, etc. The amount of either may thus be varied, but the aggregate of both, will always be separated by the sum of $322,000.

The road and its structures are generally in good condition. About six miles of new rails have been laid continuously, with improved fastenings, and such of the old rails as were still serviceable, have been substituted throughout the track, for those which required removal.

The motive power of the road consists of 14 locomotives—all in running order. We have 14 first and second class passenger cars, 5 mail and baggage cars, 83 box, and 54 platform cars. The greater number of our locomotives are, of an advanced age, and of light capacity, requiring constant attention and expenditure, to keep them in their present effective condition.

If our anticipations of an increased business the ensuing Fall are to be realized, we may find them inadequate to our requirements. The above equipment is also insufficient for our purposes, and should be increased, that we may avoid, as far as practicable, the use of foreign cars, and the mileage, ordinarily charged upon them.

The past has been an eventful year with us. By a decision of the Supreme Court of the United States, in March last, the company's property was held to have been liable to taxation, by the State and City authorities from the year 1868, and, by this decision, we have been required to provide the sum of $75,408 10, in liquidation of the amounts, annually charged against us, from 1868 to 1872, inclusive.

On the 16th of October last, the company's office and freight depot was suddenly prostrated by a violent clyclone or tornado, causing the death of four of our employees, and serious injuries to others. The building referred to, had been erected at the close of the war, by some of our most experienced mechanics, and nothing had ever occurred to excite the slightest apprehensions, as to its strength and safety. It has since been reconstructed at a cost of $14,166 68. These have been very serious drawbacks to us, financially, and will at once explain the present floating debt of the company, say $89,847 96.

The slowly but steadily increasing business of the company in the past, is in itself a good foundation, upon which to build our hopes, as to the future. But these receive a further assurance, from the intimate relations now existing between this road at its terminus, with the Wilmington, Columbia and Augusta road, and its extended connections, by which new and hitherto inaccessible fields of business, are being opened to us. A complete system of through freight rates, with all the appliances for its satisfactory execution, has recently been established, under, as it were, one controlling interest, which should, eventually, promote that of the separate roads thus linked together in one line, and, at the same time, give to our community the benefits of increased facilities, and competition with other routes.

The advantages of a close rail connection with the Savannah and Charleston road, have been too frequently brought to your notice, to require further comment here. Suffice it to say, that the subject is now having the earnest attention of the direction of that road, and we trust that, ere long, measures will be devised, for supplying this important connection.

BALANCE SHEET, FEBRUARY 28, 1874.

Construction, equipment, right of way, etc		$2,148,130 65
Investment in 83 second lien and 2 first lien eight per cent. bonds of the Northeastern R. R. Co		40,550 00
24 new first lien bonds on hand		12,000 00
7 second lien bonds on hand for the redemption of the same number of old 7 per cent. second lien bonds, still outstanding		8,500 00
Cash		20,012 54
Bills receivable		7,980 31
Stock in Cheraw and Salisbury R. R. Co		4,064 00
Stock in South Carolina Central R. R. Co		3 857 94
Stock in Cheraw Bridge Co		112 52
Stock in Cheraw and Darlington R. R. Co		100 00
Real estate		19,191 92
Post Office dues		1,982 19
Southern Express Co. dues		178 39
Balance of open accounts due the company		4,092 07
Balance at debit of profit and loss February 28, 1874		10,574 03
		$2,276,276 56
Capital Stock		$899,350 00
Issue of 1,640 first lien eight per cent bonds of $500 each, payable Sept. 1, 1899		820,000 00
Issue of 644 second lien eight per cent bonds of $500 each, payable Sept. 1, 1899	$322,000 00	
Of which 194 are held for the security of preferred stock	97,000 00	
		225,000 00
Issue of 1,940 shares of preferred stock of $50 each, secured as above		97,000 00
Issue of 7 second mortgage old seven per cent. bonds, still outstanding		8,500 00
Bonds for real estate		28,000 00
Certificates of indebtedness, payable Jan. 1, 1875		109,028 23

Interest outstanding, due in cash		4,648 87
		$2,276,276 56

President.—A. F. RAVENEL.
Superintendent.—F. K. HUGER.
Treasurer.—C. WILLIMAN.

Baltimore City Passenger Railway.

At a meeting of the directors of this company, held in Baltimore on the 8th inst., the treasurer announced that the earnings of the company since its organization had exceeded the capital paid in by $64,000. The whole amount of capital paid in has been $940,000, while the authorized capital is $1,000,000, or in other words, $23-50 has been paid on each share of $25 par, thus leaving $1 50 subject to call. But in view of the excess of earnings having been applied to construction, &c., the board passed a resolution declaring the stock full paid—the effect of which is that no further call can be made upon the holders. It was stated that during the past two weeks 50,000 tons of new rails have been purchased, and that the work of repairing the different lines will be pushed to a speedy conclusion.

Railroad Law.

RAILROAD COMPANIES.—THROUGH TICKETS—LAW AS TO DETACHING COUPONS AND STOPPING OVER.

The facts of this case are fully set forth in the following opinion of the court by Judge LOTT:

The case was apparently heard at General Term, under the order of the judge made at circuit without objection by either party; and although that order may not have been strictly regular, it appears to have been treated as made within the provisions of section 265 of the Code so far as it related to the exceptions taken on the trial; and any irregularity affecting it must be deemed as waived.

The order at General Term will, therefore, be assumed to have been made under that section of the Code, and is, consequently, reviewable by us on its merits. From such review the following conclusions have been reached by me:

1st. The ticket purchased by the plaintiff at Buffalo entitled him, at any time within twenty days from its issue, to a single passage from Buffalo to Albany over the road of the New York Central Railroad company, and then to a single passage from Albany to New York over the road of the Hudson River Railroad Company.

The passage was to be continuous after it was commenced on each of the roads, without the right of stopping at any intermediate station and renewing the journey on a different train at any subsequent time during the twenty days. The exercise of such a right would have given the plaintiff the benefit of a new and different passage. A party leaving a train at a particular place on a certain day could not, after stopping at several other places, and laying over a day or more at each of them, be considered, fifteen days thereafter, as still on one and the same passage.

Each departure from a different place would constitute a new passage. This construction of the ticket was insisted on by the counsel of the defendant as one of the grounds of his motion for a non-suit, and was also asked to be given in the instruction of the court to the jury. The refusal to grant the non-suit and to comply with such request was erroneous.

2d. Assuming, however, that the plaintiff had the right to avail himself of the ticket on different trains from time to time, then he lost that right if he left the central coupon in the spring at the head of his berth, when he went off at Utica.

By the terms of the ticket it was good only upon its presentation, with the checks attached, to the conductor. If, therefore, the holder voluntarily or negligently deprived himself of that right, or became unable in consequence of his own act or omission of presenting the ticket in that form, he could not claim any privilege or right under it. There was a conflict in the evidence as to the circumstances under which the coupon in question was left in the sleeping car. The testimony of the plaintiff tended to show that it was given up by him on the demand of the conductor of the sleeping car on leaving the train at Utica; and he, on the other hand, swore that such was not the fact, but that he found it in the spring of the berth that had been occupied by the

plaintiff. Under this state of evidence the defendant's counsel asked the court to charge that if the jury believed that the plaintiff left his ticket in the sleeping car, the fact that he bought it in Buffalo, and there paid his fare to Albany, was no reason why he should not have been put off the second train when he would not produce his ticket or pay his fare.

This was a proper request, and the refusal of the court so to charge was erroneous. The only evidence of such payment, which the conductor was authorized to receive, was the production of the ticket.

3d. It was proved that the fare paid by the plaintiff to the conductor of the Utica train (whose name was Morgan Gardner) was refunded by him at Albany; and the plaintiff testified that after he had received it he said to the conductor "this is not the end of the matter," and made some other observations; and that the conductor in replying thereto, called him a nigger and a thief, and also used these words, "I dont doubt but if your pockets were searched we should find them full of counterfeit money." In reference to which the counsel of the defendant requested the court to charge the jury that the conduct of Gardner at Albany after he had paid back the fare, if the jury believe Hamilton's statement in regard to it, is not to be taken into consideration, as the company is not responsible for the acts of Gardner at that time and under the circumstances. If he did slander or abuse Hamilton then and there, the company is not liable." This, the case states, "the judge refused to charge, unless qualified;" and the defendant's counsel then and there excepted. It did not appear what qualification the judge deemed necessary, nor has any been suggested in the prevailing opinion of the General Term, nor by the plaintiff's counsel. The request was proper as made. What was said and done by Gardner at that time was not in the discharge of his duties as conductor. The company could, with equal propriety, have been made responsible for an assault and battery committed after the money was so refunded.

The fact that the statement referred to in the request was made without objection by the defendant did not render the refusal proper. It is said with plausibility by Mullen, J. (the Judge who tried the cause and gave the prevailing opinion referred to), that the evidence "was conceded by both parties to be competent, as evidenced by the one by offering, by the other by not objecting to it. To instruct a jury that such evidence is not to be taken into consideration, is to exclude it from the case. This the court had no right to do." The remark is specious and unsound. It does not follow that the omission to object to testimony is a *concession* that it is *competent*. Counsel may deem certain evidence offered entirely irrelevant and immaterial, and therefore, harmless, and, for that reason, raise no objection to its introduction and thus avoid an exception, assuming as the learned judge, after making the remark above quoted, immediately added, that "being in, it was the duty of the court and jury to give it whatever effect it ought to have in the case."

On the application of that principle to the evidence referred to, the learned judge was asked to instruct the jury that it ought to have no effect whatever. This it was his duty to do if the testimony was irrelevant and such as could legally have no influence whatever on their verdict.

It is claimed by the learned judge, however, that the evidence was competent, as a part of the *res gesta*, to show the *quo animo* of the agent in the transaction beginning at St. Johnsville and ending at Albany. The difficulty with that proposition is that the transaction which constituted the gravamen of the action was the ejection of the plaintiff from the car of the defendant; and that terminated at St. Johnsville, and not at Albany.

The claim that what occurred at Albany several hours after such termination was, nevertheless, a part of the transaction, is refuted by the mere statement of the proposition. It might be added that the defendant was only liable for what was done by the conductor within the scope of the authority conferred on him in the discharge of his duty. It is conceded by the learned judge that it could not be charged with the agent's slanders; and he erred in holding that it could be held responsible for the *quo animo* of his action beyond the purpose of ejecting the plaintiff.

Assuming the views above presented to be correct, I deem it unnecessary to consider the other exceptions which were taken on the trial.

All of my brethern concur with me in what has been said on the third and last ground or question considered by me, but express no opinion on the other two questions. It follows that the order denying a new trial was, on that ground, erroneous; and the order must, therefore, be reversed, and a new trial must be ordered, costs to abide the event.

Illinois and St. Louis Bridge.

The great bridge between Missouri and Illinois, across the Mississippi at St. Louis, was formally opened July 4th, with elaborate ceremonies.

The project of a bridge across the Mississippi at St. Louis, was one in which no real interest was awakened till, in the spring of 1867, Captain Eads entered the field, selected his location, and made public his plans. The river at the foot of Washington avenue was narrower than at any other point, while west of the rising ground traversed by the tunnel there was an easy grade and a broad avenue for the cis Mississippian railroads. February 5, 1864, the St. Louis and Illinois Bridge Company, at whose head was a Mr. Boomer, of Chicago, was organized. February 21, 1867, the Illinois and St. Louis Bridge Company was organized. Between these two rival organizations a vigorous warfare was prosecuted. The Eads plan contemplated but three arches, two of 497, and one of 515 feet, all resting on piers based on the river rock, with a double railroad track on one story, and above it a roadway fifty feet wide. The Boomer party called a convention of twenty-eight distinguished engineers, and on the 31st of August, 1867, these gentlemen solemnly resolved that, "as practical engineers, they could not conscientiously recommend parties interested to venture on the construction" of spans of 500 feet, for which there was no engineering precedent. Eleven days before the publication, Captain Eads began the excavation for the west abutment.

This was difficult work. Not alone the swift current but the treacherous sand had to be overcome, and at the bottom of it was encountered a deposit twelve feet thick of old smoke stacks, coal, stone, grate-bars, and the hulls and engines of two steamers that were burned at the levee in the big fire of 1849. Through this mass it was necessary to cut with immense oak piles shod with steel—gigantic chisels, in fact, thrust down resistlessly by pile drivers, so as to make place for the pile sheeting to enclose the coffer-dam. The western abutment rests upon the shaft of one of the burned steamboats of 1849—the railroad has put its foot on the neck of the conquered steamboat. The first stone was laid in this abutment ninety-seven feet below ordinary high-water mark, February 25, 1868.

A few days thereafter the war between the two bridge companies, which for a time had threatened to make impossible the building of either bridge, was ended by a consolidation of the companies, the Boomer party withdrawing, in consideration of receiving a large sum of money for their privileges. The New Illinois and St. Louis Bridge Company, dating from March 19, 1868, had for President Mr. C. K. Dickson, of St. Louis; Vice-President, Mr. Robert Lenox Kennedy, of New York; Chief Engineer, Captain Jas. B. Eads. The other New York directors were Messrs. Amos Cotting, Solon Humphreys, and M. K. Jesup. So soon as the consolidation was effected the work of the financial agents, Messrs. J. S. Morgan & Co., of London, was easy, and the success of the bridge assured.

In describing the construction it may be well to anticipate somewhat. The pneumatic system was adopted, with essential modifications, instead of sinking the foundations by caissons, open at top and bottom to allow the removal of the sand down to the bed rock, inside of which a wooden caisson containing the masonry was to be sunk. The caissons were much after the usual model of caissons. That for the eastern pier was 82 ft. by 60, and with walls 28 ft. high, composed of heavy wrought-iron plates strengthened internally by braces and angle-irons. Nine feet above the cutting edge was the iron roof of the air chamber. This caisson was commenced May 12th, 1869, launched October 17th, and sunk the next day. On the first of March, 1870, bed-rock was reached 93 feet 4 inches below the water line, and 120 feet below the city directrix. The air-chamber was then filled with concrete and the work of laying the granite courses of the piers proceeded with, the concreting having been finished May 27th.

The caisson for the west pier, 82 by 48 feet, was launched January 8, 1870, and the first stone laid on the 15th. That for the east abutment was begun April 3, 1870, and launched November 12th. In the winter of 1873–4 the strong but airy arches, springing from pier toward pier without apparent support, clasped hands, and men could cross the river afoot who had steady brains and no affection for their necks. By the middle of April the superstructure was finished, and on the 2nd of July the grand test was made with a weight of 500 tons, and the bridge stood the ordeal perfectly.

The superstructure of the bridge may be briefly described. There are three spans of, respectively, 515, 520 and 515 feet. Each is formed of four ribbed arches of cast steel. The upper roadway, planked and bounded by railings, is for carriages and foot passengers. There is a roadway of 34 feet and two sidewalks, each of 8 feet, making a total width of 50 feet. The railroad passages are beneath the carriage way; each is 13½ feet wide in the clear and 18 feet high, arched openings of the same size being made in the piers. The tracks are carried over the levees on either shore on five stone arches, each 20 feet wide; over these is a cap-stone arcade of twenty arches supporting the carriage-way. From the stone arches on the west shore brick arches carry the tracks into the tunnel at Third street, leading to the Union Depot. On the eastern shore the tracks curve away to the north and south, descending to the Illinois grade over an approach of trestle-work some 3000 feet in length, with a fall of one foot in 100. The carriage way descends straight between them, with a fall of five in 100; on the west side it is carried on level to Third street. Gates with automatic attachments registering the number of passers check the gray-uniformed toll takers. The lowest part of the arches is 50 feet above high water mark.

The final test of the strength of the St. Louis bridge was made on the 2nd instant under the supervision of Captain J. B. Eads, the chief engin-

neer. He was assisted by Col. Henry Flad, Oscar Schenitze, Messrs. Klemm, Varrelman, Schmidt, Cooper, and Devon, with ten assistants, and Mr. C. Schaler Smith, of the Baltimore Bridge Company, and Mr. Walter Katte, of the Keystone Bridge Company. Col. H. B. Carrington, United States Army, Professor of Dynamic Engineering at Wabash College, was also present, and expressed his satisfaction at the result of the tests. At a given signal there were fourteen locomotives ready to obey the command of Captain Eads and Colonel Flads and their assistants.

The Chief Engineer's report of the tests says: Seven locomotives were placed upon the track of each span. This produced a deflection of 2½ inches on centre span, and 2¼ inches on each side span. Seven locomotives were then placed on each track of the west approach, and both trains of locomotives, fourteen in all, were moved out abreast and simultaneously over each one of the three spans. The locomotives weighed from 35 to 51 tons, averaging 40 tons each, making 560 tons in all. The two trains thus formed were stopped on each span, and the effects of this load carefully noted. The deflection of the middle span was 3¼ inches; of each side span 3 inches. The two trains moving abreast upon each arch was the severest possible test to produce distortion of the curve of each arch. Ten locomotives were then coupled together, and these were run over each track on each side of each arch of the entire bridge, covering the entire track of each span, and throwing the whole weight of the train, 400 tons, on one side of each span. This test was applied to each side of the bridge, and produced the severest twisting strain to which each arch can be subjected. The vertical deflection produced by this test on the central span was two and one half inches. The locomotives thus coupled were run at a speed of ten miles per hour. The local traffic on the upper roadway of the bridge was uninterupted during the progress of the tests. Various other observations in detail were made, noting the effects of the load on the arches as it entered upon and left the spans, but this possesses no special interes t to the general public. The result of the tests agrees almost exactly with the theoretical computations previously made, and the whole trial proved eminently satisfactory. The instruments failed to detect any side motion whatever during the tests.

Telegraphs in Mexico.

The following extract in relation to the telegraph interests of Mexico is taken from the report of the Department of Public Works of the Republic to the Mexican Congress:

Of the lines now in operation, some belong to the Federation, some to the States, and others to private companies. The following telegraphic lines belong to the Federation: The one which starts from the City of Mexico passes through Cuautitlan, Tepeji del Rio, Arroyozarco, San Juan del Rio, Queretaro, Allende, Dolores, Hidalgo, San Felipe, San Luis Potosi, Moctezuma, Charcas, Matehuala, Salado, Gomez, Farias, Saltillo, Monterey, Cadereita Jimenez, Cerralvo Mier, Camargo, Reinosa, and the port of Matamoras; there being a telegraph office at each one of the twenty-three places above mentioned, and comprising a distance of 1,400 kilometres in length. At Matamoras this line connects with those of the United States, and consequently with Europe. The line which leaves Queretaro and passes through Celeya, Salamanca, Irapuato, Guanajuato, and Leon, with branches to Salvatierra, Valle De Santiago, Penjamo, Cuitzeo, and Dolores Hidalgo, telegraph offices being established in each one of the places mentioned. The length of this line, with its branches, is 898 kilometres. That which starts from the City of Mexico, 222 kilometres in length, and which passes through Toluca, Ixtlahuaca, Tlapujahua, and Maravatio, from which latter point it communicates with Salvatierra, closing the circuit at Celaya, which facilitates communication between the capital of the republic and the interior lines, independantly of that which is established via Queretaro. The telegraph line which passes through Tacubaya, San Angel, Tialpam, Cuernavaca, Puente de Ixtla, Iguala, Chilpancingo, and Tixtla Guerrero, comprises a distance of 376 kilometres, and will be continued as far as the port of Acapulco. [The line has been finished to the said port since the publication of the report from which these data are taken.] The line which starts from the port of Mazatlan, and passes through Concordia, Panuco, Copala, Coyotes, Durango, Nombre de Dios, and ends in Chalchihuites, is 498 kilometres in length. The line from Tehuacan to Oaxaca, which is 251 kilometres in length, and passes through Teotitlan and Cuicatlan. The line which starts from Minatitlan, and is to place in communication the States of Vera Cruz, Tabasco, Campeche, and Yucatan with the capital of the republic; two sections of the said line are already in operation; one from Minatitlan to San Juan Bautista, and the other from Campeche to Champoton. The whole line when finished will be 689 kilometres long.

The following telegraph lines also belong to the Government: Those established in the States of Yucatan and Campeche, with offices at Merida, the Port of Progreso, Sisal, Humanac, Tixkokob Izamal, Acancek, Mama, Tuul, Tekax, and Maxcanu, in Yucatan, and in Kalkini, Tlexelcachan, Iturbide, Champoton, and Campeche, in the State of the same name. These lines are 520 kilometres in length.

The State of Zacatecas owns the line which begins at San Luis Putosi and runs through Ojo Caliente, Zacatecas, Fresnillo, Sombrete, Chalchihuites, Aguascalientes, Jerez, and Villanueva; this line is 660 kilometres long. The State of Michoacan owns the line which starts from Salvatierra and passes through Acambbaro Maravatio, Morelia, Patzcuaro, and Ario. This line is 190 kilometres in length. The line of the Jalisco Company starts from Leon, passing through Lagos, San Juan de los Lagos, Aguascalientes, Pegueros, Tepatitlan, Zapotlanejo, Guadalajara Tepic, and San Blas, Guadalajara, Zayula, Zapotlan, Colima, and the port of Manzanillo, 930 kilometres long. The Vera Cruz Telegraph Company owns the lines which start from the said port and run, one to Minatitlan, and another to the Port of Tampico, the former passing through Alvarado, Tlacotalpam, Tuxtla, and Acayucan, and the latter through Jalacingo, Papantia, and Tuxpan. The line which runs from this city to Vera Cruz, passing through Riofrio, Puebla Acatzingo, la Canada, Orizaba, Cordoba and Vera Cruz, also belongs to a private company, and the other line, which follows along the Mexican Railroad as far as Nopalucan, and then passes through Tulancingo, Perote, Jalapa, and Vera Cruz. This company likewise owns the lines from Mexico to Pachuca and Tulancingo, from Puebla to Tehuacan, from Puebla to Tlaxcala, and from Mexico to Chalco and Ameca. The telegraph of the Mexican Railway Company goes from this capital to Vera Cruz, following the railroad and the branch to Puebla.

The extent of telegraph lines already in operation and being constructed in the republic is as follows:

	Kilometres.
Owned by the Government	3 802
In course of construction	1,050
Owned by States	970
Owned by private companies	2,179
Total number of kilometres	8,001

—or about 5,000 miles.

The total number of telegraph offices owned by the Government is 78.

☞ The Western division of the Northern Pacific railroad has been completed to Columbia river, a distance of one hundred and twelve miles.

☞ The Lewiston and Auburn Railroad was opened for public travel and freight on the 13th inst.

Conversion of Gauge in England.

An important event in the history of the Great Western Railway Company occurred during the week. This company was the first to convert broad into narrow gauge, the former having been the conception of the younger Brunel. Between Friday last and Monday 200 miles of the south-western district of the Great Western Railway was successfully converted from broad to narrow gauge, and the operation was performed in a manner which reflects the highest credit upon the administrative and engineering staff of the Company. Whether the original conception of the broad gauge was an error in engineering science or not will probably remain an open question amongst leading scientific men for years to come, but the fact of its rapid disappearance from our railway system will be a subject of congratulation to most people connected with or interested in railways. Brunel's idea was to adapt the gauge to the engine, Stephenson's to adapt the engine to the gauge. As a matter of course the more practical conception of the two was that which ultimately prevailed, and hence we may now be said to have a uniform gauge over the whole kingdom. The invention of the outside cylinders also favored the general use of the narrow gauge. The Great Western suffered in traffic interchange with other companies for many years from this original error of judgment on the part of their enthusiastic engineer, and the public had to suffer all the inconvenience of a break of gauge. Now, happily, from henceforward both the company and the public will be benefited by the work which has been so successfully accomplished lately, and during the week; and when the difficulties in the way are considered, and the probable interruption to public traffic regarded, this conversion of 200 miles of English railway from broad to narrow gauge in so short a space of time must be looked upon as an engineering feat of no ordinary magnitude. The portion of the Great Western which has now been converted is that which embraces the various branches of the line between Reading and Devizes, Holt Junction, Bath, Salisbury, Chippenham, Weymouth, Radstock, Wells, and Frome, and some short lines in conjunction therewith. Upwards of 2,000 men were engaged in the work, the average number of hours for work being 17 or 18 out of the 24. Double lines extend over a considerable part of the distance converted, doubling, of course, the work to be done. Every care and precaution was taken to facilitate the operations of the men, and to prevent accidents. We believe the portion of the line between Bath and Bristol is now on the mixed gauge, and will be opened for the narrow gauge simultaneously with the line just converted, thus bringing nearly the whole of the Great Western into unison with the other systems in the country, a result which, we may again repeat, will be of benefit to the Company and utility to the public. The next work should be the conversion of the Bristol and Exeter, South Devon, and Cornwall lines, from broad to narrow gauge. Our readers are aware that the broad gauge is 7 feet, and the narrow 4 ft. 8½ in., and therefore that the broad is about 50 per cent. wider than the narrow.—*Herapath, June 27.*

☞ The Philadelphia *Ledger* reports the total anthracite coal toonage for the week ending July 4, at 347,472 tons, and for the coal year 9,047,355 tons against 9,294,291 tons to corresponding time last year, being a decrease of 146,836 tons. The bituminous tonnage for the week is 71,743 tons, and for the year 1,568,865 tons, against 1,487,014 tons to same time last year, giving a total of all kinds for the week of 419,215 tons, and for the year of 10,611,220 tons, against 10,781,305 tons to same time last year, being a decrease of 170,085 tons.

☞ The survey for the Bushwick and Glendale Railroad has been completed, and maps of the same are to be filed in Kings and Queens Counties during the present week.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

The asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "‡."

American Railroad Journal.

Saturday, July 18, 1874.

Stock Exchange and Money Market

The Money movement is yet quite easy for responsible borrowers, whether for speculative or mercantile purposes, call loans being quoted @2 @3 per cent. to the leading Street houses, and best discount @5@7 per cent per annum, on short date paper. The demand for accommodation is comparatively moderate, and fails to afford adequate employment for the very liberal balances offering at the current low rates. The Stock Exchange and Gold Board operations are on a restricted scale, and call for less financial assistance from lenders. The Fall trade, in the mercantile line, has not yet fairly opened with anything like activity, and the demand from this source is not urgent. The City banks, last week, again added largely to their deposit, and specie averages, while reducing their loan and discount line. They diminished their reserve of legal tender moderately, while enlarging their item of circulation slightly. The U. S. Sub Treasury again added materially to the currency reserve, while cutting down the specie balance, through the coin interest disbursements. The City banks, last week, while reducing their reserve of legal tender notes, $2,325,400 added $2,080,100 to their deposit tem, and $5,441,100 in their specie average. They also report a decrease of $333,800 in the loans and discounts, and an increase of $59,800 in the circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $56,601,431 against $54,952 139 the preceding week; and a coin board of $49,861,755, against $50,270,004 on the previous return. The City bank exchanges, during the week, were $444,-578,380, or a daily average of $74,096,390. The customs revenue of the port, during the week, was $2,038,768, of which $1,925,768 were in coin certificates. The City banks reported their average of gold last week at $27,375,400, and their greenback average at $61,335,100. Their deposits stood at $243,525,600. The loan item was about $287,088,400. The circulation was $25,923,700.

The cash balances of the Treasury Department on Tuesday were: Currency, $13,282,217; special deposits of legal tender for redemption of certificates of deposit, $59,970,000; coin, $70,-862,236; including coin certificates, $32,477,300.

The outstanding amount of legal tender notes is now definitely established by law at 382 millions. The National bank circulation is under 350 millions.

Messrs. Fisk & Hatch have received from the Treasury Department, the following letter, relative to the adjustment of interest in exchanges of bonds under the recent circular of the Secretary of the Treasury. As there are only a few days remaining for the presentation of proposals, this official letter is important because it explains any vague portions of the circular referred to. It is as follows:

TREASURY DEPARTMENT,
WASHINGTON, July 11, 1874.

GENTLEMEN:—In reply to the inquiries contained in your letter of the 10th instant, I have the honor to inform you that the conditions prescribed in the Funded Loan Circular, to which you allude, are as follows:

The subscriber, whose bid is accepted, to pay all interest, which will have accrued on bonds delivered to him, to the expiration of three months from the date of his subscription, or the date of the acceptance of his bid. The interest is payable quarterly on this class of securities, and bonds delivered between this date and November next will carry interest from May 1, 1874, or August 1, 1874, as the subscriber may elect, and he will be required to pay interest from one or the other of said dates to expiration of three months from the date of subscription; in other words, all interest accrued to date of subscription, also all interest that will have accrued three months thereafter, must be paid by subscriber, and must be so calculated in all settlements, whether payment be made on the day he subscribes, or three months afterwards.

Very respectfully,
CHAS. F. CONANT, Acting Secretary.

Gold has been moderately dealt in, on speculative account; and has been in rather more demand for Custom house, and export purposes. The price has fluctuated less widely, closing barely steady. The extremes of the price have been 109⅝@110¼, closing at 109¾, as against 109⅞ on Wednesday of the preceding week. The specie outflow, last week, was $1,095,948. The imports of specie at this port since Jan. 1, have been $2,565,819, against $1,962,011 same time last year. The customs demand for Gold last week averaged $856,000 a day. Foreign Ex-

change has been in comparatively limited demand at rather easier prices. Bankers' sixty day bills on London closed on Wednesday at $4 86¾@4 87½; sight bills on London at $4 89½ @$4 90 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $6,267,356.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $7,814,988, against $9,432,296 same week last year.

Government securities have been in moderate supply, and fair investment demand at firmer prices. The loan division of the Treasury Department has made extensive preparations to receive the bids for the new loan. None have as yet been received, but the Treasury officials have private information that the bids will be very large. It is not expected that any of the bids will reach Washington until about the time they are to be opened, July 28, partly because the bankers do not wish to lose the interest on the large deposits that must accompany each bid.

U. S. sixes of 1881 closed on Wednesday of this week at 117½@117½; U. S. Five-Twenties of 1862, 112⅞@113¾; U. S. Five-Twenties of 1864 at 115½@116; U. S. Five-Twenties of 1865, 116½@117; U. S. Five-Twenties of 1865 consolidated, 116¼@116½; U. S. Five Twenties of 1867, 117@117¼; U. S. Five-Twenties of 1868, 116¾@117¼; U. S. Ten-forties at 112¾ @113; U. S. Fives of 1881, (Funding Loan) 112½ @112¾; Six per cent. currency Sixes from 116½@117¼.

State and Railway bonds have been moderately sought after at about steady rates. Railway and miscellaneous share property has been in less demand and generally depressed in price, though closing more steadily.

General business has shown less animation in the line of domestic produce. Cotton has been quoted lower; Breadstuffs, Provisions, and Naval Stores, irregular, but closing more firmly; Wool, and Tobacco strong in price. The Metal trade has been without new features of interest. Sales of about 8,000 tons American Pig Iron were rumored on contracts. Apart from which the dealings were unimportant. Eglinton Pig Iron quoted at @$34. Glengarnock, $35, Sumerlee, $36; No. 1 American Pig at $31@$32. No. 2 do. at $29@$30; Forge, $26@$28; English Rails at $50@$52, gold; American Rails at works, $56@$60; Old Rails, $36@$40 Wrought Scrap, $38@40. Ocean Freights have been fairly active, and at the close, rather weak as to rates; demand mostly from Grain Petroleum, Provision and Tobacco shippers.

The following quotations of sales of Railway and other securities are in addition to those giver elsewhere in our columns:—

Union Pacific Railroad.

The earnings of the Union Pacific Railroad for May, 1874, were $910,065 13, the expenses $458,822 62, and the net earnings $451,742 51. In May, 1873, the earnings were $1,007,831 27, the expenses $490,322 28, and the net earnings $517 509 04—showing a decrease in earnings of $97,766 14, with a decrease in expenses of $31,999 61, making a decrease in net earnings of $65,766 53. For the five months ending May 31, 1874, the earnings were $3,660,751 29, the expenses $2,013,684 20, and the net earnings $1,647,067 09—showing an increase in earnings, as compared with the corresponding period of the previous year, of $47,688 70, with an increase in expenses of $77,887 41, making a decrease in net earnings of $30,248 71.

The Land Department of the Union Pacific Railroad Company reports the sales of land for the month of June, 1874, at 43,962.22 acres for $201,675 33, or an average price per acre of $4 58. The total sales to June 30, 1874, have been 1,013,779.36 acres, for $4,618,809 72, or an average price per acre of $4 55. The lands belonging to the company remaining unsold, now amount to 11,066,220.64 acres.

Land grant bonds issued		$10,400,000
Less bonds cancelled by land department	$1,529,000	
Less bonds cancelled by trustees	723,000	
		2,252,000
Leaving bonds outstanding June 30, 1874		$8,148,000 00
Land notes on hand, June 30, 1874 —principal (interest not included)		$2,638,284 07
Cash in hands of trustees for the purchase of land grant bonds, June 30, 1874		$14,156 58

Erie Railway.

At the annual meeting of the stockholders of the Erie Railway company, held in this city on the 14th inst., the following gentlemen were unanimously elected directors: Hugh J. Jewitt, Thomas A. Scott, John King Jr., John Taylor Johnston, M. O. Roberts, Frederick Schuchardt, W. Butler Duncan, Edwin D. Morgan, H. Baltzer, S. L. M. Barlow, L. H. Myer, Henry G Stebbins, R. Suydam Grant, Lucius Robinson, John A. C. Gray, Cortlandt Parker and Homer Ramsdell.

At a subsequent meeting of the new board of directors, Hugh J. Jewitt was elected President, A. R. McDonough Secretary, and W. P. Shearman Treasurer.

The following resolutions were adopted:

Resolved, That the stockholders of the Erie Railway Company now assembled, representating in person or by proxy more than one-half of the total stock capital, both common and preferred, of this company, do hereby express their grateful thanks to the officers and Directors of the company, for their careful and patient labor for the past year, and for the fidelity with which they have administered the affairs and business of the company.

Resolved, That the action of the Directors of this Company, in creating the so-called second consolidated mortgage to secure the amount of $40,000,000 of bonds ($10,000,000 being reserved to cover the existing convertible bonds,) and in issuing a portion of said bonds for the general uses and purposes of this company, be and the same is hereby ratified, approved, and confirmed, and that, in the opinion of the stockholders, the said issue was necessary and proper, and that the proceeds shall be used and disposed of in paying and discharging the indebtedness and liabilities of the company, and for such other purposes as may, in the opinion of the board, be considered necessary, proper, and expedient.

Resolved, That the stockholders do fully ratify, approve, and confirm the recent lease of the Atlantic and Great Western Railroad by the Erie Company on the terms set forth in the lease dated May 6, 1874, and in the contemporaneous agreements; and do likewise approve, ratify, and confirm the purchase heretofore made of the stock of the Buffalo, New York and Erie Railroad, and in the purchase of interests in coal and in the stocks of various coal companies organized under the laws of Pennsylvania, such purchases being in the opinion of the stockholders, wise and necessary for the requirements of the company, and for the true interests of the stockholders.

Resolved, That the stockholders of this company here assembled do now fully and formally accept, adopt, and confirm all the acts, arrangements, purchases, and contracts aforesaid, the same, in the judgment of this meeting, having been wisely and properly made and entered into for the true interests of the stockholders of said company.

Resolved, That a copy of these resolutions be duly certified by the officers of this meeting, and forwarded to the Attorney General of the State of New York.

No reports were received from Capt. Tyler or the English accountants, and it was announced that they would not be published in this country until they had first been presented to the stockholders in England.

A series of resolutions complimentary to President Watson were unanimously passed by the retiring board.

The General Manager, Mr. James C. Clark, reported that the loss to the company by the fire at Weehawken on the 10th, 11th and 12th inst. would not exceed $175,000, and that their operation in the oil traffic was not materially interfered with.

The amount of stock voted on was upward of $57,800,000.

☞ Mr. Poppenhusen, President of the Flushing and North Side Railroad Company, recently visited Huntington for the purpose of conferring with the citizens of that place in regard to the extension of the road to Huntington. Mr. P. stated in substance that if the residents along the line of the road east of Roslyn would extend a reasonable amount of aid to the enterprise, in the matter of right of way and subscription to stock, the company would build the road and commence work upon it this Summer. Huntington, it was intimated, would be expected to furnish about two and a half miles of the right of way, for which stock would be issued, and to subscribe for about $25,000 worth of stock in addition.

☞ The earnings of the Erie Railway for the week ending June 30, 1874, were $332,245, against $399,598, for the corresponding week in 1873, a decrease of $67,353. From January 1, to June 30, 1874, the earnings were $8,880,915, against $9,526,807 for the corresponding time in 1873, a decrease of $645,892.

☞ The earnings of the Denver and Rio Grande Railway for the month of May, 1874, were $38,083, against $38,384 in the corresponding month in 1873, showing a decrease of $300. The net earnings for the month were $21,068, against $20,045 in same month last year, showing an increase of $1,018.

☞ The Panama Railroad Company have ordered $500,000 worth of steel rails to be shipped to Panama, with the object of replacing the present iron rails as fast as they are worn out.

☞ Five new locomotives have been ordered for the Flushing and North Side Railroad, to be delivered in the Fall.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, July 25, 1874.

Pacific Railroad of Missouri—Carondelet Branch.

The Atlantic and Pacific Railroad Company having applied for the admission of $500,000 of the first mortgage bonds of the Pacific Railroad of Missouri, Carondelet Branch, to the Stock List of the New York Stock Exchange, the Committee recommend that these bonds be placed on the regular list after Pacific of Missouri 1st. They also summit the following statement:

On September 14, 1872, the First Mortgage Bonds $7,000,000, and the Second Mortgage Bonds $8,000,000, and the stock of the company were placed on the list. Since that date the Carondelet Branch of the Pacific Railroad has been completed, adding fifteen and a half miles of main line and extensive sidings, as also connections with the system of iron furnaces recently erected on the Mississippi River, at Carondelet, and the steam transfer at that point, which gives us connection with all the lines eastward from St. Louis. The Carondelet Branch was constructed to meet the demands of the increasing iron and live stock business of the main line, which it was not possible to do on the main line within the limits of St. Louis. It intersects the main line at Kirkwood Station, running thence southeasterly to Carondelet about fifteen and a half miles, to and along the river front of the Mississippi, with its sidings, buildings, equipments and connections. It has added more than $1,000,000 to the value of the Missouri Pacific property.

The liens on the property secured by Mortgage are as follows:

$7,000,000, 1st Mortgage Six per cent. gold.
3,000,000, 2d do Seven per cent. currency.
800,000, Real Estate in St. Louis, Eight per cent. currency.
500,000 1st Mortgage Carondelet Branch, Six per cent. gold.

The Second Mortgage has been reduced $127,000, by the Sinking Fund, and will be further diminished $66,000 in July next.

The requirements for interest on secured Funded Debt are as follows:

Six per cent. gold on	$7,000,000	$420,000
Six do do	500,000	30,000
Seven do currency	2,873,000	201,110
Eight do do	800,000	64,000
		$715,110

The net earnings of the Missouri Pacific line for the year ending Dec. 31, 1873, were $1,404,044 42.

The requirements to meet interest on secured indebtedness are but little over one-half of net earnings.

The earnings for present year indicate that they will net at least $1,600,000, and payments for interests, rentals and dividends on $7,000,000 of stock will be as follows:

Interest on Secured Indebtedness	$715,110
Interest on $1,500,000, Incomes Seven Per Cent. currency	105,000
Interest on $700,000, St. Louis Co. Loans Seven Per Cent. currency	49,000
Rentals	185,500
Dividend	350,000
Premium on gold	50,000
Total requirements from net earnings	$1,404,610

The Carondelet Branch bonds are dated October 1, 1873, and are due twenty years from date. Jesse Seligman, of New York, and James Baker, of St. Louis, are trustees. The par value of each bond is $1,000, and they are numbered from 1 to 500 inclusive. Coupons are payable at the National Bank of Commerce, New York, semi-annually on April and October 1.

The Missouri Pacific property is under lease to the Atlantic and Pacific Railroad Company for 999 years, from June 29, 1872, and is managed exclusively by the officers of the latter company.

Officers—President, Thomas A. Scott; vice president and general manager, Andrew Peirce; secretary and treasurer, Clinton B. Fisk.

Directors—Thomas A. Scott, Oliver Ames, A. S. Dennis, Andrew Peirce, W. H. Coffin, Francis B. Hays, Joseph Seligman, A. V. Stout, Uriel Crocker, David Salomon, Chas. S. Baylis, Clinton B. Fisk. Vacancy by death of John Edgar Thomson.

The directors and officers of the Missouri Pacific Railroad are substantially the same as of the Atlantic and Pacific Railroad Company.

Very respectfully, A. PEIRCE.
Vice-President and General Manager.
CLINTON B. FISK, Secretary and Treasurer.

New London Northern Railroad.

The New York Stock Exchange have admitted to the call the shares of the New London Northern Railroad company. This road is 100 miles in length, extending from New London, Conn., to Miller's Falls, Mass. It connects with the Shore Line of the New York, New Haven and Hartford Railroad; New York, Providence and Boston Railroad; Norwich and Worcester Railroad; Hartford, Providence and Fishkill Railroad; Boston, Hartford and Erie Railroad; New Haven, Middletown and Willimantic Railroad; Boston and Albany Railroad; Ware River Railroad; Springfield, Athol and Northeastern Railroad; Vermont and Massachusetts Railroad; and the leased lines of the Central Vermont Railroad, of which it forms a part.

The road, in connection with a line of freight boats owned by the New London Northern Railroad Company, is leased to and operated by the Central Vermont Railroad for 20 years from December 1, 1871.

The Central Vermont Railroad Company pay an annual rent of $150,000, in quarterly instalments, on the first days of March, June, September and December, and $1,500 each year for organization expenses. It is provided, however, in the contract, that whenever the gross earnings of the road for any year shall exceed by $100,000 the sum of $510,000, they are to pay for every such $100,000 in excess an additional sum of $15,000. As collateral security for the faithful performance of this contract by the Central Vermont Railroad Company, this company holds $150,000 of the Income and Extension Bonds of the Trustees and Managers of the Vermont Central and the Vermont and Canada Railroad Companies, which are secured by a first lien upon all the property of these companies.

The capital of the Company is 15,000 shares, of $100 each..... $1,500,000
Its funded debt consists of 1st mortgage six per cent bonds due in 1885, coupons payable April 1st and October 1st, in New York..... 300,000
Second mortgage bonds seven per cent., due 1892, coupons June and December, payable in New York..... 500,000

Of these 2d mortgage bonds there have been negotiated $225,000; the proceeds having been expended for the purchase of steamboats and equipment for the road, and for permanent improvements; and the rest of the $500,000 are to be appropriated in like manner according to the provisions of the contract with the Central Vermont Railroad Company. The interest upon these bonds is to be paid by the Central Vermont Railroad during the continuance of the contract. There is no floating debt.

The annual income of the company and expenditures are:

Rent of road	$150,000
Received for organization expenses	1,500
Other rents	475
	$151,975

Expenditures:

Four two per cent. dividends, paid January, April, July and October	$120,000
Interest on First Mortgage Six per Cent Bonds	18,000
General expenses	8,000
	141,000
Yearly surplus	$10,975

EARNINGS.

1862	$151,586 02	1868	$404,846 69
1863	195,065 30	1869	421,680 59
1864	270,670 60	1870	468,760 85
1865	306,766 59	1871	512,301 91
1866	327,476 59	1872	602,688 60
1867	381,838 95	1873	590,517 72

President.—Charles Osgood, Norwich, Conn.

Directors.—Charles Osgood, William B. Billings, Benjamin Stark, Robert Colt, Jr., William H. Hill, Harry P. Haven, William H. Barnes, Augustus Brandegee, Thomas Ramsdell, William Allen Butler, Fred. Taylor.

Secretary and Treasurer.—Robt. Colt, Jr., New London, Conn.

Transfer Agent and Registrar.—National Bank of Commerce, of New York.

Principal office of the Company—New London, Conn.

Fireless Dummies.

Brooklyn is to have rapid transit. The Common Council of that city has just authorized the admission of steam dummies upon the Atlantic avenue line, and energetic preparations are being made for taking speedy advantage of this privilege. The line runs from the Flatbush avenue junction to East New York, a distance of four miles, and it is announced that the new arrangement will be in vogue by next September. The locomotives to be used are the "fireless dummies," invented in 1872, and now in successful operation in the cities of New Orleans and Chicago, for street transit. The peculiarity of their construction is that they run under a charge of steam generated in a stationary boiler and transferred for use to the boiler of the locomotive, which is thereby relieved from the necessity of carrying fire or any means of creating heat.

Outwardly they bear a general resemblance to the common steam dummies. They are twelve feet long, six feet wide and eight feet high, and weigh about three tons. The sides and ends are handsomely paneled with ash and black walnut, and a wooden curtain conceals the action of the wheels on either side from the view of passing teams. On the roof there are two ventilators, through which the exhausted steam escapes after passing through a series of coiled pipes, which effectually deaden all sound, by producing a rapid condensation. The full charge of steam required is 20 pounds and experiment has demonstrated that when the engine is idle the loss of pressure by radiation of heat amounts to only three pounds per hour. One charge of steam on a level track, is sufficient to run the engine 20 miles. It can be attached to a common street car and run at any rate of speed desired, from five to 20 miles an hour, and it can be stopped as quickly, and within as short a space as a horse car.

It is said that a recent ordinance of the New York Common Council permits the introduction of these dummies upon the street railroads, and if the Brooklyn experiment is a success, it is anticipated that the "fireless locomotive" will be used in the metropolis also. Last Winter a committee of Newark gentlemen went to New Orleans especially to witness the new invention, and though we believe they were satisfied with the performance, they did not deem the experiment wise in the case of our city. Perhaps the innovation in Brooklyn and New York may set a new fashion, and in time, give us also rapid transit to all our suburbs.—*Newark Adv.*

Milwaukee and St. Paul Railway.

We have received a copy of the report of this company for the year ending December 31, 1873, from which we learn that the number of miles of road owned and operated by the company during the year was 1,899, exclusive of side and double tracks, amounting to 182 miles. The terminal points and distances of the various lines composing the Milwaukee and St. Paul Railway are as follows:

	Miles.
Chicago to Milwaukee	85
Milwaukee to St. Paul, via La Crosse	324
Milwaukee to St. Paul, via Prairie du Chien	405
Milwaukee to Portage City, via Horicon	96
North Milwaukee to Schwartzburg	6
Horicon to Berlin and Winneconne	57
Watertown to Madison	37
Milton to Monroe	42
Calmar to Algona	128
Conover to Decorah	10
Austin to Mason City	40
Mendota to Minneapolis	9
Hastings to Glencoe	75
Sabula to Marion	87
Total miles owned by the company	1,899

In addition to the above, the company own $2,001,000 of the capital stock of the Western Union Railroad, being a majority of the capital stock of that company.

The cost of the 1,899 miles of road, including equipments, supplies, bridges and elevators, is as follows:

Mortgage bonds	$26,262,500
Preferred stock	12,274,483
Common stock	15,399,261
	$53,936,244
Less cost of Western Union	1,500,750
Cost of 1,899 miles	$52,435,494

—or say $37,480 per mile.

The equipment of the road at the close of 1872 and 1873 compares as follows:

	1872.	1873.
Locomotives	182	198
Passenger cars, 1st class	62	64
" " 2d class	32	32
Sleeping cars	9	11
Baggage, mail and express	56	57
Box freight and caboose	2,720	2,984
Flat and coal	629	671
Boarding	2	2

In the following table are shown the mileage of trains, the passenger traffic and the freight traffic on all the roads collectively for the years 1872 and 1873:

Mileage:	1872.	1873.
Passenger trains	1,164,170	1,352,256
Freight trains	2,619,631	3,376,299
Wood and gravel trains	429,811	477,333
Total mileage	4,213,612	5,205,888
Passengers carried	956,172	967,754
Do. carried one mile	49,193,242	52,252,558
Freight (tons) carried	1,697,826	1,791,505
Do. carried one mile	187,361,638	257,638,582
Pass. revenue per mile	3.59 cents.	3.58 cents.
Freight revenue per mile	2.43 cents.	2.50 cents.

The following is a comparative statement of the earnings and expenses during the years ended December 31, 1872 and 1873:

Earnings from:	1872.	1873.
Freight	$4,566,991 24	$6,421,869 24
Passengers	1,775,714 84	1,857,196 43
Mail service	137,032 12	181,049 31
Express service	163,724 43	177,347 11
News service	5,803 36	6,840 15

Exp. Elevator "B & C"	.....	5,228 99
Exp. Elevator "D"	.....	981 59
Total	$4,695,615 97	$6,594,560 33
Net earnings	$2,262,155 21	$2,451,563 24

Compared with the year 1872, the gross earnings of 1873 show an increase of $2,088,352 39, with an increase in expenses of $1,898,944 36—making an increase in the net earnings of $189,408 03. The per centage of operating expenses to earnings for the year 1873 was about 73 per cent, while for the year 1872 it was 67.5 per cent. This increase for 1873 is due to the improvement made in the condition of the track during the year by the purchase and use of 5,884 tons new iron rails, and 6,103 tons steel rails; the cost of which, together with the expense of new ties, ballasting, etc., was charged wholly to operating expenses. The expenses are divided as follows:

	Ordinary.	Extraordinary.	Total.
1873...	$4,994,508 30	$1,600,052 03	$6,594,560 33
1872...	4,111,277 10	584,338 87	4,695,615 97
Increase	$883,231 20	$1,015,713 16	$1,898,944 36

The earnings and expenses by operating divisions for the two years were as follows:

Gross earnings:	1872.	1873.
La Crosse division...	$2,191,920 19	$2,710,166 72
Northern division...	718,463 14	826,903 94
Prairie du Chien div.	1,810,081 66	2,361,953 64
Iowa and Minnesota and Iowa & Dakota divisions	1,782,989 05	1,480,394 51
River division	415,677 25	737,120 08

Northern division...	220,396 25	287,449 71
Prairie du Chien div.	466,613 25	894,662 19
Iowa and Minnesota and Iowa and Dakota divisions	543,968 53	190,023 86
River division	155,795 32	309,944 04
Hastings and Dakota division	*16,274 75	*11,274 89
Illinois and Iowa div.	*4,180 29	*11,916 52
Chicago and Milwaukee division	....	343,729 25
Total	$2,262,155 21	$2,451,563 24

* Excess of expenses.

The earnings, expenses and net revenue per mile of road in the two years compare as follows:

	1872.	1873.
Gross earnings	$5,535 22	$6,536 22
Operating expenses	3,735 57	4,764 86
Net earnings	$1,799 65	$1,771 86

The average price, per ton per mile, received for freight, for a series of years past has been as follows:

1866	3.76	1870	2.82
1867	3.94	1871	2.54
1868	3.49	1872	2.43
1869	3.10	1873	2.50

The expenditures made by the company during the year 1873, not charged to operating account, amounting to $1,330,803 63, were as follows:

New locomotives and cars	$522,391 83
Mississippi River Bridge at La Crosse	98,738 59
New fences in Iowa and Minnesota	30,961 56
Depot grounds, wharfs, etc., in Milwaukee	34,338 79
New embankment at Mendota and Fort Snelling	10 573 32
Right of way	5 885 29
La Crosse freight burned	34,887 41
New buildings and depot grounds at St. Paul	8,122 63
La Crescent Connection	25,485 02
Mississippi River Ferry property	8 000 00
Depot grounds, Austin	1,000 00
Depot grounds, Sabula	3,000 00
Depot grounds, Shakopee	3,000 00
Taxes, Milwaukee city and county	79,420 13
Purchases of road, Chicago and Milwaukee Division	3,314 50
Purchase of road, St. Paul Division	575 00
Purchase of road, Iowa and Minnesota Division	363 00
Construction of Chicago and Milwaukee Division	289,729 10
Construction of Hastings and Dakota Division	53,714 08
Construction of Illinois and Iowa Division	122,303 38
Total	$1,330,803 63

In March, 1874, in pursuance of authority previously obtained from the stockholders, the directors authorized the execution and issue of a consolidated mortgage upon the entire property and franchises of the company to secure the payment of bonds to the amount of $35,000,000. Of these $26,225,000 are set apart to exchange for an equal amount of bonds previously issued and secured by mortgage on different divisions of the road, and the remainder are to be used only for the purchase of steel rails, the erection and completion of bridges across the Mississippi River, the erection of grain elevators at Chicago and Milwaukee, and the further equipment and permanent improvement of the mortgaged property.

In accordance with legislative authority the corporate name of the company was changed in February, 1874, to the "Chicago, Milwaukee and St. Paul Railway Company."

In March, 1874, the Directors declared a dividend of seven per cent. on the preferred stock, out of the earnings for the year 1873, and the same was paid from the issue of the consolidated bonds above referred to, the net earnings having been used in relaying a portion of the road with steel rails, and in the purchase and building of rolling stock.

During the year, 6,175 tons of steel rails were put down, adding 68¼ miles of steel rail, and additional equipment was built and purchased as follows, viz: 16 first class locomotives; 2 sleeping cars, 8 first class passenger cars, 4 mail and express cars, 300 box cars, 15 flat cars, and 64 coal cars.

The company had, on the 31st December, 118⅞ miles of steel rails upon their road bed, embracing 51 miles from Chicago to Milwaukee, and 43 miles from Milwaukee to Watertown; they had also steel rails at other places, making the full amount of 118⅞ miles.

President.—Hon. ALEX. MITCHELL, Milwaukee.

Vice President.—Hon. RUSSELL SAGE, New York.

Directors.—Alex. Mitchell, Russell Sage, Selah Chamberlain, Julius Wadsworth, Walter S. Gurnee, H. S. Taylor, James Buell, S. S. Merrill, F. A. Mueller, N. A. Cowdrey, James G. Garner, Levi P. Morton, Elias L. Frank.

General Manager.—S. S. MERRILL, Milwaukee.

Sec. & Treas.—R. D. JENNINGS, Milwaukee.

Ass't Sec. & Transfer Agent.—JAS. MCKINLAY, New York.

Auditor.—J. P. WHALING, Milwaukee.

Purchasing Agent.—R. WASON, Milwaukee.

☞ The surveyors of Stewart's Central Railroad of Long Island are searching for a route for a branch road to Amityville. Three routes have been surveyed. One follows the line separating Suffolk County from Queens County, leaving the main road near Farmingdale; the second follows the West Neck road, terminating near the Southside Railroad depot; the third through Darynane, near the Farmingdale road, with a depot on Dixon avenue.

☞ The work of completing the Bucksport and Bangor (Me.) Railroad will be commenced at at once, the necessary funds having been raised.

Commerce of New York.

The foreign imports at New York for the month of June 1873 and 1874, are officially stated as follows:

	1873.	1874.
Entered for consumpt'n.	$10,797,542	$13,011,657
Do. for warehousing....	10,936,589	11,408,659
Free goods.....	6,463,404	8,384,104
Specie and bullion	950,051	188,356
Total entered at port...	$29,147,586	$32,987,776
Withdrawn fr. wareh'use	8,972,554	7,732,285

The foreign imports at New York for six months from January 1, were:

	1873.	1874.
Entered for consumpt'n.	$94,888,863	$90,222,199
Do. for warehousing...	71,973,195	65,490,757
Free goods.....	51,394,219	60,349,392
Specie and bullion.....	2,791,705	2,510,650
Total entered at port....	$221,047,982	$218,572,998
Withdrawn fr. wareh'se.	63,842,246	57,063,661

The foreign imports at New York for twelve months ending June 30, were:

	1873.	1874.
Entered for consump..	$183,093,987	$165,478,543
Do. for warehousing..	137,809,234	116,407,703
Free goods	91,862,826	95,880,050
Specie and bullion.....	7,608,335	18,324,556
Total entered at port..	$420,374,032	$396,090,852
Withdrawn fr. wareh'se.	153,872,861	113,783,469

The following is a description of imports for the year ending June 30:

	1873.	1874.
Dry goods.....	$125,086,690	$106,706,644
General merchandise..	287,679,007	271,059,652
Specie and bullion....	7,608,335	18,324,556
Total imports....	$420,374,032	$396,090,852

The duties received at New York for twelve months ending June 30, were:

	1873.	1874.
Six months.....	$64,398,092 93	$53,535,419 05
January.....	10,763,626 44	10,042,084 05
February.....	12,893,637 89	10,186,365 08
March.....	12,101,274 64	10,798,792 81
April.....	9,826,491 32	9,696,770 71
May.....	8,862,528 38	8 869,597 45
June.....	7,533,957 98	7,899,248 17
Fiscal year.....	$126,374,609 58	$110,423,272 32

The exports from New York to foreign ports in the month of June, were:

	1873.	1874.
Domestic produce.....	$23,225,558	$28,275,416
Foreign free goods.....	106,465	247,428
Do. dutiable.....	1,111,803	725,265
Specie and bullion.....	6,655,996	7,106,958
Total exports	$31,099,322	$36,355,067
Do. exclusive of specie.	24,443,326	29,248,109

The exports from New York to foreign ports for six months from January 1, were:

	1873.	1874.
Domestic produce.....	$133,403,183	$138,165,775
Foreign free goods.....	1,256,069	1,146,252
Do. dutiable	4,828,629	4,119,582
Specie and bullion.....	27,819,284	29,618,666
Total exports	$167,307,165	$173,050,275
Do. exclusive of specie.	139,487,881	143,431,609

The exports from New York to foreign ports for twelve months ending June 30, were:

	1873.	1874.
Domestic produce.....	$258,436,562	$293,469,949
Foreign free goods.....	2,174,992	1,997,436
Do. dutiable.....	9,277,141	8,721,748
Specie and bullion.....	62,663,427	50,459,043
Total exports.....	$362,552,122	$354,648,176
Do. exclusive of specie.	269,888,695	304,189,183

Michigan and Ohio Railroad.

Mr. James S. Gibbs, President of the Michigan and Ohio railroad, writes from Buffalo, New York, that the line down the Scioto Valley will be in running order by the first of next January. If such should prove the case, it will be but a short time before our business men are lamenting the fact that they sat still in their stores, instead of encouraging, ever so lightly, the repeated efforts of a few of our citizens to build a road from here to the mineral regions, which would bring business and trade to their doors, and could be controlled by them; and allowed outsiders to run their trade off to Columbus.

The Circleville and McArthur railroad will bring us business, build up our town, and make us independent of Columbus or anywhere else, even if the Valley road is built; without it, and with a road up and down the Scioto Valley, Circleville will be but a suburb of Columbus.—*Circleville Herald.*

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of June, were:

ENTERED FOR CONSUMPTION.

	1873.	1874.
Manufactures of wool.....	$686,062	$771,559
" cotton...	646,812	647,085
" silk	560,147	1,195,418

The imports of foreign dry goods at New York for each month of the fiscal years ending June 30, 1872, 1873 and 1874, have been as follows:

	1872.	1873.	1874.
July	$10,247,622	$10,657,923	$9,163,691
August ..	19,632,708	21,055,838	15,345,589
Sept.....	12,194,996	11,519 654	10,909,897
October .	8,611,975	7,152,365	6,612,745
Nov.....	7,977,509	5,649,893	5,503,072
Dec.	6,019,589	5,576,436	3 150,940
January..	12 967,922	12,777,993	8,815,674
February.	17,559,528	16,882,878	13,481,918
March...	17,917,463	14,936,595	12,618,999
April....	11,231,677	8,594,821	8,505,351
May	9,821,272	6,151 043	7,447,629
June.....	5,721,641	4,131,241	5,151,189
	$139,903,902	$125,086,690	$106,706,644

The following is a recapitulation of the foregoing tables, and shows the comparative value of each class of foreign dry goods entered at the port of New York during the fiscal years ending June 30—

	1873.	1874.
Manufactures of wool...	$40,241,260	$36,817,376
" cotton...	27,508,924	22,070,867
" silk.....	30,170,056	24,728,400
" flax.	17,656,774	15,346,921
Miscellaneous dry goods	9,509,676	8,248,580
Total imports	$125,086,690	$106,706,644

The imports of foreign dry goods at New York

for each fiscal year (ending June 30) since 1850, have been as follows:

Year.	Value.
1851	$64,618,747
1852	57,221,062
1853	79,192,513
1854	92,889,627
1855	62,918,443
1856	85,898,690
1857	92 669,088
1858	67,317,736
1859	93,549,083
1860	107,843,295
1861	83,310,345
1862	88,155,720
1863	61,963,037
1864	83,234,966
1865	49,853,939
1866	137,055,884
1867	103,407,278
1868	77,254,182
1869	92,499,842
1870	96 414,276
1871	126,123,210
1872	139 903,902
1873	125,086,690
1874	106,706,644

Pennsylvania Railroads.

The following is an abstract from the report of the Hon. Harrison Allen, Auditor General of Pennsylvania, just issued:

Authorized capital	$515,868,954
Capital stock paid in	478,701,878
Funded Debts	378,590,370
Floating Debts	30,520,052
Cost of roads and equipment	621,312,048
Length of main lines, miles	8,401
Length of double track, miles	1,819
Length of sidings, miles	2,218
Length of branches, miles	1,597
Value of real estate owned	$25,821,727
Miles run by passenger trains	26,488,819
Miles run by freight trains	69,685,408
Miles run by coal trains	9,818,925
Through passengers carried	4,382,694
Passengers, all classes	39,541,800
Anthracite coal, tons	30,050,083
Bituminous coal, tons	12,764,292
Petroleum, tons	3 558,426
Pig Iron, tons	1,523,418
Railroad Iron, tons	556,117
Other Iron, tons	1,091,247
Iron and other Ores	4,372,439
Other Freight	41,506,421

RECEIPTS.

From Passengers	$28,350,040
" Freight	107,438,075
" Mail and Express	3,400,953
" Use of Cars	771,911
" Miscellaneous	8,039,235
Total Receipts	$147,995,214

This does not embrace upwards of 1,000 miles of colliery railroads, both above and below the water level in the Anthracite Coal Regions of the State. There are nearly 500 miles of these roads in Schuylkill County alone.

There is a separate table relating to accidents in the year, the footings up of which are as follows:

	Killed.	Injured.
Passengers	27	166
Employes	254	665
Others	295	281
Total	576	1,112

As seen in the previous table, the number of passengers carried was 39,541,800, and of this enormous number only 27 were killed and 166 injured. Even the total number of casualities, including those of employes and persons who suffered from sheer carelessness, is a most insignificant percentage.

Flushing and North Side Railroad.

It is plainly the interest of the owners of the road to extend it on to Huntington, and it is equally as plain that the cheapest route, so far as cost of construction is concerned, is to run in as direct a line as possible to Barren Beach, and thence up the valley on the east side of the harbor at Glenwood, to Glen Head, and through Greenvale and East Norwich. This route cuts off Port Washington, Roslyn, and Glen Cove, the three principal marts of business east of the Manhasset churches, but secures the immense passenger traffic developing at Sea Cliff Grove, which railroad managers are prone to believe is about all worth making an effort to secure on the line of the extention. Sea Cliff is the objective point and when the road is extended it is sure to tap it. The traffic here lasts but three months. During nine months of the year it would hardly pay to stop the cars at this place. At Port Washington, Roslyn and Glen Cove, there is a steady tide of passengers and freight the year through, and the net earnings of the road from these places would far exceed the three months' rush to Sea Cliff. For instance, at a low estimate the annual passenger and freight traffic of these places amounts to:

Glen Cove	$150,000
Sea Cliff	100,000
Roslyn	80,000
Port Washington	50,000
Total	$380,000

It is safe to say that the quick transit, cheaper rates and superior accommodations of a north side railroad would divert to it more than two-thirds of the amount named, or say in round numbers:

Glen Cove	$100,000
Sea Cliff	70,000
Roslyn	50,000
Port Washington	40,000
Total	$260,000

And it will be seen at once that the "direct route to Sea Cliff alone" involves a loss of income to the road of about $200,000 per annum, or almost enough in the first year to cover the additional cost of construction to the places named.—*Glen Cove Gazette.*

Santa Rosa Branch.

At a recent meeting of the stockholders of the Santa Rosa Branch Northern Pacific Railroad Company the following directors were elected: W. S. M. Wright, George A. Tupper and A. T. Farmer, of Santa Rosa, and John F. Kessing and L. B. Latimer. The Directors elected the following officers for the first year: John F. Kessing President, W. S. M. Wright Vice President, E. T. Farmer Treasurer, W. W. Morrow, Secretary, and L. B. Latimer Attorney. The Treasurer was authorized to open books for the subscription to stock at Santa Rosa. The survey of the road will be commenced immediately. This road will be from twelve to fifteen miles in length and connect with the North Pacific Coast Railroad either at Freestone or Valley Ford. The President and Attorney were authorized to confer with the Directors of the North Pacific Coast Railroad Company and arrange in regard to connections, passage and freights and other matters relating to the connecting lines. The Directors expect to have this road completed by the time the main line is finished from Sancelito to the point of connection.—*San Francisco Chronicle.*

☞ The Governor and Council of Massachusetts have appointed the following named gentlemen Trustees of the Hoosac Tunnel Railroad: Hon. A. H. Bullock, Worcester; Hon. Samuel C. Cobb, Boston; A. W. Beard, Boston; Hon. P. A. Chadbourne, Williamstown; Hon. S. M. Crosby, Northampton,

Signal Ropes.

Railroad companies are taught by experience how to guard against accidents, though they do not always avail themselves of the lessons. They have (except in a few instances) taken no effective means to guard against the burning up of wrecked trains by the overturning of red hot stoves in winter or the breaking of petroleum lamps at all seasons; nor have they done what is within their reach to protect the public against "switch" accidents. We have now another lesson. Two occupants of a mail car came near being burned to death on the Manasses (Virginia) Railroad. The contents of the car took fire, and they were unable to give the signal to stop the train because the signal rope was burned. This again indicates what was long ago plain enough that the signal line for a railway train should not be a combustible cord. Tiller ropes on board ship had to be discontinued by law a great while ago, because they were among the earliest things destroyed when a ship took fire, their destruction leaving the ship helpless at the mercy of the other elements. Ropes gave place to chains and iron cables, on shipboard, but the combustible cord is still used on railway trains, notwithstanding the many lessons of experience.

☞ The earnings of the Indianapolis, Cincinnati and Lafayette railroad for May, 1874, were $144,871, the expenses $99,064, and the net earnings $45,807. For May, 1873, the earnings were $167,293, the expenses $119,847, and the net earnings, $47,446. For the first five months of 1874, the earnings were $728,750, the expenses $482,762, and the net earnings $245,988. For the first five months of 1873 the earnings were $743,038, the expenses $611,043, and the net earnings $131,995—showing a decrease in earnings of $14,288, with a decrease in expenses of $128,281, making the increase in net earnings $113,993.

☞ The decision of the Supreme Court of Texas in the International Railway case was upon an application of the company for an order to compel the comptroller to sign bonds to be issued to the railway by the State. The court gave no opinion on the merits of the case, but simply decided that it had no jurisdiction to issue a mandamus against an executive officer. Two of the five judges dissented.

☞ It is stated on good authority that the Texas and Pacific Railroad will resume its work in Texas and California as soon as bonds can be negotiated on the portions of the road completed, according to the act of Congress recently passed, which enables them to issue bonds in such manner, instead of upon the whole line of the road, as provided in the original Act.

☞ Colonel H. D. Whitcomb, late chief engineer of the Chesapeake and Ohio railroad, has been selected by the committee of the James river improvement to fill the position of chief engineer of that work, recently vacated by the death of Major Turpin.

☞ The Richmond *Dispatch* says there is no truth in the rumor that the western part or any other part of the Chesapeake and Ohio Railroad is to be transferred to the Baltimore and Ohio Railroad or any other railroad.

☞ Railroad fares on all the lines in Germany are to be increased twenty per cent, on and after the 1st of August.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, July 25, 1874.

Stock Exchange and Money Market

The Money market has been ruling quite easy, through the week, on the basis of 2@3 per cent on call, and 5@7 per cent per annum, in the discount form. The demand for aid has been comparatively moderate, and has been met with promptness, by the banks, as well as by private lenders at the current quotations. The supply of funds seeking employment has been largely ahead of the requirements of borrowers, as has been the case for months past. The Stock Exchange and Gold Board movements have not been sufficiently brisk, to make the inquiry from this source of more than average mid-summer importance. The Street talk has been, in good part, about the bidding for the new issue of the five per cent Funding Loan, which bidding was to have been brought to a formal decision on Thursday of the current week. The City banks, last week, reduced their deposit and enlarged their specie averages, while contracting their loan and discount line. They augmented their reserve of legal tender moderately, while diminishing their item of circulation slightly. The U. S. Sub Treasury reduced its currency reserve, while also cutting down the specie balance, the latter, in part, through the coin interest disbursements. The City banks, last week, while increasing their reserve of legal tender notes $518,600, reduced their deposit item $512,000, and added $379,900 to their specie average. They also report a decrease of $1,773,400 in the oans and discounts, and of $196,200 in the circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $53,821,698 against $56,601,431 the preceding week; and a coin hoard of $48,847,735, against $49,861,755 on the previous return. The City bank exchanges, during the week, were $386,300,411, or a daily average of $64,383,402. The customs revenue of the port, during the week, was $2,003,305 of which $1,898,305 were in coin certificates. The City banks reported their average of gold last week at $27,755,300, and their greenback average at $61,853,700. Their deposits stood at $242,983,600. The loan item was about $285,315,000. The circulation was $25,727,500.

The cash balances of the Treasury Department on Wednesday were: Currency, $13,285,343; special deposits of legal tender for redemption of certificates of deposit, $61,365,000; coin, $70,852,628; including coin certificates, $32,909,900.

The outstanding amount of legal tender notes is now definitely established by law at 382 millions. The National bank circulation is considerably under 350 millions.

Gold has been ruling rather firmer, on a lighter offering; but has not been remarkably active, the speculative movement having been moderate; while the customs and export drains have been on a limited scale. The extremes of the price have been 109¾@110¼, closing at 109⅞, as against 109¾ on Wednesday of the preceding week. The specie outflow, last week, was only $484,628. The imports of specie at this port since Jan. 1, have been $2,565,819, against $1,962,011 same time last year. The customs demand for Gold last week averaged $347,333 a day. Foreign Exchange has been in quite moderate demand at about previous prices. Bankers' sixty day bills on London closed on Wednesday at $4 87@4 87⅛; sight bills on London at $4 89½@$4 90 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,808,096.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,858,478.

Government securities have been in more demand, chiefly for investment purposes, and have been held with more firmness.

U. S. sixes of 1881 closed on Wednesday of this week at 118@118½; U. S. Five-Twenties of 1862, 113⅛@113⅛; U. S. Five-Twenties of 1864 at 115½@116; U. S. Five-Twenties of 1865, 117@117½; U. S. Five-Twenties of 1865 consolidated, 116⅜@116½; U. S. Five-Twenties of 1867, 117½@117⅝; U. S. Five-Twenties of 1868, 117½@118; U. S. Ten-forties at 113@113⅛; U. S. Fives of 1881, (Funding Loan) 112¾@113; Six per cent. currency Sixes from 117¼@117½.

State and Railway bonds have been in limited request at about previous rates. Railway and miscellaneous share property has been less freely dealt in, and quoted lower and weak in most instances.

General business has been much brisker in the line of domestic produce, but values of Breadstuffs and Cotton have generally favored buyers; while Provisions, Naval Stores, Wool, and Tobacco have been held with more confidence. In foreign merchandise, there has been more animation but at variable rates. The Metal trade has been more active. Pig Iron has been in better demand with sales reported of 400 tons Scotch, and 2800 tons American. Eglinton Pig Iron quoted at 33 50@$34. Glengarnock, $35, Sumerlee, $36; No. 1 American Pig at $31@$32. No. 2 do. at $29@$30; Forge, $26@$28; English Rails at $50@$52, gold; American Rails at works, $56@$60; Old Rails, $36@$40 Wrought Scrap, $38@40. Ocean Freights have been more active, but easier as to rates; demand as last week, mostly from Grain, Petroleum, Provision and Tobacco shippers.

The following quotations of sales of Railway and other securities are in addition to those giver elsewhere in our columns:—

Long Island Railroads.

The stockholders of the Flushing and North Side Railroad Company, Central Railroad Company of Long Island, Central Railroad Extension Company, North Shore Railroad Company, North Shore and Port Washington Railroad Company, Roslyn and Huntington Railroad Company and Whitestone and Westchester Railroad Company met on the 20th inst., and voted, almost unanimously, in favor of consolidation. Out of 16,001 shares, composing the total stock of these companies, 13,267 shares were represented. The above roads are all owned or leased by the Flushing and North Side Railroad Company, and represent about fifty seven miles of road; starting at Hunter's Point they touch the following principal places on Long Island: Flushing, College Point, Whitestone, Bayside, Great Neck, Creedmoor, Garden City, Hempstead, Farmingdale, Babylon, and Fire Island. It is now proposed to extend the line along the north shore of the island, 24 miles, from Great Neck, to Huntington, and construct a branch of six miles from near Manhassett to Port Washington and Sand Point; also to complete the road from Whitestone to the dock to connect with the Boston steamers.

☞ Under the general railroad law of New Jersey articles of association have been filed with the Secretary of State, at Trenton, for the construction of the Timber Brook Railroad. The road is to be twelve miles long, and is to run from a point on the Morris and Essex Railroad at or near Port Oram, in Morris county, to a junction with the Green Pond Railroad at or near the mines of the Timber Brook Iron Mining Company, in Rockaway township, in Morris county. The capital stock is $200,000.

☞ Mr. Robert Thompson has been elected President of the Philadelphia and Erie Railroad Company. The earnings of this road for June, 1874, were $312,032, the expenses, $234,708, and the net earnings $77,324. In June, 1873, the earnings were $354,396, and the expenses $387,718, showing a loss of $33,322. It will be seen that while there was a decrease in gross earnings of $42,364, there was also a reduction in expenses of $153,009, making the increase in net earnings $110,645.

Railroad Switches.

The Connecticut Switch, which, being misplaced, threw a train of cars from the track near New Haven, Connecticut, had attached to it a device intended to prevent such accidents. The switchman was obliged to enter a round-house and close the door in order to shift the switch, the latter being connected with the door. The object of this arrangement was to compel the switchman to remain at his post as long as the main track was open. The window of the round-house was so situated that the switchman's range of view was confined almost entirely to the switch points, so that he was in a measure compelled to pay attention to his duty. But, after all, the reliability of the switch depended upon the switch-tender, and the Coroner's jury, after the recent accident, found the switch to be in perfect order and the man presumably at fault. The superintendent of the road, who lost his life by the accident, is said to have been a careful, experienced and able railway official, and might have continued to be such if his experience had led him to the switch which does not depend for its safety on impatient, careless or sleepy switchmen.

☞ The sale of the Queen Anne's and Kent Railroad took place at Centreville, Md., on the 14th inst. The entire road, twenty six miles long, in complete order, and with a first class engine, was bid in by the agent of the bondholders for the sum of seventy five thousand dollars, this being about one sixth of its original cost. The road has been doing a good and constantly increasing business, and has paid off all its floating debt, but having been unable to meet the interest on its bonds, has changed owners. An effort will now be made to extend it to Chester river, and secure a steamboat connection with Baltimore, by which its trade will be so increased as to render it a highly profitable investment.

☞ The Baltimore, Catonsville and Ellicott's Mills Passenger Railway Co. will receive, until August 4, sealed proposals for relaying one and one eighth miles of railway track, including Switch, on the present bed of the Road, from its depot on West Baltimore street, to Gwynn's Falls Bridge. Iron to be T Rail, and weigh 30 lbs. to the yard. Contractors to furnish all Materials, and do all work connected therewith. Payment in cash on completion of the work. Specifications furnished upon application to John C. Holland, President, Baltimore, Md.

☞ In the case of the Union Trust Company of New York v. the Rockford, Rock Island and St. Louis Railroad, in the United States Court, to foreclose $9,000,000 of trust deeds against the company, and for the appointment of a receiver, Judge Blodgett has dismissed the bill, on the ground that a necessary number of the bondholders had not joined in the request to foreclose as to former defaults in interest; also that the bill was prematurely filed as to the default of Feb. 1, 1872.

☞ The directors of the Grand Rapids and Indiana Railroad Company, elected on the 15th inst., are: W. O. Hughart, Grand Rapids, Michigan; J. G. Wait, Sturgis, Michigan; P. Hoagland, and F. P. Randall, Fort Wayne; M. Talcott, Chicago; J. N. McCullough, Thomas E. Messler and Wm. Thaw, Pittsburg; Thomas A. Scott, George B. Roberts and J. O. Green, Philadelphia; R. B. Potter, New York; H. J. Jewett, Columbus, Ohio.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending July 11, at 261,033 tons, and for the coal year 9,318,368 tons against 9,676,558 tons to corresponding time last year, being a decrease of 358,190 tons. The bituminous tonnage for the week is 69,806 tons, and for the year 1,638,967 tons, against 1,576,947, tons to same time last year, giving a total of all kinds for the week of 330,839 tons, and for the year of 10,957,335 tons, against 11,253,505 tons to same time last year, being a decrease of 298,170 tons.

☞ The Baltimore Bridge Company, of Baltimore, Md., have received a contract to build two iron bridges for the Lima and Huacho railroad, of Peru. Each bridge will consist of two spans, each span sixty feet in length. In all the Baltimore Bridge Company have constructed thirty-one bridges for different corporations in South America, one of them being more than 500 feet in length and at one point 252 feet in height.

☞ The Salisbury, (Wicomico county, Maryland,) Eastern Shoreman says that it is rumored that a bill has been filed in chancery for a receiver to be appointed for the Eastern Shore Railroad Company. Until within a year or two it was operated by the latter company, but its lease expiring the Eastern Shore Railroad Company assumed the management of the road itself.

☞ The Chippewa Valley and Red Cedar Railroad Company was organized at Eau Claire, Wis., on the 8th inst., by the election of a board of directors with Wm. Wilson as President, O. H. Ingram Vice President, and H. C. Putnam Treasurer.

☞ Ichabod Goodwin has been elected President, John B. Parker Treasurer, and Wm. H. Y. Hackett Clerk, of the Eastern Railroad Company of New Hampshire. The directors are: Ichabod Goodwin, W. H. Y. Hackett, Robert W. Hooper, F. A. Choate and John Wooldredge.

☞ The capital stock of the Cincinnati and Baltimore Railroad company has been increased $450,000, to make the full amount $1,250,000, for the purpose of completing the road and paying off its indebtedness.

☞ A survey for a branch road to the Hot Springs, leaving the main line of the Cairo and Fulton Railroad thirty one miles south of Little Rock, has been completed by the St. Louis, Iron Mountain and Southern Railroad Company.

☞ On the first of July the park tax of the different street railways of Baltimore, which was one fifth of their gross earnings, was reduced to twelve per cent., that reduction having been made by the city council a short time since.

☞ The total coal shipments on the Monongahela Slack Water for the six months ending June 30, 1874 were 45,795,500 bushels, against 37 065,595 for the corresponding period of the previous year—an increase of 8,729,905.

☞ At a special meeting of the directors of the Erie Railway company held on the 21st inst., Mr. Stephen Little was appointed Auditor.

☞ Work on the Bucksport and Bangor Railroad has begun in earnest, a large gang of workmen being employed.

☞ We learn that the Northern Central Railway Company has secured control of the Green Spring Branch road, by purchase or lease, and now operate it.

☞ The Lake Shore and Tuscarawas Valley railroad has been placed in the hands of E. B. Thomas as receiver.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

Union Pacific Railroad.

The Union Pacific Railroad Company make the following statement concerning the bonds they are offering to the public:

As the income bonds of the Union Pacific Railroad mature in September next, the company are offering to the holders of those bonds the privilege of exchanging them for an eight per cent. 20 years sinking fund bond, in the ratio of six of the new issue for five of the incomes. The new bonds are a third lien (following those of the 1st mortgage and of the government) upon the road, its franchises and equipment. They are also a second mortgage upon the entire unsold lands of the company; and when the land grant bonds have been liquidated, they will constitute a first lien upon the lands. The original issue of land grants was $10,400,000, of which amount only $5,575,000 remain to be provided for out of sales of lands. The company estimate that further sales of 1,250,000 acres will suffice for this purpose, when about 10,000,000 acres will remain, on which the sinking fund bonds will be a first mortgage. None of the mineral and coal lands—which are regarded as the most valuable part of the land grant—have yet been placed upon the market; and as the lands hitherto sold have brought, on the average, $4 56 per acre, the value of this security may be hence inferred. Considering that the new bonds are thus secured, while the incomes have no security beyond the promise of the company, and that the sacrifice of interest involved in the proposed exchange is quite nominal (about $10 in $250), it seems probable that the conversion will be generally accepted by the income bondholders, and this probability is countenanced by the fact that the directors, who should best understand the merits of the new bond, have already made exchanges to the extent of over three millions of dollars.

Erie Railway.

Attorney General Pratt has given a decision on the application of John C. Angell against the Erie Railway Company. He expresses the opinion that the complainant has failed to sustain his allegations of corruption and willful violation of the law on the part of the officers of the company. The high character of the members of the Board of Directors for honesty and integrity is too well established to warrant any such suspicion. Still, the Attorney General is not convinced that the company has not transcended, in several respects, its powers under the charter and laws. At least there is so much doubt on the question that he deems it best that it be settled by the Courts.

The charge that the purchase of the stock of the Buffalo, New York and Erie Railway was made in the interest of the directors is disproved, but the Attorney General finds no authority under the charter or elsewhere authorizing the company to purchase the stock and give its notes therefor.

As to the purchase of the coal lands or stock in coal companies the Attorney General has not been able to satisfy himself that the Erie Company has any such authority, expressed or implied. As coal is an article of merchandise, for sale at all places of any importance, it is not necessary for the legitimate business of the road that it should mine its own coal.

As to the power of the company to lease the Atlantic and Great Western Railway, the Attorney General has found no such power in the charter or statutes of the State; that a domestic corporation may lease and run a railway in another State raises a serious question of corporate power, which should be speedily determined by the Courts.

As to the dividends, the allegation of intentional wrong is not disposed of, but the Attorney General is not satisfied that the finances of the company were such as to authorize the dividends in question. The questions examined are sufficient to authorize the commencement of an action. As the directors have acted in good faith, the management of the business of the corporation may safely be left with them pending litigation. The Attorney General in assenting to the commencement of an action will feel it his duty to see that the proceeding are conducted so as to occasion as little inconvenience to the business of the company as possible.

Steam Whistles.

DECISION OF THE MASSACHUSETTS RAILROAD COMMISSIONERS ON THE COMPLAINT OF NUISANCE.

This complaint came before the Board on the application of the Mayor and Aldermen of the city of Boston, under the provisions of Section 6, Chapter 408, of the acts of 1869. It related to the alleged excessive use of the steam whistle in the operation of railroads within the limits of that city. The original petition emanated from citizens of Boston living on the line of the Boston and Providence Railroad; but in the course of the hearing additional complaints were presented and evidence offered relating to the same practise on other roads; the conclusions and recommendations of the Board become applicable, therefore, to all the corporations operating railroads within the limits of Boston, which make use of the whistle in the manner complained of.

This cause of complaint has heretofore occupied the attention of the Board and was discussed at some length in its fourth annual report (1873, p. 25). At that time it was so severely felt by the residents in certain localities that a reward of $10,000 was offered by Mr. Amos A. Lawrence of Brookline, for the discovery of any satisfactory substitute for the locomotive whistle. Even that large sum failed to produce what was desired. The present, however, is the first case in which the matter has been regularly brought before this Board for formal action, and until it was so brought and the complaint sustained by some evidence of a general public feeling it was impossible for the Board to act effectively in regard to it.

The cause of the complaint is obvious. In the early days of railroads the whistle was resorted to as the readiest, simplest and most affective method of signalling at the command of those in charge of a train. It was used on every occasion, and the corporations gradually assumed its constant use on their premises as their prescriptive right. For many years the population along the lines was comparatively sparse; the number of trains, especially at night, were few, and the annoyance was not greatly felt. Gradually all the conditions altered. The population became dense, the number of trains increased, crossings at which the use of the whistle was by rule prescribed were multiplied, the practise of walking on the tracks became more common, the sound of the whistle

was augmented both in volume and shrilliness, until at last, in certain crowded localities, the practice degenerated into a nuisance which in summer became almost unendurable. A blast of the whistle on an average every three or five minutes was at certain points not uncommon, and on some parts of certain roads the standing order was for every engineer to make all the noise he could. That such a system should have been tolerated as long as it has is sufficiently remarkable; the fact can only be explained on the ground of the gradual increase of the practice in a community so accustomed to it as to regard it as a necessary evil.

To a certain degree the evil, also, is a necessary one; but it certainly should be confined strictly within the limits of necessity. These limits have to be ascertained and the recommendations of the Board made to conform to them.

The whistle is now commonly used for four purposes:

First.—As a precautionary warning against a possible danger.

Second—To notify employes at stations or crossings of the approach of a train.

Third—As a direction of train movements.

Fourth—As a strict danger signal.

The first use, that of a precautionary warning against a possible danger, would seem to be wholly unnecessary. Loud and long blasts are, by standing order, habitually given at certain points where the track is hidden or much frequented, to warn possible trespassers of the approach of a train. This is a simple abuse of the signal. The whole community peaceably and legally in their dwelling places are disturbed that possible trespassers may be saved from the consequences of their own reckless and illegal acts; even so far as these last are concerned, the constant use of the danger signal destroys its value where really needed. There is no good reason for a continuance of this practise.

The second use—that to notify employes of the approach of trains—is equally unnecessary. At crossings the law prescribes the use of the whistle or the bell. Certain of the corporations claim that, as the whistle is more effective than the bell, they are forced to use it in self-protection; as in case of accident they are almost uniformly cast in heavy damages unless they can show that they gave the utmost notice which it was in their power to give. This argument is entitled to some weight. Juries are inquestionably very severe on railroad corporations in cases of accidents at crossings, and in the present case it is only just that, in discontinuing the practise of whistling at these points and confining themselves to the use of the bell, the corporations should be able to show, in any future exigency, that they did so with reluctance, and only in obedience to a strongly expressed public opinion and the direct recommendation of this Board. At the same time crossings in all crowded neighborhoods are, or should be, protected by gates or flagmen, and to those not so protected this recommendation does not apply. This covers the case of the outside public at crossings. So far as notice to employes of the approach of trains is concerned, the use of the whistle in crowded neighborhoods is a single relic of the crude expedients made use of in the past. Either employes should see or hear the approaching train to prepare for it, or they should be notified by electric signals. The latter system is the most effective, and will without question ultimately grow into general use. It is very generally employed elsewhere, especially in Europe, and gives the only reliable notice for employes and the public. It is, however, wholly out of the question that the corporations should, until they are ready to adopt this system, habitually disturb whole communities in order to attract the attention of their own servants. There is no pretence that in this case the use of the whistle is compelled by law. It is a mere matter of convenience to the corporations, which is insisted upon only in utter disregard of the comfort and rights of the public.

As a train signal, the use of the whistle continually degenerates into abuse. The introduction of the train brake has obviated the necessity of it on passenger trains, except as a danger signal. On freight trains its use is still necessary in a limited degree.

Finally, as a danger signal, when properly used, the whistle is and will always remain a most important adjunct in the operation of railroads. Its value in this respect is now greatly impaired by its promiscuous use on all occasions; but if it were rigidly reserved as a special signal, no cause of complaint could exist. At present it may well be questioned whether, in its effect on invalids and horses, the whistle as now used does not occasion a greater loss even of human life than would ensue from its total suppression on all locomotive engines.

In accordance, therefore, with the present petition and the evidence adduced in support of it, this Board recommends to the railroad corporations the disuse of the whistle within the limits of the city of Boston and other crowded neighborhoods on their lines of road, except in the strictly necessary management of freight trains and as a signal of danger. If the corporations find that they cannot rely upon sight or hearing, but must in some way notify employes at crossings and stations of the approach of trains, the Board would then suggest the adoption of a system of automatic signals for that purpose. Recent improvements have made these as affective and reliable in winter as in summer, and their general adoption is a mere question of time. The Board has the less hesitation in arriving at these conclusions and making the foregoing recommendations in view of the fact that they suggest no novel experiment.

The Boston and Albany corporation has, at the request of the residents along its road, discontinued the use of the whistle except as a danger signal for nearly two years without experiencing any evil consequences. Those dwelling on the line of that road expressed themselves in the hearing as satisfied, and the number of accidents has not been increased. Its officers also speak of the experiment, without the use of automatic signals, as an established success. These signals are, however, in use on the Eastern road, the manager of which, at this hearing, testified to their efficiency. The evidence in the present case is therefore conclusive both as to the existence of a serious and growing annoyance and to the fact that it had been obviated on one line of road without detriment to it or the public; and this, too, without the adoption of the supplementary system of signals which elsewhere has long since been in established use.

CHARLES F. ADAMS, JR.,
A. D. BRIGGS.
F. M. JOHNSON,
Railroad Commissioners.

Fall River Railroad.

A company has been organized at New Bedford, Mass., for the purpose of constructing a railroad which, it is said, will afford more direct communication between that city and Fall River. It is to commence at Braley Station, eight miles from New Bedford, on the New Bedford Railroad, and will terminate at the top of the hill in Fall River without connecting with the Old Colony road. The new road will be about eight miles long. The stock is subscribed to the amount necessary for commencing work, and the route is being surveyed. Parties interested say the road is to be built without delay. If this is accomplished, the project for a railroad from New Bedford direct to Fall River, which has been actively canvassed for a year past, will probably be abandoned. The name of the new organization is the Fall River Railroad Company, and the officers are as follows: President, J. A. Beauvais; Directors, J. A. Beauvais, John H. Perry, Lewis S. Judd, Benj. H. Waite, George Wilson, Lemuel M. Kollock, Charles R. Tucker, George B. Phillips, Geo. A. Bourne; Treasurer and Clerk, Thomas B. Fuller.

Cincinnati, Richmond and Chicago R. R.

The receipts of this company for the year ending March 31, 1874, were as follows:

From passengers		$72,982 80
" freight		130,070 28
" mails and express		9,966 78
" miscellaneous		216 96
		$213,176 33
Expenses, viz:		
Maintenance of way	$35,084 07	
Locomotive power	27,167 67	
Train expenses	28,758 80	
Station expenses	9,877 70

Improvement in the Iron Business.

Prices of iron, it is now believed, says the Reading (Penn.) *Times and Dispatch*, "are about to show a steady advance, and the reason for this belief is based upon the rise during the last few days of bar-iron to three cents per pound. It is asserted that the tide which had been setting in against the manufacturers so persistently has now definitely turned, and that the active demand which exists at present is not likely to diminish. As an evidence of the high anticipations formed, one of the largest Philadelphia producers who has just received an order for 1,000 tons to be delivered after September next, has refused to fill it from the fact that a further advance would take place before that time. Those who needed iron have not been buying lately expecting a lower figure would be touched, but it is now established

beyond doubt that the mill men have been acute in their predictions, and have raised prices at an opportune time. Some believe this rise of price is a mere "spurt," but it has a tendency to make dealers sanguine of a renewel of brightness and activity in the business. Though the Cambria Iron Works, Johnstown, are not producing two-thirds of the former amount of material, and the Schuylkill and Lehigh Valley furnaces have iron piled up waiting a demand, the Bethlehem Iron Company are running to their full capacity. On the whole, there is a slightly improved aspect of the business, and there is reason for believing that the trade will soon show signs of returning prosperity, at least if the energy which has just developed itself increases with the expected celerity."

Dayton and Michigan Railroad.

The income of this company for the year ending March 31, 1874, was as follows:

From passengers		$332,476 51
" freight		700,196 70
" express and mail		42,688 49
" miscellaneous		7,172 41

President.—FREDERICK H. SHORT.
Vice President.—CHARLES W. WEST.
Directors.—William Goodman, H. D. Huntington, F. H. Short, Charles W. West, George T. Stedman, Joseph H. Rogers, Oliver Perin, Samuel Fosdick, Henry Lewis.
General Sup't.—LEWIS WILLIAMS.
Assistant Sup't.—JOHN H. WELLER.
Secretary & Treasurer.—C. B. MARSH.

Junction and Breakwater Railroad.

It has been officially announced that the Junction and Breakwater Railroad, in Delaware, has passed into the hands of the Old Dominion Steamship Company. This simple announcement is of more importance to the people of this City than at first appears. It is the entering wedge of the Old Dominion Steamship Company into the management of the railroad system of the Lower Peninsula in the interest of the New York market. Since the inauguration of the Old Dominion Steamship Company to the present time, its principal business has been freighting country produce from the truck lands around New York. That business has so increased that it is found necessary to dispatch a steamer every day from Norfolk. It has been a well known fact to the management of the Old Dominion Company that much of the lands of the Maryland and Virginia Peninsula was fully as early as that surrounding Norfolk, and consequently early produce could as well be grown on the eastern as on the western side of Chesapeake Bay, and could be more cheaply carried, as the long contour of the capes of the Chesapeake would be avoided. This Junction and Breakwater Railroad is about forty five miles in length, but by a zigzag route that makes it almost useless when operated in the interest of the Philadelphia, Wilmington and Baltimore road, as it now is. It is highly probable that a portion of the road may be abandoned—that portion north of Georgetown, the county town of Sussex County—or it may be all operated in conjunction with a new road being built from the Choptank River to Harrington, and thus forming a new route between New York and Baltimore by the way of Lewes. The Old Dominion's plan is supposed, by those most interested in its operation in Maryland, to be the opening up of the already built railroads of the lower peninsula by close connection with steamers from Lewes with New York. To do this requires only that seven miles more of railroad shall be built in Worcester County, Md., being the seven miles between St. Martin's, on the Wicomico and Pokomoke Railroad, and Delaware State line. When these seven miles shall have been built the entire Eastern Shore Railroad, sixty miles in length; the Wicomico and Pokomoke, twenty five miles in length, and the Berlin and Snow Hill, twenty miles in length, and forty miles of railroad passing through Delaware, will be brought into direct connection with Lewes. Thus the Old Dominion Company will have secured by this purchase one hundred and fifty miles of railroad which permeates every section of a large and easily cultivated and fertilized country, and a country capable of being made to produce enough fruit and vegetables to feed New York.

Railroads of the United States, 1873.

FROM POOR'S MANUAL OF THE RAILROADS OF THE UNITED STATES, 1874-75.

The total length of line is 66,096 miles, against 57,323 miles for 1872, and 44,614 for 1871. The aggregate cost of the several roads at the end of the year was $3,761,973,822, against $3,159,423,057 for 1872, and $2,664,627,645 for 1871. The increase of cost for 1873 over 1872 was $602,550,265; over 1871, $1,097,345,677. Of the total cost $1,940,638,584 was made up of share capital, and $1,821,334,788 of various forms of indebtedness, chiefly of bonds maturing at a distant day. The proportion of share capital to debt was 51.7 to 48.3. The average cost per mile of all the roads was $56,918, against $55,116 for 1872, and $59,726 for 1871. The total gross earning for the year were $527,291,823, against $468,241,055 for 1872, and $403,329,208 for 1871. The increase of earnings for 1873 was $59 050,268; for 1872, $64,911,857; the total for the two years being $123,962,115. The percentage of increase for 1873 over 1872 was 11.4; for 1872 over 1871, 14 per cent. The percentage of increase in the two years was 30 per cent. Of the total earnings for the year, $387,542,789 were received for the transportation of freight and mails, and $139,748,534 for the transportation of passengers—the proportion of the former to the latter being as 73 to 27. The current operating expenses were $344,437,528, or 65.2 per cent. of the gross earnings. The net earnings were $182,853,765, or 34.7 per cent. of the gross. The latter equalled 14.33 per cent. of the cost of the roads—the net 4.96 per cent. The amount paid in dividends was $59,566,316, or 3.07 per cent. on the aggregate amount of the share capital. The gross earnings per head of population equalled $12.80, against $11.63 for 1872, and $9.80 for 1871. The ratio of total mileage to inhabitants in 1873 was one mile of road to every 582 inhabitants, against one mile to 600 inhabitants for 1873.

The per centage of gross earnings on the total cost of the roads was 14.33, against 15 for 1872, 15.14 for 1871. The rate is 0.67 less than that for, 1872, 0.81 less than that for 1871. The percentage of net earnings upon the cost of the roads for 1873 was 4.96, against 5.20 for 1872, and 5.32 for 1871. The increase of mileage in the two years for which returns are given has been 21,482 miles. The increase of the cost of the roads in the same time has been $1,097,845,677. It was hardly possible that the earnings should increase in ratio to such an enormous expenditure, as two or three years often elapse after its opening before a railroad is in position to do much business, for the want of adequate equipments, or from the unfinished condition of its tracks, or from the want of suitable connection, or from pecuniary embarrassments. On the other hand, the earnings of these works, per head of population, in 1873, was $12.80, against $11.63 for 1872, and $10.22 for 1871. This is a most encouraging feature in connection with these works, as it shows that under ordinary conditions their earnings must increase, for an indefinite period, in a very rapid ratio, more clearly settled—the increase per head in the Eastern States being fully as great as in the Western and more sparsely settled States. At the rate of the past three years the earnings of our railroads will double themselves in the next six years without the construction of an additional mile of line. The population is increasing at the rate of one million annually. By 1880, the earnings of the roads now in operation will probably exceed $1,000,000,000. The percentage of their annual earnings to their cost will come fully up to 20 per cent.—a rate which, with good management, is sufficient to render the whole investment reasonably remunerative. In fact, there seems to be no limit to the increase of earnings, even with a stationary population, provided such population be intelligent, and provided with all the aids to industry which science and art can supply.

One cause for the vast mileage which has been built in the past few years, and of the comparatively low rate of earnings upon the aggregate cost of our railroads has been the extraordinary effort to complete roads to save from lapsing the vast grants made by Congress in their favor. These grants were on condition that the roads in whose favor they were made should be built within a certain number of years. As they were made to nearly 10,000 miles of line, and were supposed to be very valuable, nearly all the roads to which they were assigned have been built. No land grant roads of any considerable length are now likely to be built at all except the Northern and Southern Pacific, each of which have extensive grants in their favor. That a large quantity of land can be found unoccupied in the immediate vicinity of a railroad implies a very sparse population. The land-grant roads were, however, mostly through a prairie soil, which is easily and rapidly brought into cultivation; but some time must often elapse before a population will be found upon them sufficiently numerous to supply a traffic required to meet the immediate calls for interest, or for other objects. Although the lands may be very valuable, experience has shown that they can be converted only slowly into money.

The mileage of railroads in the New England group of States for 1873 was 5,803, against 4,574 for 1872. Their cost was $263,697,778, against $230,609,794 in 1872, and was made up of $141,478,329 of share capital and $122,224,449 of debt. Their average cost per mile was $48,882, against $50,418 for 1872. Their gross earnings were $51,676,688, against $47,519,835 for 1872. Of the gross earnings $20,810,043 were received for the transportation of freight, and $22,358,643 for the transportation of passengers. The percentage of gross earnings to the cost of the roads was 19.6 per cent. The net earnings were $15,061,777, and equalled 2.92 per cent. of such cost. The earnings per head of population equalled $14.30, against $13.53 for 1872. The dividends paid amounted to $9,004,488, and equalled 6.86 per cent. on the total share capital. The ratio of total mileage to population was 1 mile of line to every 685 inhabitants, against 709 for 1872.

The mileage of the railroads in the Middle group of States for 1873 was 12,441, against 11,617 for 1872. Their cost was $1,126,702,107, against $922,700,776, and was made up of $649,503,037 share capital and $477,199,070 of debt. Their average cost per mile was $90,186, against $79,427 for 1872. Their gross earnings were $194,052,302, against $169,205,307 for 1872. Of the gross earnings $152,250,000 were received for the transportation of freight and $42,675,000 for the transportation of passengers. The percentage of gross earnings upon the cost of roads was 17.4. The net earnings were $69,280,585, and equalled 6.22 per cent. of such cost. The earnings per head of population equalled $18, against $15.86 for 1872. The dividends paid amounted to $30,549,225, and equalled 4.7 per cent. on the share capital. The ratio of total mileage to population was one mile of line to 772, against 792 for 1872.

The mileage of the railroads of the Western States for 1873 was 32,880 miles, against 28,778 for 1872. Their cost was $1,705,846,760, against $1,472,625,232 for 1872, and was made up of $840,823,411 of share capital, and $864,928,349 of debt. Their average cost per mile was $52,964, against $50,558 for 1872. Their gross earnings were $211,717,781, against $178,826,252 for 1872. Of these $58,800,000 were received for the transportation of passengers, and $157,900,000 for that of freight. The percentage of gross earnings to the cost of the roads was 12.41. The net earnings were $71,800,000, and equalled 4.1 per cent. of such cost. The earnings per head of population equalled $14.33 against $13.76 for 1872. The dividends paid amounted to $19,055,247, and equalled 2.26 per cent. on the share capital of the roads. The ratio of total mileage to population was 1 to 406, against 1 to 433 for 1872.

The mileage of the railroads of the Southern States for 1873 was 18,994, against 10,986 for 1872. Their cost was $509,324,106, against $401,918,267 in 1872, and was made up of $228,477,107 of share capital and $280,846,999 of debt. Their average cost per mile was $36,772, against $36,575 for 1872. Their gross earnings were $63,696,409, against $47,888,539 for 1872. Of the earnings, $38,385,420 were received for the transportation of freight and $15,310,989 for that of passengers. The percentage of gross earnings to the cost of the roads was 15.4; the net earnings were $18,133,849, and equalled 3.5 per cent. on such cost. The earnings per head of population equalled $4.21, against $4.31 for 1872. The dividends paid amounted to $951,886, and equalled less than 2 per cent. on the share capital of the roads. The ratio of total mileage to population was 735, against 779 for 1872.

The mileage of the railroads of the Pacific States for 1873 was 1,428, against 1,368 in 1872. Their cost was $154,090,809, against $131,573,990 in 1872, and was made up of $81,251,700 of share capital and $72,839,109 debt. Their average cost per mile was $95,590, against $98,800 in 1872. The gross earnings were $15,276,747, against $13,900,727 for 1872. Of the gross earnings, $9,682,789 were received for the transportation of freight and $3,593,960 for the transportation of passengers. The percentage of gross earnings to the cost of the roads was 9.9; the net earnings were $8,858,639, and equalled 5.7 per cent. on such cost. The earnings per head of population were $17.92, against $17.90 for 1872. No dividends were paid. The ratio of total mileage to population was 1 mile to each 389 of inhabitants, against 1 to each 379 for 1872.

Within the past five years 28,896 miles of railroad have been constructed in this country. At $50,000 per mile the cost of these works has been $1,281,850,000. In the meantime $75,000,000 have been annually expended in enlarging the accommodations and increasing the facilities for business of roads already in operation—in other words, there has been expended upon our railroads $350,000,000 annually in the last five years. If we have not exceeded our means in the construction of these works, we have pushed this great interest out of all proportion to others. We have only to stop construction to have the equilibrium speedily restored. The method is a very simple one. The earnings of the railroads of the Western States the past year equalled $14.33 per head of population. The present year, but for the effect of the recent panic, they would equal $15.33 per head; and in 1875, $16.33 per head. This gain is certain to be made as soon as the country recovers from the present prostration. In the meantime, population is increasing at the rate of more than one million annually. The contribution of this increase alone to railroads will add, at the present rate of earnings, $14,330,000 annually to their gross receipts. But the population of the country increases at the rate of about 2.50 per cent annually, while the earnings of our railroads increase in about five fold greater ratio. The question of earning is one of population, the pioneer contributing as much per head as a citizen of old and densely settled States.

Import Duties.

The Philadelphia *Bulletin* gives the following as the exact rates now charged by the United States on imports of iron and steel:

Iron railway bars, 68 cents per hundred pounds. Steel railway bars, $25.20 per ton of 2,240 pounds Pig iron, $6.30 per ton. Hammered or rolled bar iron: ordinary size, $20.16 per ton; extra size, $30 24 per ton. Rod, slit, hoop, and sheet iron, $25.20 to $35.28 per ton. Previous to June 6, 1872, steel in bars, coils, sheets and ingots, including steel wire not less than one-fourth inch in diameter, valued at 7 cents per pound or less, paid 2½ cents per pound; valued over 7 and not over 11 cents, paid 3 cents per pound; valued over 11, paid 3½ cents per pound and 10 per cent. ad valorem; steel in other forms, not otherwise provided for, paid 30 per cent ad valorem; and steel manufactures, not otherwise provided for, paid 45 per cent. ad valorem. Since June 6, 1872, the duty on each kind of steel enumerated in the first sentence has been reduced 10 per cent. on the rates here given.

Railroad Law.

RAILROAD COMPANIES.—WHEN LIABLE FOR MERCHANDISE AS WELL AS BAGGAGE OF PASSENGERS.

The facts in the case of Stoneman *v.* Erie Railway Co. (52. N. Y., 429,) are set forth at length in the following opinion:

The finding is, that "she delivered seven packages of goods and wearing apparel; that the defendant, in addition to the money for her passage, then demanded of her payment of ten dollars as freight for the carriage of said packages over its road, which plaintiff paid; that defendant thereupon received said packages and contents and promised to transport them," etc. There is no exception to this finding.

There is no finding and no request to find that the defendant received the packages as extra baggage or received any pay for their transportation as extra baggage.

There is no finding or proof that she in any manner concealed the contents of the packages from the defendant, or that she in any manner represented them as containing only her personal baggage; and the finding is that the defendant transported them as merchandise, not as baggage, extra or otherwise. It has become an axiom, that he who alleges error must affirmatively establish it. No presumption is indulged to reverse a judgment.

Under these circumstances, the question of the extent of plaintiff's baggage does not arise, and I think the defendant must pay for the whole property lost. (See Hannibal Railroad *v.* Swift, 13 Wall., 262.)

It is well settled that, in ordinary cases of transportation of freight, the carrier is responsible for a parcel, though ignorant of the contents, no matter how valuable, unless he made a special acceptance. This rule has some exceptions, and is qualified by the condition that the owner should have been guilty of no fraud or imposition in respect to the carrier, as by concealing the value or nature of the parcel, nor should he delude the carrier by his own carelessness in treating the parcel as a thing of no value. (2 Kent, 11th ed., 603; Orange Co. Bk. *v.* Brown, 9 Wend., at 115) There was no such qualification in the case at bar. I think it safe to say that, if the carrier knew or had notice of the character of the goods taken as baggage and still undertook to transport them, he is liable for their loss, although they are not travellers' baggage. (2 Red. on Railways, 149, 151, note 5, and cases.

But as I do not regard the question argued in the appellant's brief as to the liability for goods assumed to be transported as extra baggage and paid for as such, as presented in the case, it is not necessary to consider it.

☞ The directors of the Pennsylvania Railroad company have completed the organization of the treasurer's department by the following appointments, to take effect August 1, 1874: Bayard Butler, treasurer, in place of Edmund Smith, elected second vice president; John D. Taylor, assistant treasurer, in place of Bayard Butler, elected treasurer; Benjamin F. Crawford, cashier.

California Railroads.

At the annual meeting of the following railroad companies, held in San Francisco on the 15th ult., directors were elected as follows for the ensuing year:

Central Pacific Railroad Company: Leland Stanford, C. P. Huntington, Mark Hopkins, E. H. Miller, jr., Robert Robinson, C. H. Cummings, Charles Crocker.

Sacramento Valley Railroad Company: Leland Stanford, C. P. Huntington, Mark Hopkins, E. H. Miller, Jr., C. H. Cummings.

California Pacific Railroad Company: George E. Gray, R. P. Hammond, Moses Hopkins, Joseph B. Gunn, C. J. Robinson, N. T. Smith, J. L. Willcutt.

Stockton and Copperopolis Railroad Company: Leland Stanford, C. P. Huntington, Mark Hopkins, E. H. Miller, jr., Robert Robinson, C. H. Cummings, N. T. Smith.

Stockton and Visalia Railroad Company: Leland Stanford, C. P. Huntington, Mark Hopkins, E. H. Miller, jr., Robert Robinson, C. H. Cummings, N. T. Smith.

San Pablo and Tulare Railroad Company: Leland Stanford, C. P. Huntington, Mark Hopkins, E. H. Miller, jr., C. H. Cummings.

Northern Railroad Company: Leland Stanford, C. P. Huntington, Mark Hopkins, E. H. Miller, jr., C. H. Cummings.

Terminal Railroad Company: Leland Stanford, C. P. Huntington, Mark Hopkins, E. H. Miller, jr., Robert Robinson, E. I. Robinson, Charles Crocker.

Lake Shore and Michigan Southern Railway.

At a meeting of the Executive Committee of this company on the 22nd ult., a statement from the Auditor of the Company as to the business for the six months ending with June 30, 1874, was read as follows:

The Lake Shore and Michigan Southern Rail road Company, six months ending with June 30, 1874:

Earnings		$8,674,839
Operating expenses (including cost of steel rails substituted for iron) and taxes (equal 66 per cent. of earnings)		5,608,998
		$3,065,846
Interest, leases and dividends on guaranteed stock	$1,380,000	
Discount on bonds sold	190,000	
		1,570,000
Leaves equal to 3.025 on capital stock		$1,495,846

The above amount has been expended for the following purposes:

On construction	$263,770
On equipment	626,686
	$890,456
All this was under contracts made by the previous administration prior to 30th of June, 1873, which contracts are now all closed.	
For payments on floating debt	605,390
	$1,495,846

The present floating debt is $2,100,000.

The reduction therein since January 1, 1874, other than by earnings, as shown above, was from proceeds of sales of second mortgage bonds.

Whereupon the following resolutions were adopted:

Whereas, the net proceeds of the business for the six months ending with June 30, 1874, have been used in completing contracts entered into by the previous administration prior to June 30, 1873, and in reducing the floating debt of the company, so that a realization thereof in means for division will require a sale of so many more of the company's bonds;

And whereas, in the opinion of this committee, it is not for the true interests of the owners of the property that their bonds should be disposed of at too great a sacrifice, or that the debt of the company should be injudiciously increased in order to realize means for such division; therefore

Resolved, That it is not expedient to declare a dividend on the capital stock of the company for the six months ending with June 30, 1874.

Resolved, That in view of the improvement in the company's affairs as shown by the statement of its floating debt—which is now reduced to about $2,000,000—and in view of the fact that the company has definitely decided not to engage in any new enterprise involving a diversion of its net earnings, it seems to this committee that it will not be necessary hereafter to pass the payment of dividends.

Railroads in Ohio.

It is expected that the Wheeling and Lake Erie road will cross Sandusky Bay in the vicinity of the Club House and Mud Creek. Wheeling and Toledo are the termini. A line of thirty-six miles, connecting the Niles and New Lisbon railroad and the Wheeling and Lake Erie railroad, is proposed, and likely to be commenced soon. The route of the Valley railway, from Canton south, has been located via the Nimishillen Valley, through North Industry, Sandyville, to Mineral Point, where it joins the Wheeling and Lake Erie railway, near Columbia, Carroll county, and thence follows the line of that road to Martin's Ferry. The heaviest grade on the whole route is thirteen feet to the mile. The whole line has been secured to the company.

Grading on the Circleville, McArthur and Gallipolis road is almost completed from Vinton Furnace southward to a point within eight miles of the work completed northward from Gallipolis. The prospects for making the road from Vinton Station to Gallipolis ready for the locomotive by the 1st of January, 1875, are very good, and all that is needed to extend the road to McArthur by the same time, is an additional subscription of three or four thousand dollars.

Youngstown is constructing a branch connecting with the Ohio and Toledo narrow gauge line now building from Carrollton to Painesville. The rails have been laid on the Ohio and Toledo road to within a mile and a half of Carrollton. Grading from Oneida to Minerva has been contracted for.

Grading on the Bowling Green and Toledo road will be commenced at once. It is believed the line can be graded in thirty days.

Railroads in California.

The Sacramento *Record* says that the Eureka and Palisade Railroad have commenced transporting passengers and freight to a point twenty miles east of Palisade, on the road to Eureka, making a difference of a day and a half in the delivery of freight to Eureka, Hamilton and Pioche. Twenty miles additional of track will be laid as fast as the iron arrives. Grading on the Olympia and Tenino Railroad is fast approaching completion. A narrow gauge railroad project between San Jose and Alviso is on foot. Two miles of grading are completed on the Visalia branch railroad, and the iron for it will arrive on the 20th. The preliminary survey for the route of a railroad from Felton to Guerneville, Sonomo county, has been completed.

The Bakersfield *Courier*, of July 11, says: "To night track laying will have progressed to a point about two and half miles from Kern river. At a distance of one and half miles from the river a temporary landing place for freight and passengers will be established, and we may except regular passenger and freight trains to be running there about the close of next week. From that point onward to the river the work of preparing the road bed will be quite heavy, as in many places it may be necessary to raise the embankment twelve feet high. From this time forward the work will be of a difficult and expensive character, and we are hardly justified in expecting the track to be laid to the depot ground in less than two months from this date."

Allentown Railroad.

The Pottsville *Miner's Journal* says that work is soon to be commenced upon the extension of the line of the Allentown Railroad from Kutztown to the Ontelaunee Creek, so as to form a connection with the Berks County Railroad. It is believed, however, that the plan embraces the pushing of the road clear through to Leesport or Port Clinton. The work upon this line was originally started somewhere about the year 1856, but under the panic of the year following it was abandoned. After lying in dormancy for a long time it fell into the hands of the Philadelphia and Reading Railroad Company, which some two years ago constructed a branch from Topton, on the East Pennsylvania, to Kutztown, a distance of 4½ miles, using part of the old or abandoned road. Most of the line was graded before the enterprise went under, so that it can be completed now at a comparatively low figure.

Wheeling and Lake Erie Railroad.

A meeting of the directors of this company was held at Norwalk, Ohio, on the 23d ult., to determine whether they will make Norwalk or Milan the point of detour in the main line for Toledo, or will take some point between the two places. It is proposed to unite the Ashland road, running south into Coshocton county, and north through Ashland and New London, with the Wheeling and Lake Erie railroad either at New London or at a point in the line from Lodi through Wellington and Clarksfield, so that these two lines will unite before reaching Norwalk, and that place will be made the point of detour for a direct line through Castalia and Oak Harbor to Toledo, throwing out an arm from Norwalk through Milan to the lake, either at Huron or Sandusky.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending July 18, at 254,699 tons, and for the coal year 9,865,528 tons against 10,232,571 tons to corresponding time last year, being a decrease of 367,043 tons. The bituminous tonnage for the week is 64,274 tons, and for the year 1,694,330 tons, against 1,650,605 tons to same time last year, giving a total of all kinds for the week of 818,964 tons, and for the year of 11,559,858 tons, against 11,883,096 tons to same time last year, being a decrease of 323,318 tons.

☞ The officers of the Lake Shore and Tuscarawas Valley Railroad company, recently elected, are: President, W. S. Streator: Secretary William H. Grout; Treasurer, R. L. Chamberlain; Chief Engineer and General Superintendent, W. W. Card.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

American Railroad Journal.

Saturday, August 1, 1874.

Stock Exchange and Money Market

The new five per cent Funding Loan negotiation has been the most prominent topic, in financial circles, during the week. Proposals for the Loan were to have been formally opened and decided on, on Thursday of last week; but no definite result was attained until within a day or two, when it was reported from Washington that the negotiation had been completed for marketing the remainder of the Loan, amounting to 179 millions. It was further stated that the contracting parties are the United States on the one hand, and Messrs. August Belmont & Co., on behalf of Messrs. N. M. Rothschild & Sons, of London, and their associate houses in the Continental cities; and J. & W. Seligman & Co., on behalf of themselves and their associates in Paris and Vienna. These parties absolutely subscribed to $45,000,000, with an option to take the remainder of the loan at any time within six months. The loan is to be taken at par, payable in coin, or five twenty bonds. The parties are to receive one fourth of one per cent. commission, and are to defray all expenses of the negotiation and exchange, including the expenses of delivering the bonds. The Money market has been comparatively dull throughout the week. The demand from all responsible sources has been unusually limited, speculation at the Stock and Gold Boards having been very tame; and the mercantile wants, growing out of the crop movements and the Fall trade, as yet not urgent. Lenders have been very prompt in meeting the requirements of unexceptionable borrowers on the basis of 2@3 per cent on call, and 5@7 per cent per annum, in the discount form. The City banks and Sub Treasury movements have been favorable to continued ease. The City banks, last week, augmented their deposit and reduced their specie averages, while again contracting their loan and discount line. They augmented their reserve of legal tender quite handsomely while also enlarging their item of circulation slightly. The U. S. Sub Treasury increased its currency reserve, while cutting down the specie balance, the latter, in part, through the coin interest disbursements. The City banks, last week, while increasing their reserve of legal tender notes $1,881,100, and their deposit item $1,329,700, reduced their specie average $1,108,600. They also report a decrease of $1,146,900 in the loans and discounts, and an increase of $40,100 in the circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $54,685,136 against $53,821,698 the preceding week; and a coin board of $48,387,374, against $48,847,785 on the previous return. The City bank exchanges, during the week, were $353,796 075, or a daily average of $58,966,012. The customs revenue of the port, during the week, was $2,637,000, of which $2,444,927 were in coin certificates. The City banks reported their average of gold last week at $26,646,700, and their greenback average at $63,714,800. Their deposits stood at $244,313,300. The loan item was about $284,168,100. The circulation was $25,767,600.

The cash balances of the Treasury Department on Wednesday were: Currency, $12,895,930; special deposits of legal tender for redemption of certificates of deposit, $56,520,000; coin, $70,094,648; including coin certificates, $34,008,800.

The outstanding amount of legal tender notes is now definitely established by law at 382 millions. The National bank circulation is considerably under 350 millions.

Under reports of the successful marketing of the five per cent funding Loan, the Gold speculation has been decidedly bearish and the price has been materially depressed. The customs and export drains of specie have been moderate. The extremes of the price have been 109@110, closing at 109⅜, as against 109⅞ on Wednesday of the preceding week. The specie outflow, last week, was $676,680. The imports of specie at this port since Jan. 1, have been $2,846,619, against $2,081,190 same time last year. The customs demand for Gold last week averaged $439,911 a day. Foreign Exchange has been in less demand at rather easier prices. Bankers' sixty day bills on London closed on Wednesday at $4 87 @4 87⅛; sight bills on London at $4 89⅛ @$4 90 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $6,661,788.

The import entries of Foreign Merchandise at

New York, including dry goods, amount for the past week to $8,740,546.

Notwithstanding the decline in Gold, Government securities have been in good demand, for investment purposes, mainly on home account, and values have been very well supported. U. S. sixes of 1881 closed on Wednesday of this week at 118@118¼; U. S. Five-Twenties of 1862, 113⅜@113¼; U. S. Five-Twenties of 1864 at 115½@116; U. S. Five-Twenties of 1865, 116⅛@117; U. S. Five-Twenties of 1865 consolidated, 116⅛@116⅜; U. S. Five-Twenties of 1867, 117⅛@117¾; U. S. Five-Twenties of 1868, 118⅜@118½; U. S. Ten-forties at 113⅛@114; U. S. Fives of 1881, (Funding Loan) 113⅛@114; Six per cent. currency Sixes from 117¼@117¾.

State and Railway bonds have been sparingly sought after at about former prices. Railway and miscellaneous share property has been unusually dull, throughout the week; the Stock Exchange dealings having been very light, and values more or less irregular, and weak.

General business has been fairly active in the way of domestic produce, but in most instances, closing in favor of buyers. Foreign merchandise has been attracting more attention at steadier rates. The Metal trade shows rather more animation in American Pig Iron, of which sales have been reported of 2300 tons Nos. 1 and 2 at our quotations. Eglinton Pig Iron quoted at $33 50@$34. Glengarnock, $35, Sumerlee, $36; No. 1 American Pig at $32, No. 2 do at $29@$30; Forge, $26@$28; English Rails at $50@$52, gold; American Rails at works, $56@$60; Old Rails, $36@$40 Wrought Scrap, $38@40. Ocean Freights have been lower, leading more activity; demand mostly from Grain, Petroleum, and Provision shippers.

At the auction sale of Scranton Coal, on Wednesday, 25,000 tons were promptly disposed of at a slight advance in prices; the range having been from $4 72½@$5 77½, as against $4 57½@$5 65 per ton of 2240 lbs. at the sale in June. Private trade, dull; and Prices somewhat unsettled, though quoted about as before.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Boston *Traveller* says that the Eastern Railroad proves an exception to the almost universal rule of dull business and decreased income. For the first six months of the financial year, beginning on the first of December, its income was larger by more than one thousand dollars per day, Sundays included, than for the same period of last year. There was a large decrease in expenses, with a small increase of income, notwithstanding the dullness of business in most of the towns on the line of the road. The public, as well as the holders of the stock, will gladly learn of this encouraging state of affairs with that corporation.

☞ The Eastern (Mass.) Railroad Company will redeem $750,000 6 per cent. bonds, due August 1. A portion of these was originally issued in 1854, twenty years to run, and the balance in 1862 to 1864.

Colfax and Nevada Railroad.

The Grass Valley (Cal.) Union of July 14, says: "The railroad survey has been completed so far as the field work is concerned, and in about three weeks the Chief Engineer will make up his report, including maps, profiles, estimates and such things, for the Directors. We learn that the ground is very favorable for the construction of the road. There will be no tunnel on the whole line as located by engineer Bates. The last line surveyed is about one-half a mile longer than that surveyed by Major Watson. The distances according to the Bates' survey, are fifteen miles from Colfax to Grass Valley, and seven miles from Grass Valley to Nevada City. The grades are easy for a mountain country."

☞ The North Shore Railroad of Long Island, having its termini at Richmond Hill on the west and Orient on the east, is in a fair way soon to be an accomplished fact. Authorized representatives of European capitalists in this country have already, it is understood, guaranteed sufficient capital to secure the construction of the road, the security being the bonds of the company, and it is probable that the work of grading and laying the rails will be commenced before the close of July. Considerable grading has already been done at the western end of the line. The importance of the proposed line of travel may be judged when it is stated that it is proposed to establish regular stations at forty three different towns and villages on the route.

☞ The Baltimore, Pittsburg and Chicago railroad has been ironed to a point twenty miles west of the Ohio line, and gangs of hands are now laying iron in Marshall and Laporte counties, Indiana. The bridging, from Defiance west to Chicago, is nearly completed. The road in Indiana is being ballasted east and west, and by the first of November will be opened for business from Chicago Junction on the Lake Erie Division of the Baltimore and Ohio railroad to Chicago. It is said that the road, when completed, will be the best East and West road in the United States, and is the easiest and best grade.

☞ The Hillsboro News says that in case the Michigan and Ohio Railroad is built down the Scioto Valley it will intersect the line of the Southern Ohio railroad at or near Piketon, about 40 miles east of Hillsboro, and that easy connection can be made with the road from that point by extending the Southern Ohio from Hillsboro.

☞ Burlington, Vt., has voted to issue bonds to the amount of $160,000 in aid of the Burlington and Lamoille Railroad between that city and Cambridge, Vermont, 32 miles in length, the construction of which link of the railway will form direct connection between Burlington and Portland.

☞ The Tuscarawas Valley railroad, running from Cleveland to Uhrichsville, Ohio, has a floating debt of $259,072, while its net earnings for the year ending July 1 were only $130,000. Having failed to meet the July interest on its bonds a receiver for the road has been appointed.

☞ The total yield of wheat in California in 1874-'75 is estimated at 20,000,000 centals. This would give for export 675,000 to 750,000 tons.

Taxing Interest Coupons.

Some time since the Erie Railway Company paid, under protest, to Internal Revenue Collector White, of the Sixth district, about $38,000, as a tax upon the interest coupon bonds of that corporation. A suit was brought in the United States Circuit Court, before Judge Shipman, to recover back the money, on the ground that the government had no right to collect such a tax. The interest on the bonds was paid between January 1 and July 1, 1870. The question at issue was whether or not corporations were liable during that time to pay any income tax on interest coupon bonds. Judge Shipman decided that they were. He bases his decision on the Stockdale cases, heard before the United States Supreme Court.

Bridgeton and Port Norris Railroad.

A number of the first mortgage bondholders of the Bridgeton and Port Norris Railroad, in company with A. W. Markley, Esq., Receiver, went over the Bridgeton and Port Norris Railroad on the 21st ult., for the purpose of inspecting it, and to see for themselves the section of country through which it passes. This was to enable them to form a better judgment respecting the future success of the road. From Bridgeton to Port Norris, a distance of twenty miles, the road runs through a fine rolling agricultural district, susceptible of the highest state of cultivation, and quite densely populated. At Fairton there is a population of about 1000, in North Cedarville and Cedarville proper 2300, in Newport, 1200, Dividing Creek 4000, Maurice own and Haleyville 1500, and in Port Norris, the terminus, 600—making a total of 7800 direct in the immediate vicinities of these stations. These gentlemen expressed themselves satisfied that the road has all the elements to secure success.

☞ The Baltimore Bridge Company having replaced a wooden span on the Cecil side of the railroad bridge crossing the Susquehanna river at Havre de Grace with an iron one 225 feet in length, the managers of the road a few days since awarded to Clarke, Reeves & Co., of Phœnixville, Pa., a contract for replacing three more of the wooden spans with iron, each span being the same length as the one furnished by the Baltimore Bridge Company. These three spans will be placed in position during the present year.

☞ The Massachusetts State loan—5 per cent. payable in Gold—sold on the 24th ult. very successfully. The 20 year Troy and Greenfield loan, $300,000, was taken at 101¼ and 102 per cent. premium, and the Five-twenty Harbor Improvement loan, $305,000 at 100 80-100, $10,000 at 101¼ and $85,000 at 100 515-1000, almost the whole amount by New York capitalists.

☞ The coupons of the sinking fund bonds of the Union Pacific Railroad Company, maturing September 1, and of the income bonds presented or exchange, will be paid on and after August 1, without rebate.

☞ The Baltimore Bridge Company have received a contract from Messrs. Dupont, manufacturers of gunpowder, to construct an iron bridge 285 feet in length, which is to be placed over the Brandywine river at the Dupont powder works.

☞ The commissioners of Frederick Co., Md., have awarded the following contracts: for building a bridge 441 feet in length at Furnaceford—masonry to Christian Awail, of Westminster, for $7,990; iron work to the King Iron Bridge Company, of Cleveland, Ohio, for $13,000—total $20,990. Also contract for masonry of the bridge at Lamar's ford, over Middle creek, near Jefferson, to Isaiah Moser, of Myersville; iron work to the King Iron Bridge Company for $1,970 80; and contract for masonry of bridge at Capt. Mains' over Middle creek, to Isaiah Moser; iron work to the King Iron Bridge Company for $1,621 50. Cost of masonry for the two latter bridges $900.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Robt Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H Haswell

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, August 8, 1874.

Railroads in South America.

The net earnings of the Great Southern Railroad Company of South America, for the past year, amounted to £96,088 ($465,065 92). This railway has been a very great success, and although the directors, some time ago, reduced the fares considerably (the reduction averaging about 10 per cent. on the tariff of the whole line), yet the tariff receipts show an increase, during the year, of nearly £32,000 ($154,880). The shares of the company are now commanding a premium of 17½ per cent. The Northern Railway of Buenos Ayres, the length of which is about 19 miles, earned a net profit, for the past year, of £30,771 ($148,931 64) and after payment of interest on debentures and debenture stock, there remained a balance of more than 9 per cent. on the capital stock. The preferred stock of this company is quoted at about 35 per cent. premium. The cost of this railway has been about £20,000 ($96,800) per mile. The Western Railway has been constructed, is worked by the government of Buenos Ayres, and is earning over 9 per cent. The Buenos Ayres and Campana Railway, which is being rapidly pushed toward completion, is about 50 miles in length, and runs from the city of Buenos Ayres to Campana, which is said to be the finest natural port on the Great Parana. It is believed that the traffic on this line will be quite equal to that of the Northern Railway of Buenos Ayres.

Redemption of Five-Twenty Bonds.

The following is the text of the call issued by the Secretary of the Treasury for $25,000,000 of five-twenty six per cent. bonds:

By virtue of the authority given by the act of Congress approved July 11, 1870, entitled, "An act to authorize the refunding of the national debt," I hereby give notice that the principal and accrued interest of the bonds hereinbelow designated, known as "five-twenty bonds," will be paid at the Treasury of the United States, in the City of Washington, on and after the 1st of November, 1874, and that the interest on the said bonds will cease on that day; that is to say:

Coupon bonds known as the third series, act of February 25, 1862, dated May 1, 1862; coupon bonds, $50, Nos. 12 201 to 14,000, both inclusive; $100, Nos. 38,201 to 45,100, both inclusive; $500, Nos. 19,491 to 28,700, both inclusive; $1,000, Nos. 47,801 to 70,200, both inclusive. Total, $20,000,000.

Registered Bonds—$50, No. 1,461 to No. 1,750, both inclusive; $100, No. 10,705 to No. 13,300, both inclusive; $500, No. 6,401 to 7,700, both inclusive; $1,000, No. 26,167 to No. 31,609, both inclusive; $5,000, No. 8,304 to No. 9,800, both inclusive; $10,000, No. 10,518, to No. 11,700, both inclusive. Total, $5,000,000; grand total, $25,000,000.

Of the amount outstanding (embraced in the numbers as above), $20,000,000 are coupon bonds and $5,000,000 are registered bonds. The interest due on November 1, 1874, on the registered bonds embraced in the call, will be paid with the principal of the bonds. United States securities forwarded for redemption should be addressed to the Loan Division, Secretary's Office, and all registered bonds should be assigned to the Secretary of the Treasury for redemption.

☞ The officers of the Berks County (Pa.) Railroad company have determined to extend the road from the Slate Dale branch one and three quarter miles across the Lehigh river to the Lehigh and Susquehanna division of the Central Railroad of New Jersey. The extension has already been located, and the right of way donated.

Our Pig Iron Production.

A statement of the production of pig iron in the United States in 1872 and 1873, compiled from returns made directly to the American Iron and Steel Association, by Mr. James M. Swank, secretary, shows that during 1872, 41 stacks were built, and that during the year 1873, 50 more were built, making the total number of stacks in the country at the beginning of the current year, 662. Of these 410 were in blast on the 1st of January. By the 1st of July, ultimo, the number of completed stacks had increased to 673, and 58 more were building. The number projected at that date is set down at 61. The estimated capacity of finished stacks on the 1st of July, ultimo, is 4,500,000 net tons per annum; the product in net tons is given as 2,854,558 in 1872, 2,868,278 in 1873. The value of the product is estimated as follows: 1872, $132,649,621, averaging a little over $40 per ton; 1873, $118,243,308, averaging about the same price.

Steam Power on Canals.

An experiment in steam motive power, it is stated, is about to be tried on the Chesapeake and Ohio canal, the engines for two boats now being built at Cumberland, Md., having been completed, and being expected to be ready by the 1st of October. The boats are claimed to be upon an entirely new model from any yet built, and there are sanguine expectations as to their success. There are said to be employed on the canals of the State of New York about six thousand boats, of which from six hundred to seven hundred are supposed to be constantly in motion, each boat being drawn by from four to eight horses. Some time ago a handsome prize was offered by the New York State Legislature for "the practical and profitable introduction upon the canals of steam, caloric, electricity, or any motor power other than animal power for the propulsion of boats." The proposition seems to have been successful, so far as the Baxter plan is concerned, by which steam appears to be establishing itself as a motor in the canals of New York. Several significant facts have been developed by the Baxter canal steamers. Among these is the diversion of freight from other channels. We see it stated that for the first time in ten years general assorted freights are being carried on the Erie canal. It is asserted that dry goods, crockery, glass, patent medicines, &c., can be forwarded by canal steamers with sufficient expedition as compared with railroads, and in better order. There appears to be a prevailing idea that merchandise, at least of

certain descriptions, is less liable to injury when forwarded in this manner. Thus it comes about that while, as a rule, canal freights are dull in that quarter, compelling large numbers of boats to lay up, the canal steamers are embarassed with freights offered. If steam canal boats are self-sustaining under wholly unpropitious circumstances of general trade, a great point as to the practical value of the change is established. In answer to inquiries of a correspondent of the New York Commercial Advertiser, it was stated that westward bound boats could fill up to carry not beyond Buffalo, the "way freights," so to speak, being equal to the capacity of the boats. The departures from New York are two boats a week, and the average time to Buffalo is from six and a half to seven days. But so far from meeting the demands for business, the company, it is averred, could load a boat every day. This, if true, is certainly remarkable. At Buffalo alone it is said that something like two hundred boats are tied up, and large numbers are collected at Rochester, Lockport, &c. Freights on grain from the West are said to be lower than ever before, the rate being for corn only eight cents, and wheat nine, from Buffalo to New York. The lowest for which horse boats can carry and derive a profit is ten cents. The steamer agents express the opinion that a rate below this figure is remunerative. A Utica paper gives the following statement of the time and profit of the steamers City of New York and Baxter, on their first round trips for the season of 1874, as follows: City of New York, fourteen days, profits $445 29; Baxter, fourteen days, profits $314 17; City of New York, fifteen days, profits $319 75; Baxter, sixteen days, profits $385 73.

Unexpected delays have occurred in the building of boats additional to their fleet, but the "Baxter Steam Canal Transportation Company" are preparing to open new yards, and will shortly be in a condition to advance more rapidly. As may readily be understood, it is no part of their plan to build boats to sell, the idea being rather to run boats wherever wanted, under the company organization. If the success of steam on the canal as a practical working power may be considered from the Baxter experiment no longer debateable, a wide field of conjecture is opened as to what may be the affects both upon canals and railroads, and upon the propositions which have been made in Congress to give government aid to certain leading canals of the country. It can have no bearing whatever upon the utter want of constitutional authority to engage in such enterprises, though it may add increased plausibility to the appeals based upon expediency for their adoption.—*Balt. Sun.*

Railroads in Canada.

In March last there was organized in Canada the Southern Railway Company, with John Mercer, Sheriff of Kent County, as President, and arrangements have been perfected to carry out the intentions of the organization. It is proposed to construct a road from Windsor diagonally across Essex County in a south-easterly direction to the harbor of Two Creeks, in Kent County, on Lake Ontario, a distance of about forty miles. It will intersect the Canada Southern ten miles east of Amherstburg. The harbor of Two Creeks has been surveyed by the Government and reported upon by the engineer in charge as the best natural harbor on the north shore of Lake Erie, susceptible of being made a first class commercial and refuge harbor at a cost not to exceed $85,000, which outlay will be assumed by the Dominion Government in case the Southwestern Railway scheme shall be perfected. According to the chart, Two Creeks is fifty two miles from Cleveland, and the plan is to establish a fast line of steamers to run across the lake between those points.

A preliminary survey of the line has been made, and the grade is estimated by the engineer in charge, Mr. Salter, as not exceeding an average of five feet to the mile throughout the entire length, with little or no bridging. So soon as $10,000 worth of stock is subscribed, and ten per cent. thereon paid, a meeting of the holders of such stock will be called for the election of a permanent Board of Directors. The act of incorporation of the company requires that the construction of the railway shall be commenced within three years and be completed within six years to entitle it to the Government grant of $100,000, or to keep the charter alive.

Considerable life is also being infused into the proposed railroad to connect Lakes Huron and Erie. The County Council of Kent have elected Mr. Langford, Deputy Reeve of the Township of Harwich, one of the Trustees to represent that body, and the Directors have also elected Mr. Hammond, Reeve of Petrolia, as their Trustees. Messrs. Wilson, of Enniskillen; Hunt, of Wyoming, and Noble, of Petrolia, have been added to the Board of Provisional Directors. The stock books are to be opened at Petrolia, and also at Chatham, on the 1st of September.—*Detroit Tribune.*

Totals	$64,623,512 00	$323,117 56

Interest paid by United States, $24,325,396 93; interest repaid by transportation of mails, &c., $5,331,289 17; balance of interest paid by United States, $18,994,107 81.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1874.

B. H. BRISTOW,
Secretary of the Treasury.

Exports of Railway Iron.

The exports of railway iron from the United Kingdom have presented some increase of late, having attained in June the very considerable total of 92,174 tons, as compared with 72,962 tons in June, 1873, and 81,164 tons in June 1872. Russia took 25,202 tons of our railway iron in June; Sweden and Norway, 11,672 tons; and the United States, 12,524 tons. The exports of railway iron from the United Kingdom in the six months ending June 30 this year amounted to 427,267 tons, against 348,757 tons in the first half of 1873, and 448,042 tons in the first half of 1872. Our largest foreign customer for railway iron this year has been Russia, which took 74,460 tons to June 30; the United States came next with 64,969 tons; Sweden and Norway next with 38,968 tons; and Australia next with 38,088 tons. The exports have increased this year to Russia, Sweden and Norway, Holland, Spain, Egypt, Brazil, Chili, British India and Australia; but they have decreased to Germany, Belgium, France, Italy, the United States, the Spanish West Indies, Peru and British America. The value of the railway iron exported in June was £1,111,398 as compared with £692,458 in June, 1873, and £831,946 in June, 1872, and in the nine months ending June 30 this year £5,494,764 as compared with £4,-

586,877 in the first half of 1873, and £4,376,433 in the first half of 1872.—*Herapath*, July 18.

Western Union Railroad.

The earnings of this road for the years ending December 31, 1872 and 1873, were as follows:

	1872.	1873.
From freight	$603,098 97	$895,808 86
" passengers	208,056 56	200,583 72
" mails, express, etc.	35,955 68	41,791 65
Total	$847,111 21	$1,137,634 23
Expenses (ordinary)—		
Repairs of track	$117,147 09	$129,804 96

Legal expenses	4,246 10	4,539 75
Taxes	31.233 66	30,700 75
Insurance	5,846 65	6,089 39
Miscellaneous	2,381 53	2,350 77
Expenses (extraordinary)—		
Renewal of track	22,152 34	84,874 37
New bridges	5,916 67	2,068 85
New fences	1,777 32	1,815 43
New buildings	3,431 04	7,587 07
New locomotives	117 49	.....
New tools and machin'y	4,426 04	479 36
Savanna transfer	11,986 39	9,572 33
Car service	5,150 21	3,884 04
Train service (C., R. I. & P. R. R.)	1,774 20	15,725 00
Locomotive service	3,585 00	1,625 80
Total	$702,960 18	$878,241 37
Net earnings	$144,151 03	$259,392 86

Compared with the year 1872, the gross earnings of 1873 show an increase of $290,523 02, with an increase in operating expenses of $175,281 19—making an increase in net earnings of $115,-241 83. Percentage of expenses to earnings, 77.

The expenses are divided as follows:

	Ordinary.	Extraordinary.	Total.
1873	$750,609 02	$127,632 35	$878,241 37
1872	642,643 48	60,316 70	702,960 18
	$107,965 54	$67,315 65	$175,281 19

The expenditures for 1873, not charged to operating expenses were as follows:

Watertown Branch	$30,114 33
Winter Bridge, Savanna	6,993 86
Pt. Byron and Rock Island Junction Railroad	125,364 55
Discounts and commissions	67,500 00
Equipment (new locomotives & cars)	75,823 32
New locomotive (in process of construction)	4 404 70
Racine Dredge	1,000 00
Racine Warehouse and Dock Co., for deficiency in grain received at Racine Elevator as per contract	24,809 72
Interest and exchange	13,184 79
Interest on bonded debt	197,107 73
Total	$546,303 00

The number of miles of road operated in 1872 (exclusive of side tracks) was 208½; and in 1873, 212½—an increase of 4¼ miles, viz: from Watertown to Hampton Coal Mines, completed in 1873. The 208½ miles miles operated in 1872, includes the distance between Port Byron and Rock Island Junction of 10 miles, which was operated but not owned in that year, but is now the property of the Western Union Railroad Company, having been purchased in 1873.

The equipment of the road consists of 30 locomotives (all coal burners); 11 first class passenger, 1 sleeping, 1 business, 3 baggage, mail and express, 9 baggage and second class, 372 box freight and caboose, 64 stock, 33 flat, 1 derrick, 1 pile driver and 48 coal cars.

Miles run by passenger trains, 174,784; by freight trains, 528,716; by coal and gravel trains, 48,215—total, 751,715.

Number of tons carried, 368,645; do. carried one mile, 41,299,377. Rate per mile, 2.17 cents. Number of passengers carried, 185,068; do. carried one mile, 5,126,787. Rate per mile, 3.91 cents. Earnings per mile run on freight $1 69; do. on passengers, $1.28. Expenses per mile run, $1 25. Number of passengers carried per mile run, 1.06. Gross earnings per mile of road, $5,-347 28; expenses, $4,128 05; net earnings, $1,-219 23.

GENERAL ACCOUNT, December 31, 1873.

Iron Dams.

The Elmira *Gazette* urges a new departure in the method of constructing dams. It says:

Masonry is but a little better than earthwork when opposed by rushing water. What is needed, it seems to us, is material which will not crumble or break up when attacked by rushing water. A dam might be constructed with a frame work of iron held by subterranean guys anchored beyond the reach of the water. The foundation could be planted in a rock bed, or, in the absence of rock, against a system of piling, so as to be absolutely immovable. Thus strength would be attained. By planking the iron frame and covering the latter with earth or cement, tightness would be secured. This system would achieve one end at least. In case of a break in the dam, no disaster could follow to the region below, because only a small portion would give way and the water would escape comparatively slowly. The anchor could be so disposed as to render a complete giving way impossible, or at least improbable. The matter of cost and the process of rendering the iron durable as against rust, are matters for engineers and iron makers to consider. We believe that for dams as well as bridges, iron is destined to come into use.

The Postal Car Service.

We give below the letters of Isaac Hinckley, Esq., President of the Philadelphia, Wilmington and Baltimore Railroad Company, to the Postmaster General, on the controversy as to carrying the mails between Baltimore and Philadelphia; the replies of Postmaster General Marshall and Mr. Hinckley rejoinders which sufficiently explain the situation:

PHILADELPHIA, WILMINGTON & BALT. R.R. Co.,
PRESIDENT'S OFFICE,
Philadelphia, July 28th, 1874.

HON. F. W. MARSHALL, Postmaster General, Washington, D. C.

SIR:—I have the honor of acknowledging receipt of your letter of Saturday last, with enclosures.

I understand therefrom, that you decline increasing our compensation for mail-service, either directly, by paying us a sum greater than that now paid, or indirectly by dispensing with a portion of the car-service now rendered by us, viz., an equivalent of more than eight cars to carry one car load of mails.

I understand, also, that you decline my proposition to continue the service for a reasonable compensation to be fixed by arbitrators or by a jury. The rate now paid us is but an insignificant fraction more than five mills per linear foot of car run by us in mail service one mile.

The rate reported as a proper one by the Senate Committee, after more than twelve months' consideration of testimony and examination of evidence, was eight mills per linear foot of car, or sixty per cent in excess of what we are now paid, per mile run.

The rate now paid us is not so large by from fifty to eighty per cent as is paid for mail-service upon several roads of much more importance than the Philadelphia, Wilmington and Baltimore Railroad. It is less than thirty per cent of the rate paid us for carrying express matter upon mail trains. We are paid for milk cars, on passenger accommodation trains, sixty five per cent more than we are paid for the same amount of car-service rendered to the Post Office Department.

We are paid for furnishing and moving upon slow freight trains, open platform-cars, loaded with bricks or pig iron, twenty-five per cent more than we are paid for furnishing, lighting, warming, and moving upon our fastest passenger trains the expensive postal cars! with twenty-eight clerks or agents free, at our risk, whose fares alone, at regular rates, would amount to nearly forty per cent of our entire mail pay. And, in addition, your Department demands free transport at all

times for its special agents to the number of more than eighty.

The Department was notified, some weeks since, that we should cease to perform postal car service on and after the first proximo, unless we could be paid reasonable compensation, which we fixed at thirteen mills per linear foot of car, or portion of car, employed in mail transport, under certain conditions, as set forth on page 17 of a pamphlet, entitled "Postal Cars or No Postal Cars," which I forward herewith.

We, at the same time, offered to submit to the decision of arbitrators, or of the Courts, as to what constitutes reasonable compensation.

Senate Document No. 478, printed since the adjournment of Congress, and kindly sent me by yourself, enunciates (page 29) the opinion that eight mills would be a fair rate of payment, as that of the Senate Committee.

This Company now offers to continue the present service until the 1st January next, on condition that the terms be those set forth on page 17 of the pamphlet herewith sent, for the service from 1st July to 1st January next, with the exception that the price paid shall be that named by the Senate Committee, viz., eight mills instead of thirteen mills per linear foot of car used. And we still remain willing to submit the whole question of rates and conditions to arbitration or adjudication.

In offering to accept for the current six months the rate deemed fair by the Senate Committee, we are fully aware that we are offering to accept a rate lower than that now paid to railroad companies both larger and smaller than ours. And in so doing we are not influenced by any belief that it will afford reasonable compensation, (for we deny positively that it does,) but by our earnest desire to offer a compromise, which we think should be unobjectionable to the Post Office Department.

We now notify your Department that if, on and after the 1st proximo, your agents continue to use our postal cars for mail-service, it can only be upon terms now offered, or at rates deemed by us fully equivalent thereto. And if the cars be so used, we shall consider our terms accepted as above.

If you accept them, we beg you to consider that if on their examination by the next incumbent of your office, he deem it advisable to reject them on thirty days' notice, we shall make no objection to open up the whole question again.

It is with the greatest reluctance that we take this position, after years wasted in attempts to obtian justice at the hands of the Post Office Department, and after the fullest notice given both to Congress and the Department. But now, after ten years of entirely gratuitous service of our postal cars, introduced upon this road as early as upon any other road, and upon the assurance that we should be paid for their use, we can no longer consent that they be any longer furnished at the expense of our stockholders, nor do we think that the public wish them to be so furnished. Even at the inadequate rate of pay named by the Senate Committee, and which we offer to take for the current six months, we should have been paid over $250,000—more than we have been paid for the past ten years, if, as I believe, our service has been, during those ten years, nearly as large as it is now.

If, in carrying out our determination to require reasonable compensation for our mail service, it be alleged that by so doing we stop or impede the transportation of the mails—we deny the assertion.

We are not aware of any law which prevents payment by the Department, of reasonable compensation to mail-carriers, although advised that, in your opinion, such reasonable compensation must be denied to this company. Parties other than this company stand ready to perform the mail-service between Philadelphia and Baltimore, exactly in all respects as it is now performed, and so that the public would not be in any way affected by change of mail-carriers. If you will invite such proposals, we guarantee that they will be received.

No interruption of mail-service is necessary—no inconvenience need be sustained by the public, and you need pay only reasonable compensation.

Respectfully requesting the favor of an early reply, I remain, very respectfully and truly,

Your obedient Servant,

ISAAC HINCKLEY, President.

POST OFFICE DEPARTMENT,
WASHINGTON, D. C., July 29, 1874.

SIR: I have received your favor of yesterday and carefully noted its contents. In answer, I beg leave respectfully to refer to my letter to you, under date of the 25th instant, in which the views of the department as to its powers and duties under the law, with respect to the mail service on your road, between Philadelphia and Baltimore, and the compensation therefor, are fully stated. According to those views:

First. The department cannot allow for mail service on your road rates of compensation exceeding those prescribed by the laws.

Second. There is no authority of law for submitting the question of compensation to arbitration.

Third. The department does not and cannot assent to your proposition that the use of the postal cars on your road shall entitle your company to compensation at rates exceeding those fixed by law.

Very respectfully and truly yours,

J. W. MARSHALL,
Postmaster General.

ISAAC HINCKLEY, Esq., President Philadelphia, Wilmington and Baltimore Railroad Company, Philadelphia, Pa.

JULY 30, 1874.

HON. J. W. MARSHALL, Postmaster General, Washington, D. C.:

SIR: Your letter of the 29th inst. is in hand, acknowledging the receipt of my letter of the 28th inst., and advising me as follows, viz:

"*First.* That the department cannot allow for mail service upon your road rates of compensation exceeding those prescribed by the laws."

As a comment upon this assertion, I respectfully again call your attention to the fact that the department is now paying many railroad companies rates for mail service higher than those which we have offered to accept for the current six months, and that these higher rates are not confined to railroad companies performing a mail service smaller than that of this company, but are also paid to railroad companies whose mail service is larger than that which we perform.

"*Second.* That there is no authority of law for submitting the question of compensation to arbitration."

I regret that you decline to submit the question of reasonable compensation to the arbitration of disinterested parties. It has been the law in Great Britain for more than thirty-three years that differences of opinion as to rates of mail pay to railroad companies should be settled by arbitration; and in ordinary business, if buyer and seller do not agree as to price, the offer of the latter to allow the price to be fixed by arbitrators, and to allow, moreover, to the purchaser the subsequent option of acceptance or refusal, would, I think, be considered a very liberal one. This company is in the position of a seller who makes such an offer.

"*Third.* The department does not and cannot assent to your proposition, that the use of the postal cars on your road shall entitle your company to compensation at rates exceeding those fixed by the law.

In my letter of the 28th instant, the receipt of which you have acknowledged, you were notified that our postal cars can be used by the department only upon the terms and at the rates which were therein stated, or at rates deemed equivalent thereto by this company.

While declining our proposition you offer no substitute, and are, of course, aware that you cannot use our cars after the 1st proximo, unless you can arrange with this company, or some other party, who will pay us a reasonable compensation for their use.

We should hesitate as to assuming this position if any delay of the mails or inconvenience to the public to the slightest extent will necessarily follow as a consequence. And, in order that the department and the public may lay the blame where it may belong if any such delay or inconvenience result, I call your attention to the fact that private contractors stand ready to perform the mail service in the same way precisely in which we have performed it to this date, and they will do this for such reasonable compensation as you can probably lawfully pay, for, although you construe the laws as forbidding you to pay reasonable compensation to this company, I doubt if it can be warped into such a construction in respect to contractors other than railroad companies.

It is no novelty for a railroad company to carry the mails for a contractor who makes his own terms with the Post Office Department.

It happens that I am president of one railroad company over whose tracks, for more than seven years past, the New York and Washington mails have been carried with regularity and despatch in postal cars, although the company does not own a postal car, nor pay anything for the use of a postal car. That company has no dealings with your department, nor does it recognize your department in any way. It is paid by a contractor more than thrice as much per car per mile for the mere haul as the department pays to the Philadelphia, Wilmington and Baltimore Railroad Company for furnishing, warming, lighting, and hauling the very same cars upon the Philadelphia, Wilmington and Baltimore Railroad, and for furnishing them upon the road to which I allude.

I have thus shown you, I hope conclusively:

First, that if your agents use our cars after the 1st prox., it can only be as a consequence clearly understood by you, of the acceptance of my offer, or the adoption of my suggestions.

Second, that if any delay of mails or inconvenience to the public be experienced in consequence of our postal cars not being used by the department, the public will see that this company is not responsible therefor.

Very respectfully and truly yours,

ISAAC HINCKLEY,
President P., W. and B. R. R. Co.

POST-OFFICE DEPARTMENT,
Washington, D. C., July 31, 1874.

SIR: I am in receipt of your letter of July 30, 1874.

The propositions made therein are answered by my letter to you under date of the 29th, to which you are referred, and to which I can add nothing.

Very respectfully,

J. W. MARSHALL,
Postmaster General.

Isaac Hinckley, Esq., President Wilmington and Baltimore Railroad Company, Philadelphia, Pa.

PHILADELPHIA, WILMINGTON & BALT. R. R. Co.
PRESIDENT'S OFFICE,
Philadelphia, August 1st.

HON. F. W. MARSHALL, Postmaster General,
Washington, D. C.

SIR: Your letter of the 31st ultimo was received this morning. It acknowledges the receipt of my letter of the 30th ultimo, and informs me as follows:—"That the propositions made therein are answered by my letter to you under date of the 29th ultimo"—and you refer me to that letter, to which you say that you can add nothing.

In reply, I can only refer you to my letters of the 28th and 30th ultimo, and again notify you that this company will not allow the Department to use our cars except on terms and conditions set forth therein.

If you ask us to continue the service a few

days, to enable you to contract with other parties, we shall cheerfully do so.

The question of interruption of the mail service rests with the Post-Office Department. There is not the slightest necessity of any interruption.

Several contractors are ready to make proposals to transport the mails each way between Philadelphia and Baltimore at the same speed and in exactly the same manner at which and in which they are now transported. I understand that they will, some of them at least, propose to perform the service at a less price per car per mile than you are now paying to three-fourths of the railroad companies in the United States.

The course taken by your predecessor in office, in employing contractors who for more than seven years past have faithfully transported the New York and Southern and Western mails, is a safe precedent for you. Contractors stand ready to perform mail service between Philadelphia and Baltimore for about one-half the price per car per mile which you pay the contractor on the Junction Railroad for carrying the New York, Washington and Southwestern mail.

Comment is unnecessary. If there be any interruption of mail service between Philadelphia and Baltimore, it will be because the Department so wills.

Very respectfully your obedient servant,
ISAAC HINCKLEY, President.

This letter was supplemented by the following telegram from Mr. Hinckley, dated Aug. 1:

I wrote you by to-day's mail that if you use our cars we consider that you agree to pay us the rate asked, viz: 60 per cent more than present rates, and that that rate shall cover the six months from July 1st to January 1st.

To which the Postmaster General replied under same date:

If you will not continue the transportation of the mails over your road on the terms and conditions prescribed in the law, refuse them when brought to you. Our Mr. Bangs is in Philadelphia with instructions as to mail service between Philadelphia and Baltimore.

PHILADELPHIA, August 1, 1874.

J. W. MARSHALL, Postmaster General:—

I have your telegrams. I shall not refuse to take the mails to-morrow if you send them to our station, for your act in asking us to carry the mails will be our assurance that you mean to pay us our price, and I leave you free to decide the question as to employing our services or not. You, of course, will not employ them unless you mean to pay for them. ISAAC HINCKLEY, President Philadelphia, Wilmington and Baltimore Railroad Company.

To which the Postmaster General replied on the 3d inst.

Your telegram is received, in which you say you will not refuse the mails if sent to your station. If you receive or carry them it must be only on the terms of the law. Under no circumstances can or will the department directly or impliedly undertake or assume to pay a greater compensation than the law allows. George S. Bangs, General Superintendent of the Railway Mail Service, is instructed accordingly.

Subsequently the Postmaster General, on receipt of the letter above referred to, sent the following:

Your letter of August 1, only just received, since my previous telegram of to-day was sent off in that telegram.

The following is the latest on the postal car controversy:

PHILADELPHIA, August 3, 1874.

J. W. MARSHALL, Postmaster General, Washington, D. C.:—

I have your telegrams Nos. 19 and 21. If your agents put mails into our cars at Washington, New York or elsewhere, we shall consider the act as an order to carry the mails on our road at the rates which we have given you. If you cannot pay those rates do not let your agents put any mail into any of our cars, and then plead ignorance of the obligations the Post Office Department is under in consequence. I shall not refuse to carry the mails at present.

ISAAC HINCKLEY, President Philadelphia, Wilmington and Baltimore Railroad Company.

The following, with the above, will show how the postal car matter stands at present:—

WASHINGTON, D. C., August 3, 1874.

ISAAC HINCKLEY, President Philadelphia, Wilmington and Baltimore Railroad:—

Your telegram received, in which you say you will not refuse the mails if sent to your stations. If you receive and carry them it must only be on the terms of the law. Under no consideration can or will the department directly or impliedly undertake or assume to pay greater compensation than the law allows. GEORGE S. BANGS, General Superintendent Railway Mail Service.

The station agent is instructed accordingly.

J. W. MARSHALL, Postmaster General.

The Postmaster General, in a letter to William L. Hunt, Assistant Superintendent of the Railway Mail Service, referring to the above, says:—"If after this the Philadelphia, Wilmington and Baltimore Railroad Company continue the mail service on their road, this action will be considered as a performance of the service for the compensation fixed by law."

Erie Railway.

We gave last week an abstract of the decision of Attorney General Pratt on the application of John C. Angell against the Erie Railway Company. The following is the full text of the decision:

In the matter of the complaint of John C. Angell against the Erie Railway Company, the complainant makes application to the Attorney General for leave to bring an action against the Erie Railway Company and its directors to compel them to account for their official conduct and to restrain them from using or usurping powers not granted to them by the act of incorporation. As an action against the road and its directors might seriously affect the interests, not only of the corporations, but of stockholders and creditors, the Attorney General declined to act upon the affidavits produced by the complainant until notice had been given to the officers of the company and they had had opportunity to be heard.

Having now heard the allegations *pro* and *con.*, and duly considering the same, the Attorney General is of the opinion that the complainant had entirely failed to sustain his allegation of corruption and willful violation of law on the part of the officer of the company. Indeed, the high character of the members of the Board of Directors for honesty and integrity is too well established in the business community to warrant any suspicion that they would intentionally violate the law, or willfully fail in discharging the trust imposed upon them as such directors. And still the Attorney General is not convinced by the able arguments of the counsel for the company, that it has not transcended, in several respects, the power which the company possess under its charter, and the laws of the State. At least there is so much doubt upon the question that he deems it best that it be settled by the courts.

First—As to the question of the purchase of the stock of the Buffalo, New York and Erie Railroad Company. Upon the affidavits the charge of the complainants, that the purchase was made in the interests of directors is wholly disproved, but the Attorney General finds no authority under the charter or elsewhere authorizing the company to purchase the stock and give the notes of the company for it. The counsel for the company in the argument predicated the authority to purchase in the provision of the act of April 3, 1867, chapter 254. That act provides a method by which a railroad company holding another railroad under lease may absorb the leased road by exchanging stock, but it gives no right to one company to purchase the stock of another company. Although it may be doubtful whether the Erie Railway Company is subject to the prohibition in the General Railroad act, making it unlawful for one company to use its funds in the purchase of stock in another corporation, yet it comes within the general statutes of the State restricting corporations to the exercise of powers expressly granted or necessary to the exercise of those powers.

Second—In regard to the purchase of coal lands or stock in coal companies another grave question arises as to the power of the company. The counsel for the company in his argument claimed to find the power in the Erie Railway Company, as the successor to the rights, franchises, or privileges originally granted to the Hudson and Delaware Railroad Company. The Attorney General has not been able to satisfy himself that the Erie Railway has derived any such authority from that source. Nor can the power be implied. As coal is an article of merchandise to be found on sale in all places of any importance, it is not necessary for the purpose of the legitimate business of the road that it should mine its own coal.

Third—As to the power of the company to lease the Great Western Railway, the Attorney General has not found such power in the charter, or the statutes of the State. The act of 1839, chapter 218, makes it lawful for one railroad corporation to contract with another for the use of their respective roads, but the general power of one company to lease and take the entire management and control of the road of another corporation is clearly not found in this act. It is true that, in case of Fisher *vs.* The New York Central and Hudson River Railroad Company, (46 N. Y., 644,) the Court of Appeals assumes that a contract made under that act was a lease, but it is manifest that the question was only raised incidentally, and was not argued or carefully considered. The road claimed to have been leased to the Erie is the road of a foreign corporation lying most of it outside of the State, and outside of all allegiance to the laws of this State. That a domestic corporation may lease and run a railway in another State raises a serious question of corporate power which should be determined by the courts as speedily as may be.

As to the matter of the dividends, the allegation of intentional wrong on the part of the directors is disproved. Still the Attorney General is not satisfied that the condition of the finances of the company were such as to authorize the dividends in question. If that was the only question he should not be inclined to commence proceedings for that cause alone.

There are other points suggested wherein it is claimed that the company have exercised powers not possessed by it which are not necessary to be examined now, as the questions already examined are sufficient to authorize the commencement of an action. They may, therefore, be properly for the courts to pass upon.

simply giving his impression, the Attorney General is of opinion that some of the conceded acts of the company raise serious questions of corporate power which should be determined by the courts.

Without making an elaborate argument, but As the directors have acted in good faith, the management of the business of the corporation may safely be left with them pending litigation.

The Attorney General in assenting to the commencement of an action will feel it his duty to see that the proceedings shall be conducted so as to occasion as little inconvenience to the business of the company as possible.

DANIEL PRATT, Attorney General.

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 8, 1874.

Stock Exchange and Money Market

The disposition of the unmarketed balance of the Five per cent Funding Loan, substantially as indicated in our last, has been received with favor, as a rule, though the call for only 25 millions of Five Twenties, for redemption by November 1, has been criticised with some severity. The Money market has been without new features of interest. Call loans have been quoted easy at 2 @3 per cent; and best discounts at 5@7 per cent per annum, with a much more liberal offering of funds noted than could have been employed advantageously, in the present dullness at the Stock and Gold Boards, and the very moderate show of activity in general business. The City banks, last week, reduced their deposit and specie averages, while again contracting their loan and discount line. They augmented their reserve of legal tender liberally while contracting their item of circulation slightly. The U. S. Sub Treasury largely increased its currency reserve, and its specie balance. The City banks, last week, while increasing their reserve of legal tender notes $2,104,100, reduced their deposit item $1,572,000, and their specie average $1,358,000. They also report a decrease of $2,155,500 in the loans and discounts, and $45,400 in the circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $56,303,092 against $54,685,136 the preceding week; and a coin board of $52,381,270, against $48,887,374 on the previous return. The City bank exchanges, during the week, were $298,819,688, or a daily average of $49,803,281. The customs revenue of the port, during the week, was $2,581,846. The City banks reported their average of gold last week at $25,293,700, and their greenback average at $65,818,900. Their deposits stood at $242,741,300. The loan item was about $282,012,600. The circulation was $25,782,200.

The Government expenditures on ordinary accounts in the last fiscal year were $287,133,873.

The cash balances of the Treasury Department on Monday were: Currency, $16,913,233; special deposits of legal tender for redemption of certificates of deposit, $55,955,000; coin, $71,113,210; including coin certificates, $33,469,000.

The outstanding amount of legal tender notes is now definitely established by law at 382 millions. The National bank circulation is $349,984,993.

Gold has been without very marked alteration during the week, and the market has been comparatively dull. The speculative inquiry has been moderate, and the customs drain, about a fair average. The extremes of the price have been 109⅛@109¼, closing at 109⅜@109⅛, as against 109⅜ on Wednesday of the preceding week. The specie outflow, last week, was $1,248,245. The imports of specie at this port since Jan. 1, have been $2,846,619, against $2,081,190 same time last year. The customs demand for Gold last week averaged $430,807 a day. Foreign Exchange has been quite moderately inquired for and quoted rather easier. Bankers' sixty day bills on London closed on Wednesday at $4 87 @$4 88; sight bills on London at @4 89½ @$4 90½ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,157,917.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $7,208,727.

The last public debt statement indicated a further reduction of $1,282,866 in the aggregate indebtedness in July.

Government securities have been in more general demand, chiefly on investment account, with prices showing more firmness.

U. S sixes of 1881 closed on Wednesday of this week at 118¼@118½; U. S. Five-Twenties of 1862, 111@112; U. S. Five-Twenties of 1864 at 115¾@115⅞; U. S. Five-Twenties of 1865, 116⅛@117; U. S. Five-Twenties of 1865 consolidated, 116@116¼; U. S. Five Twenties of 1867, 117⅛@117¾; U. S. Five-Twenties of 1868, 117⅛@118; U. S. Ten-forties at 118¼@118⅜; U. S. Fives of 1881, (Funding Loan) 111⅛@111¾; Six per cent. currency Sixes from 117⅛@117¾.

State and Railway bonds have been in limited request but quoted generally steady. Railway and miscellaneous share property has been quite moderately dealt in, and have been quoted easier and irregular, though closing more steadily.

General business has been fairly active. Do-

mestic produce has been more sought after, but prices have been unsettled; Breadstuffs, Cotton, Provisions, and Naval Stores closing rather more firmly. Foreign merchandise has been in more request at comparatively steady prices. The Metal trade has been less active. Ingot Copper has been much depressed, by the suspension of a prominent firm, in this line. Iron has been less freely dealt in at about former prices. A sale of 1,000 tons No. 1 American Pig was made on p. t. Eglinton Pig Iron quoted at 32 75@33 50 Glengarnock, $35, Sumerlee, $36; No. 1 American Pig at $32, No. 2 do at $29@$30; Forge, $26@$28; English Rails at $50@$52, gold; American Rails at works, $56@$60; Old Rails, $36@$40 Wrought Scrap, $38@40. Ocean Freights have been more active; demand mostly from Grain, Petroleum, and Provision shippers; rates closed irregular.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Contract made for Furnishing Iron for the Centennial Buildings.

The Building Committee of the Centennial Board of Finance have announced that a satisfactory contract has been made by Mr. Richard J. Dobbins, the contractor for the Centennial Buildings, for the iron required in the construction of both the main exhibition building and the permanent building. The contract is awarded to Messrs. A. & P. Roberts & Co., of the Pencoyd Iron Works, which are situated on the Schuylkill River near Manayunk, and within a short distance of the Centennial grounds. The Messrs. Roberts express their ability to place the entire amount of iron on the ground within six months, or as fast as the builder requires it; and their extensive reputation for reliability warrants the belief that they will accomplish what they contract for within the specified time.

☞ Mr. Lewis trustee of the estate of Jay Cooke & Co., at Philadelphia, has received another dividend from Captain Ainsworth, president of the Oregon Steam Navigation Company, amounting to $18,687 50, gold, which, reduced to currency, produced $20,822 35, which, added to the dividend previously received, amounts to $61,516 02 already received upon the $1,500,000 stock in that company held by the estate. Other dividends will follow.

☞ The Attorney General has decided that the contract for additional mail service between San Francisco, Japan and China, as provided for in act of June, 1872, is still subsisting, and that the Pacific Mail Steamship Company is entitled to have their new iron steamships inspected, with a view of putting them into service. This decision will secure the company the full subsidy of $1,000,000 per annum.

☞ The directors of the Middlesex Central Railroad, recently elected, are: Spencer W. Richardson of Milton, Jacob Edwards of Boston, William H. Hill, Jr., of Brookline, John V. Barron of Concord, Gardner Prouty of Littleton, Edward D. Adams of Boston, George Keyes of Concord. The road is eight miles in length, extending from Lexington to Concord, and is leased to the Boston and Lowell Railroad Company.

☞ It is gratifying to note a marked revival of activity in the iron trade. Nor is this confined to any particular locality. It includes the iron interests of Paterson as well as Pittsburg, Johnstown, Philadelphia and various places in Ohio, Missouri, Tennessee and other States.

Rutland Railroad.

At an adjourned meeting of the stockholders of this company, held at Rutland, Vt., on the 28th ult., President Page submitted the following report:

Since the submission of the annual report in January last, from information obtained from the books and accounts of the lessees by your road, we are enabled to give you the exact results of the business of the road for the period of 13 months to Jan. 1, 1874; earnings, $1,135,062 13; expenses, $799,256 23; balance net earnings, $335,-805 90, which shows the balance of net earnings for the year 1873 to have been $310,000.

A resolution, modifying the Central Vermont leases, and reducing the rental from that corporation to the Rutland Railroad Company $100,000, was unanimously adopted.

A resolution was also adopted endorsing the action of the directors in purchasing an interest in the Central Vermont Railroad.

The number of directors was increased from seven to nine, and the following gentlemen elected: John B. Page of Rutland; Jacob Edwards, Peter Butler, Edwin A. Birchard, William Sohier, James S. Whitney of Boston; James H. Williams of Bellows Falls; James W Hickok, Lawrence Barnes of Burlington.

At a meeting of the board of directors, John B. Page was elected President, Joel M. Haven Treasurer, B. B. Smalley Clerk.

A dividend of three dollars and a half per share was voted to be paid in scrip to the preferred stock holders August 17th.

The Postal Car Question.

The Postal Car controversy, to which we devote a large space in our paper this week, still remains unsettled, Mr. Hinckley seeming satisfied to allow the mails to go under his last assurance to the Department that a tender of the mails would be considered as an acceptance of his terms, and the Department being willing to send them after repeated notifications to Mr. Hinckley that no more would be paid than allowed by law. Mr. Hinckley places much stress upon the fact that the Department pays the road from Mantua to Gray's Ferry, of which he is also president, a much higher rate per mile than the Philadelphia, Wilmington and Baltimore road. The contract on the Mantua and Gray's Ferry road, which is but three miles long, was made many years ago, and is nominally "messenger service."

An effort was made to induce the Department to contract for service over the Pennsylvania Railroad, which is 51 miles longer, at a fixed rate per mile, and then to allow the mails "for the convenience of all parties" to go in the cars of that road over Mr. Hinckley's track, but the Postmaster General refused to consent to any such arrangement.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending July 25, at 356,488 tons, and for the coal year 9,859,750 tons against 10,418,538 tons to corresponding time last year, being a decrease of 558,-783 tons. The bituminous tonnage for the week is 81,579 tons, and for the year 1,762,719 tons, against 1,715,681, tons to same time last year, giving a total of all kinds for the week of 438,067 tons, and for the year of 11,622,469 tons, against 12,134,214 tons to same time last year, being a decrease of 511,745 tons.

The Washington Iron Works, Newburgh.

We are pleased to learn that the fire which occurred at this extensive establishment recently, was by no means so serious as we feared it might be, as we witnessed the dense volume of smoke arising therefrom, when coming past in the boat the other morning.

Work was resumed in all departments within 12 hours after the occurrence; and is only characteristic of the usual promptness and energy of the proprietors, Messrs. Wm. Wright & Co.

Indeed it would have been a public misfortune to have arrested for a length of time the manufacture there of the justly celebrated Wright Steam Engine, which is made a specialty at this establishment.

☞ The gross earnings of all the lines owned, operated and controlled by the Pennsylvania Railroad Company east of Pittsburg for six months ending June 30, 1874, were $18,013,866, the expenses $11,809,073, and the net earnings $6,204,-703. For the first six months of 1873, the earnings were $19,592,754, the expenses $14,768,393, and the net earnings $4,824,361—showing a decrease in earnings of $1,578,888, with a decrease in expenses of $2,959,320, making the increase in net earnings $1,380,432.

☞ The President of the Michigan and Ohio railway, Mr. James S. Gibbs, writes that the portion of the line between Grand Haven and Defiance, 200 miles, is under contract, and that the contractors will aim to complete it within a year. As soon as the work from Grand Haven to Marshall, 100 miles, shall be finished, the force will be placed on the section between Portsmouth and Columbus, which portion it is intended to have in operation next spring.

☞ The total liabilities of the State of Tennessee amount to $27,920,386 45. Of this there is $6,437,548 95 on which solvent railroads are promptly paying their own interest, so that the amount on which the State is called to pay is $21,-182,837 50.

☞ It is proposed in connection with the extension of the North Shore Railroad of Long Island to Huntington, to establish a steam ferry between that point and Norwalk, Conn. It is believed that the completion of the railroad will make the ferry a necessity.

☞ The money asked for by the North Side (L. I.) Railroad Company to guarantee the extension of their line to the village of Huntington, has all been subscribed, and the work of construction will be commenced during the coming Fall.

☞ The Hanover Branch Railroad has earned $94,192 95 the past year, an increase of $9,279 87 over last year. The running expenses have been reduced $9,896, 67 but the net profits are some less.

☞ A survey of the Woodstock Railroad is in progress and will soon be completed. The object is to get an accurate statement of the work to be done.

☞ S M. Felton, of Philadelphia, has been appointed General Superintendent of the Pan-Handle Division of the Pittsburg, Cincinnati and St. Louis railway.

☞ Mr. August Belmont publishes a card denying the statement of the *Tribune* that the Rothschilds did not invest in United States securities during the war because of his (Belmont's) unfavorable opinion of the securities. On the contrary he says that they did invest largely in United States bonds all through the war, and were uniformly advised so to do by him. And again he says: "I challenge you to point out one single act or word of mine during the whole period of our national troubles which was not dictated by patriotism and devotion to our beloved Union."

☞ The Des Moines Narrow gauge Railroad has been formally opened to Ames.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H Haswell

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

and all kinds of Iron Framing used in the construction of iron roof buildings.
DECK BEAMS, CHANNEL, ANGLE AND T BARS
curved to template, largely used in the construction of Iron Vessels.
Patent Wrought Iron Columns,
Weldless Eye Bars,
for top and bottom chords of bridges.
Railroad Iron, Street Rails, Rail Joints and Wrought Iron Chairs.
Refined Bar, Shoeing, and every variety of Shipping Iron Made to Order.
Plans and Specifications furnished. Address
SAMUEL J. REEVES, President

☞ The earnings of the Chicago, Burlington and Quincy Railroad in June, 1874, were, $1,060,268, the expenses $462,673, and the net earnings $597,595. In June, 1873, the earnings were $1,044 037, the expenses $481,534, and the net earnings $562,503—showing an increase in earnings of $16,281, with a decrease in expenses of $18,861, making the increase in net earnings $35,092.

American Railroad Journal.

New York, Saturday, August 15, 1874.

Chesapeake and Ohio Railroad.

The proposal submitted to the bondholders and creditors of the Chesapeake and Ohio Railroad, which lately defaulted in the payment of interest on its bonds, embraces the following features:

1. That the holders of the six per cent. first mortgage bonds fund their interest for two years from November 1, 1873; *i. e.*, that falling due November 1, 1873, May 1, 1874, November 1, 1874, and May 1, 1875, into the seven per cent. income bonds of the company, at the rate of eighty five per cent. for the income bonds.

2. That the holders of the seven per cent. mortgage bonds fund seventy five per cent. of the principal of their bonds and the interest for three years from January 1, 1874, on the remaining twenty-five per cent. into the income bonds at the same rate, viz; eighty-five per cent. for the income bonds.

By this means, in connection with the proposal contained in section 4, there will be recovered to the ownership and control of the company, for future use in extending the line, from the present eastern terminus on the James River at Richmond, down the peninsula to deep water on the Chesapeake Bay, enlarging the equipment, and otherwise increasing the earning power of the road, something over $5,000,000 of the seven per cent. mortgage bonds now outstanding.

3. That the creditors of the company holding six per cent. first mortgage bonds as collateral security, take the same to account in full settlement of their respective claims, and fund the interest for two years from Nov. 1, 1873, on the bonds so taken, into income bonds, on the same terms as other holders of six per cent. first mortgage bonds.

4. That the creditors of the company holding the seven per cent. mortgage bonds as collateral security, receive, in settlement of their claims, income bonds, at 85, for three-fourths of the amounts due them, and seven per cent. mortgage bonds, at 85, for the remaining one-fourth, with interest equitably adjusted, and fund the interest on the seven per cent. mortgage bonds so taken to account for three years from Jan. 1, 1874, into income bonds on the same terms as other holders of seven per cent. mortgage bonds.

5. That the creditors of the company holding no security, receive, in payment for their claims, income bonds at 85, with interest adjusted to date of income bonds.

The income bonds issued in settlement, as above, are dated October 1st, 1873, and are payable twenty years after date, with interest at the rate of 7 per cent per annum, payable out of the surplus income of the road, the interest to accumulate until paid.

With the foregoing arrangement, carried into effect, by the general assent thereto of the bondholders and creditors, it is confidently believed that the ultimate payment of every dollar will be insured.

The future financial plans of the company with respect to its existing indebtedness, in view of which the propositions to the bondholders and creditors were made, may be briefly indicated as follows, viz:

1st. To apply the surplus earnings of the road over operating expenses, during the period for which the interest on the first mortgage bonds is funded, after paying off arrears of labor, &c., to increasing the equipment and terminal facilities, and otherwise adding to the efficiency and earning power of the road, in order to give it the necessary capacity to earn the interest on the bonds thereafter.

2d. To resume the regular payment of interest on the first mortgage bonds on the first of November, 1875.

3d. To resume payment of interest on the 7 per cent bonds on the first of January, 1877.

4th. To commence paying the accumulated interest on the income bonds as soon as there shall be a surplus income for that purpose, and continue until all arrears of interest on the income bonds shall be paid up, and to pay the interest thereon regularly thereafter.

Pennsylvania State Debt.

The debt of the State of Pennsylvania, under the system of gradual redemption, is being steadily reduced. The Sinking Fund Commissioners, who are the Auditor General, State Treasurer, and Secretary of State, report that the total debt on the 1st of August, 1874, was $24,999,785 37, and that at that time there was in the Sinking Fund $526,947 available for further reduction. The chief items of the debt are $400,000, bearing six per cent interest in gold; $18,833,950, bearing six per cent in currency; $3,393,500 bearing five per cent in gold; $907,200 bearing five per cent in currency; $87,000 bearing four and one-half per cent in gold; $141,133 of various loans, on which interest has ceased; $100,669 without interest; $83,032, of Chambersburg certificates, at six per cent; and the Agricultural College land scrip fund of $500,000. During July, $21,000 of debt was redeemed, and at the close of that month nearly $453,000 of the General Revenue Fund of the State was deposited on call by the State with various banks and bankers, without collateral or interest. In the reduction of the debt the Constitution of the State requires that there shall be paid off annually a sum not less than $250,000. Between Jan. 1 and July 31, 1874, the reduction has been $800,000, and by the close of the year it will reach, it is said, $1,200,000.

☞ At a meeting of the stockholders of the Woodstock Railroad Company at Woodstock, Vt., on the 8th inst., a resolution was adopted authorising the directors to contract for its completion. A meeting of the directors was called afterward, and the work was let to S. S. Thompson for $200,000, the contract being signed on the spot. The work will begin immediately.

☞ The Canadian Government has advertised for contracts for the grading of the Pembina branch of the Pacific Railway from the boundary line to a point opposite Winnepeg. The bids will remain open until noon of the 25th inst.

Atlantic and Gt. Western Railroad.

The following circular was issued in London by Mr. James McHenry on the 17th ult.:

The annual election of Directors of the Erie Railway Company was held on the 14th instant in New York, and the gentlemen who were supported by the friends of the Atlantic and Great Western railroad were unanimously elected. Over two-thirds of the share capital was represented. The board consists of gentlemen largely interested in the success of the American railway system. The property being no longer controlled by amateurs or speculators, will undoubtedly receive the most energetic, faithful, and business-like administration. There is good reason, therefore, to hope that the contracts made by the Erie Company with the Atlantic and Great Western will now be faithfully, if not liberally, fulfilled. It may be well at this time to repeat that the Atlantic and Great Western was originally suggested as an extension of the Erie railway, and constructed under engagements never fulfilled by the Erie, all subsequent modifications or alterations of these engagements having been equally disbonored. The removal of the Gould administration was undertaken to secure fair dealing, and onerous engagements were assumed in support of the Erie policy, as laid down by Mr. Watson, in consideration of an equitable lease and combination of the several Companies from New York to St. Louis, Chicago, and Cincinnati, including the Cleveland, Columbus, Cincinnati and Indianapolis line. Mr. Watson's engagements proved as fallacious as those of his predecessors. The present board come into power with the lease completed and a clearly defined policy, and it is scarcely possible, therefore, that your interests can again be trifled with. The necessity for the issue of deferred warrants for the payment of the coupons of the First Mortgage Bonds, due July 1st, has arisen from the extraordinary financial crisis in the United States, aggravated by delay in completing the lease, promised two years before, during which period the affairs of the Atlantic and Great Western have been administered provisionally in subjection to the Erie. To this we have submitted patiently in the general interest, having unabated confidence in the future of the line if and when a practical and honest adminstration was found for the Erie Railway. In this I believe we have now succeeded. The warrants in exchange for the first mortgage coupons will be ready in a few days. The coupons will be deposited with Messrs. Bischoffsheim and Goldschmidt, 31, Throgmorton street, London, E. C., to be held by them as security for the warrants, to be returned to you with all rights and priorities preserved if not paid within six months. It is proposed by the Erie Company to remit the rental monthly to Messrs. Bischoffsheim and Goldschmidt, to commence as soon as the formalities of transfer to that Company are completed. If you have not already forwarded your coupons, please do so, in order that all arrangements may be completed, and payment made in cash, with the least possible delay.

JAMES McHENRY,
5, Westminster Chambers, Victoria-street,
London, S. W., July 17th, 1874.

The Monadnock Railroad Lease.

The Springfield *Union* says the Monadnock Railroad is about to be leased to the Boston, Barre and Gardner road. The Monadnock road runs northward from Winchendon to Peterboro', N. H., beyond which place only 18 miles of road remain to be built, in order to secure connections with Concord; that is with all New Hampshire. The Monadnock road thus becomes a link in a new and most important through line from New Hampshire to New York; and its possession has therefore been sought by the managers of three different lines. The Athol road has been thought to have the best hold on the Monadnock, owing to the fact that Willis Phelps, its President, built the Monadnock road, and is a heavy owner of its stock. But now come rumors that Mr. Phelps is about to sell out to Col. Blood of Fitchburg who is interested in the Boston, Clinton and Fitchburg, and the Boston, Barre and Gardner roads, which sale, if consummated will induce the lease of the Monadnock road to the latter. The lease, which is already drawn up, and only awaits the ratification of the stockholders of the contracting roads, is to run 99 years, with a rental of $12,000 the first year, $15,000 the second and $18,000 for each and every year thereafter. If the lease is executed, as now seems likely to be done in two or three weeks, the lessees will immediately construct the eighteen miles of road needed to connect Concord with New York.

Per contra, the Gardner *News* states that it is quite probable that the Monadnock Railroad will be leased to the Worcester, Gardner and Winchendon road, as such a proposition is now under consideration. On the 5th inst. the matter came before the directors of the former road and they voted to lease their line.—*Boston Journal.*

Rhinebeck and Connecticut Railroad.

The Hudson *Star* says that this road is now completed to a point about two and a half miles beyond Ancram, and is being pushed forward at the rate of a quarter of a mile a day. Twenty seven miles of track have already been laid, and on Monday last a large additional force was put on with orders to urge the work to completion as rapidly as possible. The freight dock is to be located midway between the State dock and the Rhinebeck landing. Although there is but a very limited amount of rolling stock at the disposal of the Superintendent at present, there has already been considerable freight brought over the road. Three thousand bales of hay alone have thus far been transported this season, together with considerable quantities of other produce. From Gallatinville sixty barrels of flour are shipped every week by H. Van Valkenburg; while from Ancram the product of Peasley's paper mills form no inconsiderable item. The stations will be located at the following places: Rhinebeck village, Red Hook, Spring Lake, Elizaville, Jackson Corners, Mount Ross, Gallatinville, Ancram, Copake and Boston Corners, where connection is made with the Poughkeepsie and Eastern Road, passing down which the Connecticut Western is struck at Millerton, forming an uninterrupted chain to the east.

The Indus Valley Railway.

Some idea of the difficulties of constructing the Indus Valley Railway, the proper gauge for which was recently so warmly discussed at the Institution of Civil Engineers, London, may be gathered from the "Progress Report" for the year ending the 31st of March last by Col. Peile, R. E., who has charge of the undertaking. Two bridges of extraordinary dimensions will be required, one over the Sutlej River, and the other to cross the Indus itself. The former has been already decided on as to design and position, and will consist of sixteen spans of 264 feet each, measuring from centre to centre of the piers. These piers will have to be built on iron cylinders, about 19 feet in diameter, and sunk 100 feet below low water. But the site of the Indus bridge is not determined, except so far that it will be in the vicinity of Sukkur, and the report indicates three different proposals between which a choice must be made. One of these takes advantage of an island, and crosses the divided channels by very large spans. Another is to cross at New-Sukker, where the river is over 1,000 yards wide, by a bridge of ordinary construction. And a third would take a narrower intermediate part of the channel, where the stream is, of course, deeper, but where there is rock available for the foundations at one extremity. The estimates for these three projects are respectively £210,000, £386,000, and £246,000, so that it is not too much to say that it will cost at least a quarter of a million to execute either of them. A steam ferry is to be established at Sukkur before the line is otherwise complete, to be used pending the successful completion of the bridge.

Michigan Central Railroad.

The earnings of this road for the years ending May 31, 1873 and 1874, have been as follows:

	1873.	1874.
From passengers	$1,785,716 33	$1,803,247 76
" freight	3,852,933 41	4,086,785 12
" mails	48,865 56	58,464 11
" miscellaneous	188,796 77	248,219 18
	$5,876,312 07	$6,196,716 17
Expenses, viz:		
Repairs of road	$414,977 90	$263,571 70
" buildings	171,476 95	151,593 70
" locomotiv's	325,849 02	230,368 39
" cars	641,608 96	619,061 06
Locomotive service	236,739 70	250,174 10
Train service	241,114 15	253,991 83
Station service	781,875 48	993,026 71
Fuel	648,093 04	754,592 09
Oil and waste	86,630 26	103,904 46
Stationery, etc.	48 472 98	49,801 46
Taxes	126,209 94	164,361 09
Telegraph	50,599 64	50,242 07
Miscellaneous	102,595 24	92,189 96
Car mileage	.....	243 078 42
	$3,876,243 26	$4,219,955 14
Net earnings	$2,000,068 81	$1,976,761 03

Compared with the previous year the gross earnings of 1874 show an increase of $320,404 10, with an increase in expenses of $343,711 88—making a decrease in net earnings of $23,307 78.

The earnings from passengers show an increase of $17,531 43, from freight an increase of $233,851 71, and from mails and miscellaneous an increase of $69,020 96.

Passengers earnings per mile were $6,349 46, freight, $14,390 09, miscellaneous, $1,079 87—total $21,819 42, an increase compared with the previous year of $1,128 18.

The expenses of operating the road (not including taxes) were $4,055,594 05, or 65.45 per cent. In 1873, they were 63.80 per cent. The expenses, including taxes, the past year were 68.10 per cent, against 65.96 per cent in 1873.

The following is a comparative statement of the earnings of the entire line, including branches, for the fiscal years ending May 31—

	1873.	1874.
Passengers	$2,367,181 67	$2,360,948 86
Freight	4,652,873 82	4,918,961 93
Miscellaneous	282,062 57	354,170 91
	$7,302,118 06	$7,634,081 70
Operating expenses	$4,840,564 87	$5,316,549 64
Taxes	146,370 59	207,092 75
	$4,986,935 46	$5,523,642 39
Net earnings	$2,315,182 60	$2,110,439 31

—showing an increase in gross earnings of $331,963 64, and a decrease in net earnings of $204,743 29.

The ratio of expenses to earnings in 1874 is 72.35, against 68.29 in 1873; exclusive of taxes, 69.64 in 1874, against 66.29 in 1873. The president in his report says:

The property of the company now consists of

the main line of the Michigan Central road, extending from Detroit to Chicago, a distance of 285 miles, by way of Marshall and Kalamazoo.

This line is shortened by the Air-line road, so called, extending from Jackson to Niles, which was mainly built by this company, though held by it under a lease, the condition of which is the payment of the interest upon the construction bonds, and the principal when due. This road is substantially the double track of the main line between Jackson and Niles, though by the Air-line the distance is shortened by 12 miles. The two lines are, for all freight purposes, used as double tracks, the trains passing west over one, and east over the other. The company also holds, by lease, the Grand River Valley Railroad, extending from Jackson to Grand Rapids, a distance of 94 miles.

Also the Jackson, Lansing and Saginaw Rail road, extending from Jackson, northward, through Lansing, the capital of the State, Saginaw City and the valley of the Saginaw River, and thence in the direction of the Mackinac to a point north of the centre of Otsego County, and about 55 miles south of Mackinac. The road is now 236 miles long.

The company also owns, by way of lease, that portion of the Air-line road, so called, extending from Niles to South Bend, a distance of about 11 miles.

For the Grand River Valley road this company pays the interest on its bonds and the annual sum of $24,560. For the Jackson, Lansing and Saginaw road it pays the interest on its bonds, which are $18,000 per mile, and $70,000 per annum. It, however, holds by ownership something more than a third of its stock. The company owns lands, granted by Congress to aid in its construction, about 600,000 acres.

This company has also acquired, as stated in the last annual report, two thirds of the stock of the Detroit and Bay City road, extending from its station grounds, in Detroit, to Bay City, at the mouth of Saginaw River, and across the river to the intersection with the Jackson, Lansing and Saginaw road, and forming the eastern connection with that road, as the line by Jackson forms the southern and western. This latter company, the Detroit and Bay City, is an independent company, not leased, but is worked by the locomotives and cars of this company, for which reasonable compensation is to be charged.

There is a land grant by the State of about a million of acres, to aid in the construction of a railroad from Mackinac to Marquette, which, but for the financial difficulties of the country for the year past, might perhaps have been well under progress of construction. It is a road demanded by the public interest, and especially by the interests of Michigan, though from its connection with the iron and copper regions of Lake Superior, it is almost of national importance. Should that road be built, both the Bay City and the Jackson, Lansing and Saginaw roads would become at once roads of great importance to the country, and value to those interested in them.

The gross earnings of the main line and leased lines, for the year ending with May, have been:

From passengers	$2,360,948 86
" freight	4,918,961 63
" miscellaneous	354,170 91
	$7,634,081 70
Being in excess of the earnings of the year before of	$331,968 64
The operating expenses during the same time, exclusive of taxes	$5,316,549 64
And taxes have been	207,092 75
	$5,523,642 39
These expenses have been in excess of those of last year by	$536,706 93
The net earnings of the property have been, during the year	$2,110,439 31
Being less than the year before by	204,748 29

This is a statement doubtless discouraging to stockholders, at its first aspect, though when the causes are considered in connection with the business of the year, there will be found much ground of hope in the future.

First. There has been an increase of tonnage on the main line above the prior year, of 177,162 tons, or 12¼ per cent, though the earnings from this business has increased only 6.07 per cent. The increase in through freight carried over the road has been 260,392 tons, being 37.87 per cent. The increase of east-bound through freight has been 262,563 tons, or above that of the same kind of freight of the prior year of 48.25 per cent.

There has been a slight falling off in through west bound freight of 2,171 tons, and a large falling off in local freights of the road of 83,230 tons. But, on the whole, the increase of business has been large, notwithstanding the disturbance and depression in every class of business during three-fourths of the year, resulting from the financial trouble of the country.

The falling off in the amount of local business of the road has resulted from a double cause. The crop of the last year, in the State, was a short one, which is a large cause; and the difficulty in the finances largely paralyzed all business, and especially the traffic in lumber, which is, to a great extent, the business of the Jackson, Lansing and Saginaw Division, Kalamazoo and South Haven, and, to a lesser degree of the Grand River Valley and the main line.

The increase of the gross earnings for the year before the last year, over those of the year before that, was	$860,705 50
Those of the last year over the year before it have been	331,963 64
Had the rates remained the same as the year before, the gross earnings would have been greater than they were by	606,950 12
Or greater than that year by	938,913 76
This would have shown a gross increase of earnings, on the business for the two years done, of	1,799,619 26
And the net earnings of this year would have been in excess of those of last year by	402,206 83
And the net earnings for the year would have been	2,717,389 43
The increase of tonnage on main line in the year ending with May, 1873, was above that of the previous year	178,479
And for the last over the year before	177,162

Being an increase in two years of 355,641 tons, or 43.17 per cent of the whole tonnage of 1870.

The very large increase in the east-bound tonnage of the road is wholly the result of the large improvements which have been made during the past two years, which enables it to do that kind of business with a facility and despatch fully equal to those of any other line—and which, it is believed, will enable it at all times to command a full share of all the business between the West and the East.

But while the business in the aggregate has so largely increased, the earnings therefrom have not increased in proportion, and especially the net earnings. This also has resulted from several causes. Among them is the fact, that from July to January, owing to differences between the roads from New York west, all west-bound freight was carried at less than half the regular rates; and from the same causes all immigrants have been carried west, during all this season, for about one-third of the regular rates. These causes have largely diminished the earnings on all west-bound business, and they are wholly beyond the control of this company.

In the east-bound cattle business, which is very large, and was formerly a very valuable one, the rates have been almost totally destroyed for the past year through the effect of causes connected with the Eastern roads, and which this company has had no ability to obviate; and that whole business has been done during that time at not much, if any, above cost, and is now going at much less than the cost of doing it.

All the other business from the west eastward, since the crisis of September, has been irregular; for a time, after the commencement of the panic, suspended; then gradually reviving, but never in a volume to fill the capacity of the roads between Chicago and New York. Competition for it therefore has been active, and rates have not been maintained. The result has been, from all these causes, that the average rate of all freight carried over the lines of the company has been during the year only 1.29 cents per ton per mile against 1.57 of the year before. This difference in the rate has made a loss to this company, upon the business which it has done, of $606,950 12, all of which is taken from the net earnings, or what should be such, of the company. This loss has not resulted from depreciation of rates such as was set forth in last year's report from the creation of new lines, but simply from dissensions between existing lines, which it is believed are temporary only, to which should be added the causes resulting from the panic, which are equally temporary. That which has been lost in the rates of the last year, therefore, we may confidently expect will be recovered again. With the reviving prosperity of the country, with average crops, and consequently with rates restored to the average only of the two years before the last, we may reasonably expect increased earnings, both gross and net, somewhat corresponding with the ability of the road to meet the necessities of the business.

Stockholders who read the reports of the last three years are aware of the extensive improvements which have been in progress during that time. They have been necessarily greater than was at first deemed requisite. During the long period in which the road had remained stationary, with none or but little enlargement of its ability to meet the demands of business, the North West had increased very greatly in population, and in the extent of the domain which had become subject to productive industry. The business of transportation had assumed proportions which were greatly beyond the capacity of the roads to accommodate, though additional roads had been in the meantime opened, and the capacity of all rival lines had been greatly enlarged. The rates had depreciated within a period of eight years from 3.06 per cent per ton per mile to 1.56. One-half of the rate had therefore been lost permanently. The capacity to do double the business was necessary to earn the same amount of money, and to continue to make profits above expenses, which, other things being equal, increase as business increases, it was necessary to do three or four times as much as when the rates were twice as large. It should be said, also, that with iron rail, which deteriorates rapidly with increased tonnage the expenses assume still larger proportions as compared with the earnings. In fact, with an iron track and very large tonnage, economy is nearly out of the question. Self-preservation therefore compelled the Michigan Central Company to do whatever was necessary to put its road in condition, not only to convey any volume of business which it might be able to obtain, but to do it with the utmost economy. To largely double its track; to lay it with steel rail; to double its power and rolling stock; to construct new shops, both for the repair of cars and locomotives, had become of indispensable necessity.

This work was undertaken in 1872 more extensively than before, and was in progress until the close of the last fall. The cost of the work has been much greater than had been estimated, but it is satisfactory to know that the work has been done in the most substantial manner, and the road made adequate, except perhaps in equipment, for the increase of business which may be expected for some years to come.

There have been laid with steel rails upon the main line seventy-two and a half miles of double track, which, with the Air line, makes one hundred and seventy-five miles in all, of double track between Detroit and Chicago. Of this 28.85 miles have been laid during the first half of the present fiscal year. The bridges and culverts generally under this track are of masonry, and constructed

in the most permanent and substantial manner. The main line has been laid with steel rail the entire length of it, with the exception of sixty-five miles, and the whole track reballasted so far as was necessary. The whole line of both single and double tracks is probably in as good condition as it is possible with tracks not wholly steel. The shops are substantially completed and are both convenient and adequate. A new station or passenger house has been built at Jackson adequate to the convenience of the public and the company. Smaller ones have been built at other points along the road, but only where the necessity has become so urgent as to become imperative. During the past year additional sidings to the extent of twenty-three miles have been laid. The entire siding now laid, including that in the Chicago and Detroit yards, is 123 miles, or about twenty miles less than half the entire length of road. A large yard at Michigan City, and also at Jackson, with adequate sidings for standing and distribution of cars and making up of trains, has been constructed, and an additional engine-house at the former place. The works for the supply of water at the various stations have been enlarged to meet the increased demand upon them. It will be seen that the result has been almost complete reconstruction as well as enlargement of capacity, and this was inevitable, once the determination being had, to make the road adequate to the business it might reasonably expect, with the development of the West, which has been so rapid, and will be so continuous.

It may be admitted that as yet the results of the large expenditures required for these additions to the property of the Company have not met the expectations of the Board. Some of the causes have been alluded to above. Neither the increased earnings, nor the decrease in expenses, have thus far been equal to our hopes and wishes. One other cause of this has been that, until within the last half year, the work of reconstruction and enlarging the ability of the Great Western road, has been in progress. That road is practically a part of our line, but had not been in a position to do its business with punctuality. Its trains westward were very often out of time, and this deranged all the trains of the Central road which connected with the trains of that road. This also deranged, more or less, all the trains on the road, leading to delays and consequent increase of expense in doing the business. The Board, however, are glad to be able to say, that for some time past this cause of increased expense is obviated, and that all trains upon that road are now run with great regularity. That road is now in all respects equal to the best in the country, and at last, ample in all its appointments for all the business which it may be required to do. This is the first time in very many years that this could be said of it. Its lines are steel throughout, and its road-bed excellent, and its equipment equal to the business.

Another and principal cause of the large ratio of expense of doing the business the past year to earnings, is in the diminished rates at which the business has been done, for the reasons above stated. Had not the rates been almost totally demoralized, partly by the condition of the country, and partly by the dissensions among the managers of railroads, the earnings of this Company would have been from the same business $606,950.12 greater than they were during the year, and with no additional cost. The rate of expense in proportion to earnings would have been very much reduced. The ratio of expenses to earnings during the year before the last on the main line, including taxes, was 65.96, and exclusive of them 63.80. During the last year it has been 68.10, including taxes, and 65.45 exclusive of them. But during the year there have been carried the whole length of the road 260,392 tons more of freight, with only $320,404 10 increase of earnings. Had the same rates ruled during the year as did during the prior year, the ratio of expenses to earnings would have been, with taxes included, 62.48, and excluded, 60.05.

During the year 1873 there was much steel rail in the track, and during the past year for most of the time, all the steel rail was in, which is now there. The expense of the repairs of machinery in consequence of the condition of the track had somewhat diminished in the former year, when it was 8.16 cents per mile run during the year. During the last year this expense has been reduced to 4.96 cents per mile run. This reduction is somewhat due to adequate and convenient shops, but is mainly the result of better track, and is a striking result of the use of steel rail. In addition to this it may be stated that, with the country in a healthy condition, financially, the business of the road would have been much larger, with comparatively small increase of expenditures. But even now the business per ton per mile has been done at less expense than ever before. The causes of diminished earnings from business done, and the causes which have affected business itself passing away, it is believed that the expenses will be brought within 60 per cent. of the gross earnings, while the gross earnings from the business done, and the volume of business also, will be very largely increased.

Until the past year, the business has, for several years, exceeded the capacity of the road, and has increased as fast as the enlarged capacity would allow it to do so. In 1870 the tonnage moved over the road was 823,770 tons, which was the largest amount carried in any one year up to that time. In the last year, 1874, it has been 1,593,954 tons, very nearly twice as much as in 1870. These statements have reference only to the business of the main line and its increase.

The other lines during the year have also suffered by the general depression in business. For a time after September the lumber traffic was almost totally suspended, and has not yet fully recovered; and stockholders will observe by the statement of the Treasurer that so far as lateral lines are concerned, they have failed to pay expenses and their rent and interest. This was to have been expected for a short time, with the Jackson, Lansing and Saginaw division, in any event, because having been so recently constructed northward from Bay City, its proper business could not at once become fully established. Though several mills have been built upon the northern portion of the line, and some of them large ones, yet the progress of improvement there has also been kept back by the financial revulsions and the general depressed state of the staple traffic upon which it must mainly rely for its business.

It was not, however, because these lines would be profitable in themselves that this Company ventured upon a lease of them, but because they would contribute to the business of the main line largely, and because in some of them also the control of them by this Company seemed essential to protect the local rates and business of the main line. It is, however, fully believed that with a revival of business, each one of them will take care of itself, while contributing largely to the business of the main line, and that the most important of them, the Jackson, Lansing and Saginaw, will become in itself, not only self sustaining, but profitable.

The largest element, however, which weighed with the Board in making these leases, was the wish to protect the rates and increase the business of the main line. The gross business of that line was last year $6,312,788 23, of which considerable more than one-sixth of the whole amount, is business to and from these lateral roads and upon which this Company generally gets its best rates. This will be a constantly increasing business, and is one which, in the main, might as easily pass over rival roads, as over the Central, if in their interest. Though, therefore, judging by the fruits of the past year from the lines themselves only, it might appear that possibly a mistake had been made perhaps in one of them, yet the action of the Board, even if now to be confirmed, would seem to be not only expedient but a necessity even. It may be remarked, also, that the value of no railway property can be fairly tested by the results of the past year's experience.

There has been expended for construction during the year, $2,060,636 62.

Among the items of expenditure are the grading and superstructure for double track and steel rail in main line	$1,093,344 02
For additional siding	240,513 12
Repair shops for engines at Jackson, and repair shops for cars at Detroit, engine houses, at Jackson, Detroit and Michigan City, passenger depots, coal-shutes and passenger cars	623,507 27

Though all the contemplated improvements made in the permanent property of the Company were substantially completed before the panic occurred, yet there was a large debt remaining unpaid, in various forms. This has been partly paid by the sale of the bonds of the Company, and but for the disturbance in the business of the country by the financial crisis, and the effect upon the revenues of the Company, the remainder would have been now almost entirely liquidated, leaving the future earnings, above expenses and interest, applicable to dividends. The Board regret to say that it is now probable that the earnings until January may be required to extinguish the remaining floating debt.

The addition to the equipment during the year has been small, consisting mainly of passenger stock. The increase of the rolling stock during the two prior years had been very large. That intended for the local or home business of the road is fully adequate, probably, for the purpose. The increase of rolling stock in the through lines running over the road, by other roads with which the road of this Company connects, has been larger in proportion than that made by this Company, which creates large balances against it for the mileage of those cars. This should be remedied, and its full quota of cars should be put into the lines.

The fact that the Jackson, Lansing and Saginaw road was originally planned to extend from Jackson to Saginaw, and the appointments were, consequently, only for a short road, was the cause why they became inadequate, when the road was extended, for a larger business. It became a necessity, therefore, generally to enlarge its sidings south of Wenona, and in the Saginaw Valley to make very considerable changes and improvements. These have been done during the last year, and it is not expected that any considerable expenditure will again be required, beyond operating expenses, for some years. On the other lateral lines but little has been required.

The business of the Company, judging from the past only, will very largely increase, with its increased ability to do it, and though the rates may somewhat decline, the net earnings will from the greater cheapness with which the road can be worked, correspond with the business. Stockholders, therefore, may reasonably hope for early resumption of dividends, and with the revival of business and returning prosperity, that the value of their property may again be restored.

The completion of the International Bridge at Buffalo, across the Niagara River, is an event of much importance in the progress of improvement. It supersedes the old and inconvenient passage by means of a ferry. It improves very greatly the Grand Trunk route between the Michigan Central road at Detroit, and the roads east of Buffalo, and also gives passage to the trains of the Canada Southern road, now open and in use from the Detroit station of this Company, to a connection with the same roads. Both these lines will be valuable at all times, and especially so when the Detroit passage is obstructed by ice, as has been often the case.

The work upon the tunnel at Detroit has been discontinued. The difficulties which were developed by the small experimental tunnel undertaken for the purpose of ascertaining what obstacles were to be met with, have been found to be so great as to force upon our minds the conviction that if practicable at all, the railroad tunnel there

would be too expensive for a private company to undertake its construction. So far as could be determined by the experiment made, much more time, and a very much greater amount of money than had been estimated by the chief engineer, would be required for the work. It has therefore been thought best to go no further with it. This has been matter of great regret, because the interests of the railways, as well as that of the whole public, and especially the West—so greatly interested in easy, quick and cheap transportation—require a much better crossing of the Detroit River than by ferries, and especially during the five months when the navigation upon the lakes is usually closed. A bridge at Detroit seems to be the only alternative if the business of the railroads is to continue to find its way across the river at that point. It is, however, probable that at some other place, where the bottom of the river is rock, a tunnel may be found feasible within reasonable cost, and all roads unite in its construction.

The whole number of locomotives on the main line and branches is 210, the same as last year. The cars are classified as follows: 74 12-wheel and 8 8-wheel day coaches, 30 12-wheel and 4 8-wheel second class, 3 railway postal, 19 12-wheel and 20 8-wheel baggage and mail, 96 conductors', 164 large and 140 small stock, 1,843 merchandise, 474 Blue Line, 21 refrigerator, 1,332 platform, 189 double deck, 2 derrick and 2 pile driver cars.

Miles run by locomotives with passenger trains 1,076,255; with freight trains, 2,406 888; miscellaneous trains, 821,564; switching trains, 1,311,298—total, 5,116,005.

The total number of passengers carried during the year was 877,446, of whom 153,227 were through, and 724,219 way. Total number of tons of freight moved, 1,593,954. Tons carried one mile, 313,401,088.

The Treasurer, in his report, gives the following comparative statement of the business of the past year with that of the previous year:

From June 1, 1872, to June 1, 1873—		
The gross receipts of the main line and branches were		$7,307,024 59
Operating expenses	$4,791,641 40	
Interest account	1,071,306 23	
		5,862,947 63
Net		$1,444,076 96
From June 1, 1873, to June 1, 1874—		
The gross receipts were		$7,665,372 66
Operating expenses	$5,523,642 39	
Interest account	1,284,432 20	
		6,808,074 59
Net		$857,298 07

The bonded debt has been increased during the past year by the issue of $1,000,000, 7 per cent bonds, so that it amounts now to $10,735,000; $650,000 of the bonds of 1882 are in the sinking funds, which reduces the amount of outstanding bonds to $10,085,000.

The sum invested in the sinking funds amounts, as shown in the report of the Trustees, to $1,676,672 86, of which $650,000 are bonds of this company, due in 1882.

There has been no change in the amount of the capital stock, which still stands at	$18,738,204 00
Construction account amounts to	26,992,517 54
The floating debt amounts to	1,056,452 77

—being $284,915 38 less than reported in January last.

Directors.—James F. Joy, Detroit; John W. Brooks, Nathaniel Thayer, H. H. Hunnewell, Boston; George F. Talman, Moses Taylor, New York; Sidney Bartlett, Boston; John Jacob Astor, New York; Erastus Corning, Albany.

Treasurer.—Isaac Livermore.

Vice Treasurer & Clerk.—Joshua Crane.

Gen'l Superintendent.—H. E. Sargent.

Auditor.—William Boott.

Southern Minnesota Railroad.

At a meeting of the holders of the eight per cent construction bonds of the Southern Minnesota railroad company, held in December last, a committee, previously appointed for the purpose, submitted a plan of reorganization embracing the following features:

1. Upon the bidding in of the road under the foreclosure by the Trustees, new bonds shall be issued in lieu of the eight per cent. construction bonds, and to the same amount per mile, dated April 1, 1874, with interest at six per cent. for the first two years, and thereafter at seven per cent. But should the earnings for the first two years be sufficient, seven per cent. interest shall be paid, otherwise the two per cent. deficiency shall be paid in preferred stock.

2. The coupons in arrear, computed to April 1, 1874, shall be paid in preferred stock limited to the aggregate amount of said coupons ($4,000 per mile,) and of the deficiency in interest above provided for ($400 per mile.)

3. All of the Directors of the organized company, except two, shall be appointed by the holders of the new bonds and of the preferred stock. The remaining two shall be elected by the holders of the common stock. For the first year the Directors to represent the bondholders shall be appointed by the committee.

4. The board shall have power, with the assent of the holders of a majority of the common stock, to issue second mortgage bonds upon the road for an amount not exceeding $2,000 per mile for equipment or repairs.

5. Common stock shall be issued to the holders of the seven per cent. equipment bonds, at the rate of $8,500 per mile, in lieu of the bonds now held by them, and to the present stockholders and holders of the floating debt at the rate of $1,500 per mile, in case they shall assent to this plan of reorganization.

6. No lease shall be made which will not secure the payment of seven per cent. per annum on the common stock, without the consent of a majority of the holders of the common stock.

It is announced that the plan of reorganization, made in conformity with the above agreement, has received the written assent of a large majority of the eight per cent. construction bonds, of the second mortgage bonds, of the floating debt, and of the stock; that a final decree of foreclosure directing a sale has just been obtained from the court by consent of all the parties, and that the committees representing the various interests are acting in full accord in carrying out the above mentioned plan. Under this decree the road will be sold, and bid in by the Trustees for the bondholders. It will then be resold by the order of the majority, pursuant to the right of resale secured in the mortgage and confirmed in the decree.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending August 1, at 407,165 tons, and for the coal year 10,868,962 tons against 11,559,392 tons to corresponding time last year, being a decrease of 669,431 tons. The bituminous tonnage for the week is 72,108 tons, and for the year 1,656,886 tons, against 1,794,244, tons to same time last year, giving a total of all kinds for the week of 479,273 tons, and for the year of 12,525,848 tons, against 12,353,637 tons to same time last year, being a decrease of 827,789 tons.

☞ The citizens of Underhill, Vt., have voted, 138 to 129, to bond the town to the amount of $17,000 in aid of the Burlington and Lamoille Valley Railroad.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*), occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."
